

Contents

1	Neutron Stars and Pulsars	1
1.1	Birth, Life and Death	1
1.1.1	Fermi Gasses and the Chandrasekhar Limit	2
1.2	Supernovae and the Birth of Neutron Stars	4
1.2.1	Core-Collapse Supernovae	4
1.2.2	Electron-Capture Supernovae et al.	4
1.3	Neutron Star Structure	5
1.4	Equation-of-State	6
1.4.1	Tackling the Equation-of-State Problem	7
1.5	Pulsars	9
1.5.1	Pulsar Emission	11
1.5.2	Spin-Down and Ages	12
1.5.3	The $P-\dot{P}$ Diagram and Binary Pulsars	13
1.6	Thesis Outline	14
	References	15
2	Binary and Millisecond Pulsars	17
2.1	The Observed Population of Binary Pulsars	17
2.2	Timing and Orbits	18
2.2.1	Masses and Tests of General Relativity	20
2.2.2	Special Cases: Circular Orbits	21
2.2.3	Special Cases: Mass Ratios and Spectroscopy	22
2.3	Recycled Pulsars and Their Formation	22
2.3.1	Evolution of the Orbital Separation	23
2.4	Low-Mass He-Core White Dwarf Companions	24
	References	25

3	An Observational Test for Low-Mass Helium-Core White-Dwarf Models	27
3.1	Introduction	27
3.2	Observations	28
3.2.1	Spectroscopy	28
3.2.2	Photometry	30
3.3	Results	30
3.3.1	Radial Velocities and Orbit	30
3.3.2	Interstellar Extinction	31
3.3.3	Spectral Fit	32
3.3.4	Radius and Surface Gravity	33
3.4	Ramifications	34
3.4.1	A Test of the Atmospheric Models	34
3.4.2	3D Velocity: A Pulsar Coming from the Galactic Center	34
3.4.3	Comparison of Atmospheric Properties and Mass Radius Relations	35
3.5	Conclusions	35
	References	36
4	The Relativistic Binary PSR J1738+0333	37
4.1	Introduction	37
4.2	Observations	39
4.2.1	Radio	39
4.2.2	Optical	40
4.2.3	Photometry	43
4.3	Results	44
4.3.1	Radial Velocities	44
4.3.2	Radial Velocity, Orbit and Mass Ratio	45
4.3.3	Systemic Velocity	49
4.3.4	Interstellar Reddening	49
4.3.5	Temperature and Surface Gravity of the White Dwarf	49
4.3.6	White Dwarf Radius from Photometry	52
4.3.7	Masses of the White Dwarf and the Pulsar	53
4.3.8	Cooling Age	54
4.3.9	3D Velocity and Galactic Motion	54
4.4	Ramifications	55
4.4.1	Kinematics	55
4.4.2	Evolutionary History	56
4.4.3	Pulsar Mass and Efficiency of the Mass Transfer	57
4.5	Conclusions	58
4.6	Summary of Results Presented in Paper II	59
	References	61

5 A Massive Pulsar in a Compact Relativistic Binary	63
References	68
6 A White Dwarf Companion to the Relativistic Pulsar J1141–6545	69
6.1 Introduction	69
6.2 Observations and Data Reduction.	70
6.2.1 Photometry	71
6.2.2 Astrometry	71
6.3 Results	72
6.3.1 Distance and Reddening.	73
6.3.2 Age and Temperature.	74
6.4 Conclusions and Discussion	75
References	77
7 Summary and Future Work	79
7.1 Overview	79
7.2 Questions and Thoughts for the Future	81
7.2.1 White Dwarf Physics	81
7.2.2 Millisecond Pulsar Ages.	82
7.2.3 Evolution of Low-Mass X-ray Binaries	82
7.2.4 Neutron Star Masses	82
7.2.5 Strong-Field Gravity	83
References	83

Multi-Wavelength Studies of Pulsars and Their
Companions

Antoniadis, J.

2015, XXI, 83 p. 23 illus., 18 illus. in color., Hardcover

ISBN: 978-3-319-09896-8
