Part I Experimental Techniques

1	Friction Force Microscopy	3
	Roland Bennewitz	
1.1	Introduction	3
1.2	Instrumentation	4
1.2.1	Force Sensors	4
1.2.2	Control Over the Contact	7
1.3	Measurement Procedures	9
1.3.1	Friction as a Function of Load	9
1.3.2	Friction as a Function of Material	11
1.3.3	Friction Effects in Normal Force Measurements	11
1.3.4	Fluctuations in Friction Force Microscopy	11
1.3.5	Friction as a Function of Temperature	12
1.3.6	Dynamic Lateral Force Measurements	12
1.4	Outlook	14
	References	14
2	Surface Forces Apparatus in Nanotribology	17
	Carlos Drummond and Philippe Richetti	
2.1	Introduction	17
2.2	Surface Forces Apparatus Technique: Generalities	18
2.3	Surface Forces Apparatus Nanotribometer	20
2.3.1	Experimental Setup	21
2.3.2	Local Structural Information: Combination of the SFA with Other Techniques	25
2.3.3	Beyond Mica: Alternative Substrates	27
2.4	Case Study: Weakly Adhesive Surfaces Under Shear	29
	References	32

3	Nanoscale Friction and Ultrasonics	35
	Maria Teresa Cuberes	
3.1	Introduction	35
3.2	Normal Ultrasonic Vibration at Nanocontacts	37
3.3	Shear Ultrasonic Vibration at Nanocontacts	43
3.4	Reduction of Friction by Ultrasonic Vibration	44
3.5	Adhesion Hysteresis at Ultrasonic Frequencies	48
	References.	53
4	Triboluminescence	57
	Roman Nevshupa and Kenichi Hiratsuka	
4.1	Introduction and Brief Historical Survey	57
4.2	Basic Processes and Activation Mechanisms	59
4.3	Experimental Techniques for Studying Triboluminescence	62
4.4	Characteristics of the TL	65
4.4.1	Spatial Distribution of the TL at a Tribological Contact	65
4.4.2	Effect of the Ambient Gas and the Material of the Counterbodies on Spectral Characteristics and Intensity Distribution of the TL	67
4.4.3	Effect of Friction Type and Humidity on the TL and Triboelectrification of Polymers.	70
4.4.4	Behaviour of the TL on Different Time Scales	72
4.5	Modelling Approach	73
	References.	75
5	The Quartz Crystal Microbalance as a Nanotribology Technique	79
	Lorenzo Bruschi and Giampaolo Mistura	
5.1	Introduction	79
5.2	The Acoustics of Quartz Crystal	80
5.3	QCM Driving Circuits.	83
5.4	Quality of the Surface Electrodes	86
5.5	UHV Apparatus	88
	References.	90

Part II Atomic-Scale Friction

6	Atomic-Scale Friction Measurements in Ultra-High Vacuum.	95
	Sabine Maier, Enrico Gnecco and Ernst Meyer	
6.1	Introduction	95
6.2	The Prandtl-Tomlinson Model	97

6.2.1	One-dimensional Prandtl-Tomlinson Model	97
6.2.2	Extensions of the Prandtl-Tomlinson Model	100
6.3	Experimental Observations of Atomic Stick-slip	101
6.3.1	Load Dependence: From Smooth Sliding and Stick-slip to Wear	102
6.3.2	The Slip	104
6.3.3	Thermal Effects and Velocity Dependence	104
6.3.4	Maximal Lateral Force	106
6.3.5	Multiple Slips.	106
6.4	Atomic-Scale Friction Beyond Flat Terraces	107
6.4.1	Atomic-Scale Friction at Step Edges	107
6.4.2	Atomic-Scale Friction on Ordered Superstructures and Reconstructions	108
6.5	Anisotropy Effects	109
6.6	Mechanical Properties of Molecular Chains	110
6.7	Conclusions	112
	References.	112
7	Stochastic Modeling and Rate Theory of Atomic Friction	115
	Mykhaylo Evstigneev, Juan J. Mazo and Peter Reimann	
7.1	Introduction	115
7.2	Langevin Modeling	117
7.2.1	Langevin Equation	117
7.2.2	Parameter Values	120
7.2.3	Regimes of Motion	121
7.2.4	Some Generalizations of the Standard PT Model	123
7.2.5	Friction Force-velocity Relations.	124
7.3	Rate Theory	126
7.3.1	Rate Equation.	126
7.3.2	Validity Conditions	128
7.3.3	Parameterization	128
7.3.4	Types of the Stick-slip Motion	130
7.3.5	Force-velocity Relations	131
7.3.6	Force Probability Distribution.	133
7.4	Concluding Remarks	134
	References.	135
8	Experimental Observations of Superlubricity and Thermolubricity	139
	Martin Dienwiebel and Joost W.M. Frenken	
8.1	Introduction	139
8.1.1	The Transition to Frictionless Sliding in the One-Dimensional Case	140

8.1.2	Superlubricity	141
8.1.3	In Search for Superlubricity	141
8.2	Atomic-Scale Observation of Superlubricity	142
8.2.1	Commensurability-Dependent Superlubricity Between Finite Graphite Surfaces	142
8.2.2	The Role of the Normal Force	147
8.3	The Role of Temperature	149
8.3.1	Weak Thermal Effects	149
8.3.2	Strong Thermal Effects: Thermolubricity	150
8.4	Other Manifestations of Superlubricity and Thermolubricity	152
8.4.1	Lubrication by Graphite and Other Lamellar Solids	152
8.4.2	Lubrication by Diamond-Like Carbon and Related Coatings	153
8.4.3	Lubrication by Fullerenes and Carbon Nanotubes	153
8.5	Concluding Remarks	154
	References	155
9	Friction and Wear of Mineral Surfaces in Liquid Environments	157
	Carlos M. Pina, Carlos Pimentel and E. Gnecco	
9.1	Introduction	157
9.2	Structural Studies of Mineral Surfaces Using Lateral Force Microscopy	159
9.3	Obtaining Chemical Information of Surfaces from Frictional Forces	162
9.4	Wear and Nanomanipulation of Mineral Surfaces and Overgrowths	164
9.5	Organic Molecules on Mineral Surfaces	168
9.6	Conclusions and Outlook	171
	References	172
10	Nanotribology: Nonlinear Mechanisms of Friction	175
	N. Manini, Oleg M. Braun and A. Vanossi	
10.1	Introduction	175
10.2	The Prandtl-Tomlinson Model	177
10.3	The Frenkel-Kontorova Model	181
10.3.1	Extensions of the Frenkel-Kontorova Model	187
10.4	Molecular Dynamics Simulations	191
10.4.1	Thermostats and Joule Heat	193
10.4.2	Size- and Time-scale Issues	193
10.4.3	Multiscale Models	195
10.4.4	Selected Results of MD Simulations	195

10.5	Earthquake-Like Models	198
10.6	Conclusions	201
	References.	203

Part IV Nanomanipulation

16 Mechanical Properties of Metallic Nanocontacts	333
Gabino Rubio-Bollinger, Juan J. Riquelme, Sebastian Vieira and Nicolas Agraït	
16.1 Introduction	334
16.2 Experimental Tools	335
16.2.1 The Scanning Tunneling Microscope Supplemented with a Force Sensor	337
16.2.2 The Mechanically Controllable Break-Junction Technique	338
16.3 Electron Transport Through Metallic Nanocontacts	340
16.4 Mechanical Properties of Metallic Nanocontacts	342
16.4.1 Fabrication of Metallic Nanocontacts	342
16.4.2 Elasticity and Fracture of Metallic Nanocontacts	344
16.4.3 The Shape of Metallic Nanocontacts	345
16.4.4 Inelastic Scattering by Phonons in Nanocontacts	347
16.5 Suspended Chains of Single Gold Atoms	348
16.5.1 Fabrication of Chains of Atoms Using Local Probes	348
16.5.2 Mechanical Processes During Formation of Atomic Chains	350
16.5.3 Phonons in Atomic Chains	353
16.6 Metallic Adhesion in Atomic-Sized Tunneling Junctions	357
References	359

22	Nanoscale Friction of Self-assembled Monolayers	489
	Karine Mougín and Haidara Hamidou	
22.1	Homogeneous Organic Molecular Films	490
22.1.1	Influence of Chain Length and Structure	493

22.1.2	Influence of Terminal Group	495
22.1.3	Effect of Humidity and Temperature	496
22.1.4	Influence of Sliding Velocity	498
22.1.5	Conclusion.	499
22.2	Molecular Heterogeneous Thin Films	500
22.2.1	Influence of Topology	500
22.2.2	Influence of Sliding Velocity	509
22.3	Wear of SAMs	511
22.4	Conclusion.	512
	References.	513

Part VI Nanowear

23	From Nano and Microcontacts to Wear of Materials	517
	Rogério Colaço	
23.1	Introduction	517
23.2	The Nature of Solid Surfaces	519
23.2.1	Surface Constitution	519
23.2.2	Surface Topography	520
23.2.3	Topographic Mechanisms of Wear	522
23.3	Wear Theories	524
23.3.1	Classical Wear Theories.	524
23.3.2	Atomic Wear Theories.	527
23.4	Wear Experiments at Submicrometric Scales Using the AFM	530
23.5	Indentation Size Effect	535
23.6	Conclusions	538
	References.	539
24	Nanowear of Polymers	545
	Mario D'Acunto, Franco Dinelli and Pasqualantonio Pingue	
24.1	Introduction	546
24.2	Wear Tests at the Nanoscale in Polymer Films to Assess Material Properties	553
24.2.1	Schallamach Waves and Ripples.	554
24.2.2	Multiple Line Scratch Test.	555
24.2.3	Amorphousness and Crystallinity	557
24.2.4	Plasma Treatment	559
24.2.5	Presence of Solvent.	560
24.2.6	Temperature Dependence.	561
24.2.7	Composites	562
24.2.8	Boundary Conditions.	566

24.3	Exploiting the Nanowear of Polymers for Lithographic Applications.	567
24.4	Characterization of Meso- and Nanoscale Wear of Polymers in Biomedical Applications	579
24.4.1	Role of Wear Rates for Biodegradable Polymers.	580
24.4.2	Severe Wear Regime in Biomaterials: Wear of UHMWPE Used in Prostheses	581
24.5	Conclusive Remarks and Future Perspectives	583
	References.	584

Part VII Dissipation Mechanisms at Finite Separations

25	Casimir Force and Frictional Drag Between Graphene Sheets . . .	591
	Aleksandr I. Volokitin and Bo Persson	
25.1	Introduction	591
25.2	Fluctuations Produce Forces	593
25.3	Reflection Produces Friction.	600
25.4	Using Graphene to Detect Quantum Friction	601
25.5	Conclusion.	605
	References.	606
26	Dissipation at Large Separations	609
	Marcin Kisiel, Markus Langer, Urs Gysin, Simon Rast, E. Meyer and Dong-Weon Lee	
26.1	Introduction	610
26.2	Internal Friction of the Cantilever	613
26.2.1	Thermo-elastic Damping	614
26.2.2	Bulk and Surface Losses	615
26.3	Dissipation at Large Separations	616
26.3.1	Dissipation due to Electromagnetic Interaction	617
26.3.2	Suppression of Electronic Friction in the Superconducting State	619
26.3.3	The Noncontact Friction due to Phase Slips of the Charge Density Wave (CDW) in NbSe ₂ Sample.	622
26.4	Summary and Conclusions.	626
	References.	626

Part VIII Applications

27	Nanotribology of MEMS/NEMS	631
	Satish Achanta and Jean-Pierre Celis	
27.1	MEMS/NEMS Devices, Applications, and Their Reliability Issues	632

27.2	Tribological Problems in MEMS/NEMS	634
27.3	Tribological Evaluation of Materials for MEMS/NEMS	636
27.3.1	Background on Adhesion, Friction and Wear at Nano-/Micro- Scales	636
27.3.2	Techniques for Tribological Characterization of Materials	637
27.3.3	Tribological Evaluation of Materials	638
27.4	Prospective Materials.	648
27.5	Conclusions	652
	References.	652
