Part I Modification of General Relativity: General Scalar-Tensor Theories

1 Gravity and Scalar Fields	3
Thomas P. Sotiriou	
1.1 Introduction.....	3
1.2 General Relativity and Beyond	5
1.2.1 General Relativity: Basic Assumptions and Uniqueness	5
1.2.2 Less Assumptions Means More Degrees of Freedom! ...	7
1.2.3 Taming the Extra Degrees of Freedom	9
1.3 Scalar-Tensor Gravity	10
1.3.1 The Prototype: Brans–Dicke Theory	10
1.3.2 Scalar-Tensor Theories	12
1.3.3 Hiding the Scalar Field, Part I	13
1.3.4 The Horndeski Action	16
1.3.5 Hiding the Scalar Field, Part II.....	17
1.4 Scalar-Tensor Gravity in Disguise	17
1.4.1 $f(R)$ Gravity	18
1.4.2 Hořava Gravity.....	19
1.5 Scalar Fields Around Black Holes.....	20
Conclusions	22
References.....	23
2 From Lovelock to Horndeski’s Generalized Scalar Tensor Theory...	25
Christos Charmousis	
2.1 Introduction.....	25
2.2 The Lovelock and Horndeski Uniqueness Theorems.....	29
2.2.1 Lovelock Theory.....	29
2.2.2 Horndeski Theory	32

2.3	Seeking Exact Solutions in Lovelock Theory	35
2.4	From Lovelock to Horndeski Theory: Kaluza-Klein Reduction ...	41
2.5	Self-tuning and the Fab 4	46
	Conclusions	53
	References	54
3	Modified Gravity and Coupled Quintessence	57
	Christof Wetterich	
3.1	Introduction	57
3.2	Basic Setting	59
3.3	Weyl Scaling	61
3.4	Brans-Dicke Cosmology	63
3.5	Scalar Tensor Models	65
3.6	Slow Freeze Universe	69
3.7	Modified Gravity with $f(R)$	73
3.8	$f(R)$ -Gravity with Varying Particle Masses	79
3.9	Non-local Gravity	84
3.10	Higher Derivative Modified Gravity with Second Order Field Equations	86
	Conclusions	89
	References	91
4	The Effective Field Theory of Inflation/Dark Energy and the Horndeski Theory	97
	Shinji Tsujikawa	
4.1	Introduction	97
4.2	The General Gravitational Action in Unitary Gauge and the Background Equations of Motion	100
4.3	Second-Order Action for Cosmological Perturbations	105
4.4	Inflationary Power Spectra	109
4.5	Horndeski Theory	113
4.5.1	The Lagrangian of Horndeski Theory	113
4.5.2	Horndeski Lagrangian in Terms of ADM Variables	116
4.5.3	Conditions for the Avoidance of Ghosts and Laplacian Instabilities	118
4.5.4	Primordial Power Spectra in k-Inflation	120
4.6	Horndeski Theory in the Language of EFT	121
4.7	Application to Dark Energy	124
4.7.1	Background Equations of Motion	125
4.7.2	Matter Density Perturbations and Effective Gravitational Couplings	126
4.7.3	Growth of Matter Perturbations	130
	Conclusions	132
	References	133

Part II Massive Gravity

5	Introduction to Massive Gravity	139
	Claudia de Rham
