

# Contents

<b>A Note on the Large Deviations for Piecewise Expanding Multidimensional Maps</b> .....	1
R. Aimino and S. Vaienti	
<b>Directional Metric Entropy and Lyapunov Exponents for Dynamical Systems Generated by Cellular Automata</b> .....	11
Maurice Courbage and Brunon Kamiński	
<b>On the Complexity of Some Geometrical Objects</b> .....	29
P. Collet	
<b>Fluctuations of Observables in Dynamical Systems: From Limit Theorems to Concentration Inequalities</b> .....	47
Jean-René Chazottes	
<b>On Flow Barriers in Discontinuous Dynamical Systems</b> .....	87
Albert C. J. Luo	
<b>Nonstandard Analysis of the Behavior of Ergodic Means of Dynamical Systems on Very Big Finite Probability Spaces</b> .....	115
E. I. Gordon, L. Yu. Glebsky and C. W. Henson	
<b>On Measures Resisting Multifractal Analysis</b> .....	153
Jörg Schmeling and Stéphane Seuret	
<b>An Overview of Complex Kleinian Groups</b> .....	167
Angel Cano and José Seade	
<b>Semigroups of Mappings and Correspondences: Characters and Representations in Holomorphic Dynamical Systems</b> .....	195
Carlos Cabrera, Peter Makienko and Peter Plaumann	

Nonlinear Dynamics New Directions

Theoretical Aspects

González-Aguilar, H.; Ugalde, E. (Eds.)

2015, X, 219 p. 30 illus., 15 illus. in color., Hardcover

ISBN: 978-3-319-09866-1
