1	Homoepitaxial Diamond Growth by Plasma-Enhanced Chemical Vapor Deposition.	1
	Norio Tokuda	
1.1	Introduction	1
1.2	Growth Mechanism	3
1.2.1	Hydrogen	3
1.2.2	Carbon	4
1.3	Growth Modes	5
1.4	Doping	9
1.5	Growth of Atomically Flat Diamond	10
1.5.1	Hillock-Free Surfaces	12
1.5.2	Step/Terrace Structures	14
1.5.3	Atomically Step-Free Surfaces	16
1.6	Conclusions	19
	References	19
2	Diamond/β-SiC Composite Thin Films: Preparation, Properties and Applications.	31
	Xin Jiang and Hao Zhuang	
2.1	Introduction	31
2.2	Basics of Synthesizing Composite Films	32
2.3	Controlling the Orientation, Crystallinity, and Phase Distribution	35
2.4	Properties and Applications of the Composite Films	41
2.4.1	Improvement of the Film Adhesion	41
2.4.2	Biosensor Application	43
2.5	Conclusions and Feature Aspects	47
	References	49

3	Surface Chemistry of Diamond	53
	Karin Larsson	
3.1	Introduction	53
3.2	Methods and Methodologies	54
3.3	Reactivity of Different Diamond Surface Planes	56
3.4	Effect of Co-adsorption on Diamond Surface Reactivity	57
3.4.1	General	57
3.4.2	Energetic Stability of Surface Termination	59
3.5	Size Effects	64
3.6	Doping Effects	65
3.6.1	General	65
3.6.2	H-Abstraction Rates for Growth of Non-doped Diamond	66
3.6.3	H-Abstraction Rates for Growth of N-Doped Diamond	68
3.7	Surface Electrochemistry	75
3.7.1	General	75
3.7.2	Electronic Transfer Over the Diamond//Atmospheric Adlayer Interface	76
3.7.3	Adhesion Energies for the Attachment of Atmospheric Adlayers	78
	References	80
4	Surface Modifications of Nanodiamonds and Current Issues for Their Biomedical Applications	85
	J.C. Arnault	
4.1	Introduction	85
4.2	Production of Nanodiamonds	87
4.3	Characterization Tools	88
4.3.1	Diamond Core	89
4.3.2	Outer Shells and Surface Chemistry	91
4.4	Surface Modifications of Nanodiamonds	92
4.4.1	Surface Hydrogenation of Nanodiamonds	93
4.4.2	Oxidation of Nanodiamonds	96
4.4.3	Amination, Fluorination or Chlorination of Nanodiamonds	97
4.4.4	Surface Graphitization of Nanodiamonds	97
4.5	Colloidal Properties of Modified Nanodiamonds	100
4.5.1	Surface Reactivity of Modified NDs	101
4.5.2	Solubility, Stability in Colloids	102
4.5.3	Negatively Charged NDs	102
4.5.4	Positively Charged NDs	102
4.5.5	Presence of Graphitic Carbon at the NDs Surface	103

4.6	Nanodiamonds and Biomedical Applications	105
4.6.1	NDs Assets	105
4.6.2	Some Current Challenges	107
4.7	Conclusion	109
	References.	110
5	Diamond Nanowires: Fabrication, Structure, Properties and Applications.	123
	Yuan Yu, Liangzhuan Wu and Jinfang Zhi	
5.1	Introduction	123
5.2	Synthetic Strategies of Diamond Nanowires.	124
5.2.1	Plasma-Assisted Reactive Ion Etching (RIE) Route.	125
5.2.2	Chemical Vapor Deposition Method (CVD).	128
5.2.3	Diamond Nanowires Realized from sp^2 Carbon and sp^3 Diamondoid	135
5.3	Structures and Properties: Simulation and Experiments	137
5.3.1	Structural Stability of Diamond Nanowires	137
5.3.2	Mechanical Properties of Diamond Nanowires	141
5.3.3	Density and Compressibility Properties of Diamond Nanowires	143
5.3.4	Phonon Optical Mode and Electronic Structure of Diamond Nanowires	144
5.3.5	Thermal Conductivity of Diamond Nanowires	145
5.3.6	Electrochemical Properties of Diamond Nanowires	146
5.4	Application of Diamond Nanowires	147
5.4.1	Field Emission from Diamond Nanowire.	147
5.4.2	Diamond Nanowires for Highly Sensitive Matrix-Free Mass Spectrometry Analysis of Small Molecules	149
5.4.3	Suspended Single-Crystal Diamond Nanowires (SCD) for High-performance Nano-electromechanical Switches	150
5.4.4	Diamond Nanowires for Electrochemical Sensor.	151
5.5	Conclusions and Outlook.	155
	References.	155
6	Nanoparticle-Based Diamond Electrodes	165
	Geoffrey W. Nelson and John S. Foord	
6.1	Introduction	165
6.2	Metal and Metal Oxide Nanoparticle Coated Diamond Electrodes	168
6.2.1	Choice of Material	168
6.2.2	Methods of Deposition	172
6.2.3	Surface Characteristics	178

6.3	Diamond Nanoparticles as an Electrode Material	185
6.3.1	Background on Detonation Nanodiamond	185
6.3.2	Electrochemistry of Detonation Nanodiamond	186
6.3.3	Methods of Deposition/Incorporation into Electrode Form	186
6.3.4	Characterization of Diamond Nanoparticle-Based Electrodes	187
6.4	Interactions at the Metal-Diamond Interface	187
6.5	Modern State-of-the-Art and Outlook	189
	References.	191
7	Modified Diamond Electrodes for Electrochemical Systems for Energy Conversion and Storage.	205
	Patricia Rachel Fernandes da Costa, Elisama Vieira dos Santos, Juan M. Peralta-Hernández, Giancarlo R. Salazar-Banda, Djalma Ribeiro da Silva and Carlos A. Martínez-Huitle	
7.1	Introduction	205
7.2	Modification of BDD Surface	206
7.3	Application of Modified BDD Films as Electrocatalytic Surfaces for Fuel Cells	218
7.4	BDD-Electrochemical Capacitors	224
7.5	Recent Applications of BDD for Electrochemical Energy Storage and Conversion.	227
7.6	Conclusions	231
	References.	232
8	Diamond PN/PIN Diode Type Electron Emitter with Negative Electron Affinity and Its Potential for the High Voltage Vacuum Power Switch	237
	Daisuke Takeuchi and Satoshi Koizumi	
8.1	Electron Emission Mechanism of Diamond Surfaces with True NEA	237
8.1.1	Introduction.	237
8.1.2	NEA Properties Investigated with TPYS System	239
8.1.3	Electronic States of Diamond with Free Excitons	246
8.1.4	(111) and (110)	248
8.1.5	Summary.	248
8.2	<i>PN</i> and <i>PIN</i> Junction Electron Emitters with NEA	248
8.2.1	Introduction.	248
8.2.2	High Electron Emission Efficiency from <i>PN</i> Junction Electron Emitters	249
8.2.3	<i>PIN</i> Junction Electron Emitters	251

8.3	High Voltage Vacuum Power Switch	259
8.3.1	Background	259
8.3.2	Capability of the Vacuum Power Switch	259
8.3.3	10 kV Vacuum Switch Using a Diamond PIN^+ Electron Emitter with Negative Electron Affinity	262
8.4	Conclusion	267
	References.	268
9	Diamond Ultramicro- and Nano-electrode Arrays.	273
	Nianjun Yang, Jakob Hees and Christoph E. Nebel	
9.1	Introduction	273
9.2	Microelectrodes and Ultramicroelectrodes	275
9.3	Diamond Electrode Arrays.	276
9.3.1	Diamond Micro- and Ultramicro-electrode Arrays.	276
9.3.2	Addressable Diamond Ultramicroelectrode Arrays	281
9.3.3	Nanoelectrode Arrays	283
9.4	Summary and Outlook	288
	References.	288
10	Advances in Electrochemical Biosensing Using Boron Doped Diamond Microelectrode	295
	Stéphane Fierro and Yasuaki Einaga	
10.1	Introduction	295
10.2	BDD Microelectrode Preparation and Structural Characterization	296
10.3	Dopamine Detection	299
10.4	Glutathione Detection	311
10.5	Conclusions	314
	References.	314
	Index	319

Novel Aspects of Diamond
From Growth to Applications

Yang, N. (Ed.)

2015, XVI, 325 p. 153 illus., 33 illus. in color., Hardcover

ISBN: 978-3-319-09833-3
