

Contents

1 Granular Fluids: From Everyday Life to the Lab	1
1.1 The Granular “States”	1
1.2 Granular Flows	3
1.2.1 Air Fluidization	3
1.2.2 Shear	4
1.2.3 Shakers	8
1.3 Granular Versus Active Fluids	13
References	15
2 Boltzmann Equation: A Gas of Grains	19
2.1 Collisions	19
2.1.1 Elastic Smooth Hard Spheres	21
2.1.2 Statistics of Hard Spheres Collisions	22
2.1.3 Inelasticity	25
2.1.4 Inelastic Collapse	27
2.2 The Boltzmann Equation	29
2.2.1 Liouville and Pseudo-Liouville Equations	29
2.2.2 The BBGKY Hierarchy	32
2.2.3 The Boltzmann Hierarchy and the Boltzmann Equation	35
2.2.4 Collision Invariants and H-theorem	36
2.2.5 The Maxwell Molecules	38
2.2.6 The Enskog Correction	39
2.3 The Boltzmann Equation for Granular Gases	41
2.3.1 Average Energy Loss	41
2.3.2 Sonine Polynomials	42
2.3.3 The Homogeneous Cooling State	44
2.3.4 Inelastic Maxwell Molecules	46
2.3.5 Bulk Driving	47
2.3.6 Looking for a “Granular” H-theorem	50
References	51

3	Hydrodynamics: A Sea of Grains	53
3.1	Granular Kinetic Theory	53
3.1.1	A Sketch of the Chapman-Enskog Approximation Method	54
3.1.2	Densities and Fluxes	55
3.1.3	Equations for the Densities	56
3.1.4	Chapman-Enskog Closure	57
3.1.5	Inelastic Case	61
3.2	Critiques of Granular Hydrodynamics	62
3.3	Applications of Granular Hydrodynamics	66
3.3.1	Linear Stability Analysis of the Homogeneous Cooling State	66
3.3.2	A Solvable Case: Granular Sedimentation in 2D	68
3.3.3	Thermal Convection	71
3.3.4	Other Instabilities of Granular Hydrodynamic	72
3.4	Fluctuating Hydrodynamics	73
3.4.1	Simple Models of Noise	74
3.4.2	Deriving the Fluctuations from the Kinetic Equation	77
	References	79
4	Tracer's Diffusion: Swimming Through the Grains	81
4.1	The Markovian Limit	81
4.1.1	Decoupling the Gas from the Tracer	82
4.1.2	The Transition Rate	83
4.2	The Large Mass Limit	85
4.2.1	Langevin Equation for the Tracer	87
4.3	Non-Markovian Tracer's Diffusion	89
4.4	The Granular Brownian Ratchet	90
4.4.1	Continuous Limit	91
4.4.2	Other Methods, Models and Experiments	93
	References	94
5	The Arrow of Time: Past and Future of Grains	97
5.1	Equilibrium from a Dynamical Perspective	97
5.1.1	The Case of Markov Processes	98
5.1.2	Entropy Production	98
5.1.3	Observables Related to Entropy Production	99
5.2	The Case of the Granular Intruder	101
5.2.1	The Paradox of the Large Mass Limit	101
5.2.2	Linear Response	102
5.2.3	The Granular Motor	103
5.2.4	Coupling with the Fluid: Non-equilibrium Re-established	104
5.3	Time-Reversal in Fluctuating Hydrodynamics	106
	References	107

Conclusion and Perspectives.	109
Appendix A: Expansion of the First Two Moments of the Transition Rates for Large Mass of the Tracer.	111
Index	117

Transport and Fluctuations in Granular Fluids
From Boltzmann Equation to Hydrodynamics, Diffusion
and Motor Effects

Puglisi, A.

2015, XVI, 118 p. 16 illus., 5 illus. in color., Softcover

ISBN: 978-3-319-10285-6
