

Contents

1	Green Chemistry and Associated Metrics	1
1.1	Green Chemistry	1
1.1.1	The Twelve Principles of Green Chemistry	2
1.1.2	Synthetic Efficiency and Overall Process Quality	4
1.2	Some Award-Winning Green Processes	5
1.2.1	The Presidential Green Chemistry Challenge Awards	5
1.2.2	BHC Ibuprofen Synthesis: A Perspective on Intrinsic Efficiency	6
1.2.3	Merck's Synthesis of Januvia: Highlights and Global Efficiency	8
1.2.4	Pfizer's Sertraline Process: A Perspective on Overall Process Quality	10
1.3	Green Metrics: Overview and the Path Forward	12
	References	13
2	Atom Economy and Reaction Mass Efficiency	17
2.1	Atom Economy	17
2.1.1	Development and Motivation	17
2.1.2	Definition and Key Assumptions	18
2.1.3	Reaction Types: The Good, the Bad and the Ugly	20
2.1.4	Catalysis, Industry and Innovation	23
2.1.5	100 % Atom Economy: Above and Beyond	29
2.2	Reaction Mass Efficiency (RME)	30
2.2.1	History and Development	30
2.2.2	Applying RME to Catalysis	34
2.2.3	Future Directions	40
	References	40
3	The E Factor and Process Mass Intensity	45
3.1	The E Factor	45
3.1.1	History and Development	45

3.1.2	Intrinsic and Global E Factors	46
3.1.3	Perspective on Waste in Academia and Industry	49
3.1.4	The Solution: Catalysis	51
3.1.5	Perspectives on Waste in Alternative Reaction Media	56
3.1.6	Beyond the E Factor: Innovative Synthetic Methods	58
3.2	Process Mass Intensity (PMI)	58
3.2.1	History and Motivation	58
3.2.2	Process Mass Intensity in Relation to Other Metrics	59
3.2.3	Biocatalysis and the Synthesis of Singulair	60
3.2.4	Future Trends and the Changing Industrial Landscape	61
	References	62
4	Selected Qualitative Green Metrics	69
4.1	The EcoScale	69
4.1.1	The Penalty System: Virtues and Drawbacks	70
4.1.2	Application in Education and Academia	72
4.1.3	The Modified Ecoscale: An Industrial Metric?	74
4.2	Other Qualitative Metrics	75
4.2.1	Environmental Assessment Tool for Organic Syntheses	75
4.2.2	The Andraos Algorithm: Advancing Radial Polygons	76
4.2.3	Future Directions: What Does “Global” Really Mean?	77
	References	78
5	An Introduction to Life Cycle Assessment	81
5.1	History and the Journey Toward Standardization	81
5.2	Life Cycle Assessment (LCA)	82
5.2.1	The Nuts and Bolts	82
5.2.2	The Green Chemistry Connection	85
5.2.3	Virtues and Limitations	85
5.3	Industrial Application: Revisiting the Synthesis of 7-Aminocephalosporanic Acid	86
5.4	Future Directions: A Novel Approach to Teaching LCA and Green Metrics	87
	References	88

Green Chemistry Metrics

A Guide to Determining and Evaluating Process
Greenness

Dicks, A.; Hent, A.

2015, VIII, 90 p. 59 illus., Softcover

ISBN: 978-3-319-10499-7
