Part I Overview

1	Introduction	3
1.1	Introductory Perspective and Motivation	3
1.2	Supply Chain Management	6
1.2.1	Integrated Supply Chain Management	7
1.3	Supply Chain Modeling	8
1.3.1	Organizational Structure	9
1.3.2	Model Elements	9
1.4	Research Scope and Objectives	10
1.5	Modeling Methodologies and Tools	12
1.5.1	Normative Approaches	12
1.5.2	Descriptive Approaches	13
1.5.3	Decision-Making Under Uncertainty	14
1.6	Literature Review	16
1.6.1	Classical Approaches	16
1.6.2	Integrated Approaches	21
1.7	Book Outline	25

Part II Business Functional Integration in Strategic Decision-Making

2	Financial Issues in the Design of Supply Chains	31
2.1	Integrating Process Operations and Finances	31
2.2	Problem Statement	37
2.3	Mathematical Formulation: A Holistic Model	40
2.3.1	Design–Planning Formulation	40
2.3.2	Integration Between Models	44
2.3.3	Financial Formulation	48
2.3.4	Objective Function: Using a Valuation Method	52

2.4	Motivating Example	56
2.5	Final Considerations	61
2.6	Notation	68
3	Synchronizing Supply Chain and Product Development	
	Decisions	73
3.1	The Significance of Product Development and SC Coordination	73
3.2	Problem Statement	77
3.3	Mathematical Formulation	78
3.3.1	Product Pipeline Management	78
3.3.2	Design and Planning Model	81
3.3.3	Integration of Product Pipeline Management and SC Operations	81
3.3.4	Financial Management	82
3.4	Motivating Example	83
3.5	Decomposition Technique	86
3.6	Final Considerations	90
3.7	Notation	91
4	Linking Marketing and Supply Chain Planning Models	93
4.1	The SC Operations and Marketing Interface	93
4.2	Problem Statement	95
4.3	Mathematical Formulation	96
4.3.1	Strategic Marketing Modeling	96
4.3.2	The SC Design-Planning Model	99
4.3.3	The Financial Formulation	99
4.3.4	Integration Between Models	100
4.4	Motivating Example	100
4.5	Final Considerations	102
4.6	Notation	104
 Part III Operations Strategic and Tactical Issues		
5	Flexible Design—Planning of Supply Chain Networks	109
5.1	Flexible Supply Chain Design and Planning	109
5.2	Problem Statement	112
5.3	Mathematical Formulation	113
5.3.1	Design and Planning Model	113
5.3.2	Performance Indicator	117
5.4	Examples	121
5.4.1	Illustrative Example	121
5.4.2	Case Study	124

5.5	Final Considerations	129
5.6	Notation	130
6	Integrated Operations and Environmental Planning	133
6.1	Green Supply Chain Management	133
6.2	Problem Statement	136
6.3	Mathematical Formulation	138
6.3.1	Supply Chain Design-Planning Model	138
6.3.2	Environmental Model	138
6.3.3	Economic Model	140
6.4	Case Study.	141
6.4.1	CO ₂ Emission Trading Considerations.	151
6.5	Final Considerations	152
6.6	Notation	154

Part IV Treatment of Uncertainty

7	Capturing Dynamics in Integrated Supply Chain Planning	159
7.1	Managing Dynamics in the Integrated Planning of the SC	159
7.2	Problem Statement	162
7.3	The Predictive Model: A Multistage Stochastic Approach	165
7.3.1	Scenario Tree	165
7.3.2	MILP Model	167
7.4	Scenario Generation: The Forecasting Module	178
7.5	Control Strategy: A Joint Framework	179
7.6	Motivating Example	181
7.7	Final Considerations	190
7.8	Notation	191
8	Using S-Graph to Address Exogenous Uncertainty in Processes Scheduling.	197
8.1	Scheduling Under Uncertainty	197
8.2	Problem Statement	199
8.3	A Brief Introduction to S-Graph	200
8.3.1	Graph Representation of Scheduling Problems	200
8.3.2	Throughput Maximization Using S-Graph	201
8.4	Enhancing S-Graph Framework to Address Scheduling Under Uncertainty.	203
8.4.1	Expected Performance Evaluator: An LP	204
8.5	Literature Examples	208
8.5.1	Example 1	208
8.5.2	Example 2	210
8.6	Final Considerations	214

Part V Integration of Hierarchical Decision Levels

9	Considerations of Planning and Scheduling into the Design of Supply Chains	217
9.1	Integration of Business Decisions	217
9.2	SCM as a Control Strategy	220
9.3	The Predictive Model	222
9.3.1	Scenario Tree	222
9.3.2	Operations Model	223
9.3.3	Integration Between Operations and Financial Model	227
9.3.4	Financial Model	230
9.4	Case Study.	230
9.4.1	The Design Problem	232
9.4.2	Testing Solutions Using the MPC Framework	236
9.4.3	Failures Consideration	240
9.5	Final Considerations	241
9.6	Notation	242
10	Conclusions and Future Perspectives	247
10.1	Conclusions	247
10.2	Future Perspectives	251
	Appendix A: Methods and Tools	255
	Appendix B: Data for Chapter 2 Case Study	279
	Appendix C: Data for Examples in Chapter 5.	285
	Appendix D: Data for Chapter 7 Case Study	287
	References.	293
