1	Jets at Birth and Death	1
	D. Lynden-Bell	
1.1	Introduction	1
1.2	Magnetic Energy and the Pinch Effect	6
1.3	Time-Dependent Force-Free Magnetic Fields	10
1.3.1	Grad-Safranov Equation Solved: Collimation Lost.....	10
1.3.2	Collimation Regained	13
1.3.3	Minimum Energy Solution via an Adaptable Trial Function	16
1.4	Remark on the C-K Cosmic Battery.....	21
	References.....	23
2	Relativistic Jets in Stellar Systems	1
	Elena Gallo	
2.1	Review of Observations	1
2.1.1	Black Hole X-Ray Binary Outbursts	1
2.1.2	Accretion Modes and Relativistic Jets I: Hard State Steady Jets	2
2.1.3	Accretion Modes and Relativistic Jets II: Hard-to-Soft Transition – Flaring Jets.....	3
2.1.4	Accretion Modes and Relativistic Jets III: Soft State Winds.....	4
2.1.5	Accretion Modes and Relativistic Jets IV: Caveats and Other Recent Developments	5
2.2	The Radio/X-Ray Domain of Hard and Quiescent State Black Hole X-Ray Binaries.....	7
2.2.1	X-Ray/Optical-IR Correlation	10

2.3	Relation Between Jet Power and Black Hole Spin	11
2.4	Measures of Jet Power	12
2.4.1	Multi-wavelength Spectral Modeling and Jet Power	15
	References	17
3	Launching of Active Galactic Nuclei Jets	45
	Alexander Tchekhovskoy	
3.1	Introduction	45
3.2	Physical Description of Highly Magnetized Plasmas	47
3.3	Extraction of BH Rotational Energy via Magnetic Field	48
3.4	BH Spindown Power	51
3.5	When Are Jets Launched by Accreting Black Holes?	52
3.6	What Sets Jet Power of Accreting Black Holes?	56
3.7	Correlation of Jet Power and BH Spin for Stellar-Mass BHs	69
3.8	Microquasars as “Quasars for the Impatient”	71
3.9	MADs in Radio-Loud AGN	73
3.10	MADs in Tidal Disruption Events and Gamma-Ray Bursts	75
	Discussion and Conclusions	78
	References	80
4	Kiloparsec-Scale AGN Jets	83
	Martin Hardcastle	
4.1	Historical Background	83
4.2	Physics of Emission Processes	84
4.2.1	Synchrotron Emission	84
4.2.2	Inverse-Compton Emission	88
4.2.3	Thermal Bremsstrahlung	89
4.3	Observations of Jets and Lobes	90
4.3.1	Total-Intensity Radio Emission	90
4.3.2	Polarization in the Radio	92
4.3.3	Non-thermal Emission at Other Wavelengths	94
4.4	Hosts, Environments and Environmental Interactions	96
4.5	Jet Dynamics and Particle Acceleration	97
4.6	Magnetic Fields and Particle Content	99
4.7	Lobe Dynamics	102
4.8	Numerical Modelling	104
	References	107
5	Parsec-Scale Jets in Active Galactic Nuclei	117
	Denise C. Gabuzda	
5.1	Introduction	117
5.2	Relativistic Effects Influencing the Observations	118
5.2.1	Aberration and Relativistic Beaming	118
5.2.2	Superluminal Motions	120
5.2.3	Measured Variation Timescales and the Doppler Factor	121

5.3	Theory of Radio Synchrotron Emission: Potential Observational Manifestations	121
5.3.1	Optical Depth	122
5.3.2	Linear Polarization	123
5.3.3	Circular Polarization	124
5.4	Standard Jet Theory: An Observer's View	124
5.4.1	Blandford–Königl Jets: The Nature of the VLBI Core	124
5.4.2	Shocks	126
5.4.3	Faraday Rotation	126
5.4.4	Faraday Depolarization	127
5.4.5	Faraday Conversion	128
5.5	What is Actually Observed?	128
5.5.1	Intensity Structures and Kinematics	128
5.5.2	Magnetic-Field Structures	130
5.5.3	Core Polarization	132
5.5.4	Core Shifts and Core Magnetic Fields	133
5.5.5	Circular Polarization	134
5.5.6	Parsec-Scale Faraday Rotation Measurements.....	136
5.5.7	Helical Jet Magnetic Fields: Basis for a New Paradigm?	141
	References	144
6	Black Hole Magnetospheres	149
