

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Active Galactic Nuclei	1
1.1.1	Formation and Stability of Jets	3
1.1.2	Emission	3
1.2	The Blazar CTA 102	5
1.2.1	Characteristics	5
1.2.2	Observational History	5
1.2.3	CTA 102 Flux Density Monitoring	5
1.2.4	CTA 102 Radio Structure from Kiloparsec to Parsec Scales	6
1.2.5	Multi-frequency VLBI Observations	9
	References	9
<b>2</b>	<b>Theory</b>	<b>11</b>
2.1	Relativistic Hydrodynamics	11
2.1.1	Pressure-Matched Jets	12
2.1.2	Over-Pressured Jets	14
2.1.3	Kelvin-Helmholtz (K-H) Instability	17
2.2	Synchrotron Radiation	18
2.2.1	Magnetic Field, $B$ , and Particle Density, $K$	20
2.2.2	Opacity Variations	25
2.2.3	Shock-In-Jet Model	27
2.3	Superluminal Motion and the Relativistic Beam of Radiation	34
	References	35
<b>3</b>	<b>Light Curve Analysis</b>	<b>37</b>
3.1	Time Sampling and Interpolation	38
3.2	Spectral Analysis	39
3.3	Error Analysis of the Spectra	40
3.4	Results	40

3.5	Modeling the 2006 Radio Flare . . . . .	44
3.5.1	Fitting Technique . . . . .	44
3.5.2	Spectral Evolution Before 2006.0 . . . . .	47
3.5.3	Spectral Evolution Between 2006.0 and 2006.3. . . . .	47
3.5.4	Spectral Evolution After 2006.3 . . . . .	48
3.5.5	Final Model and Error Analysis . . . . .	48
3.6	Modeled Spectra and Light Curves . . . . .	48
3.6.1	Rejected Solutions. . . . .	50
3.7	Discussion . . . . .	53
3.7.1	The Expansion Region. . . . .	55
3.7.2	The Collimation Region. . . . .	55
3.7.3	The Re-expansion Region. . . . .	56
3.7.4	Spectral Slopes and Optically Thin Spectral Indices. . . . .	56
3.7.5	The Influence of the Interpolation and the Quiescent Spectrum . . . . .	57
3.7.6	Adiabatic Versus Non-adiabatic Shock. . . . .	57
3.8	Summary . . . . .	57
	References . . . . .	58
<b>4</b>	<b>VLBI Kinematic Analysis . . . . .</b>	<b>59</b>
4.1	VLBA Observations and Data Analysis . . . . .	59
4.1.1	Multi-frequency VLBA Observations. . . . .	59
4.1.2	Additional 15 and 43 GHz VLBA Observations from Survey Programs . . . . .	60
4.1.3	Data Reduction . . . . .	60
4.1.4	Model Fitting . . . . .	63
4.2	Results . . . . .	63
4.2.1	Cross-Frequency Component Identification. . . . .	64
4.2.2	Calculation of Kinematic Parameters . . . . .	64
4.2.3	Jet Region A . . . . .	67
4.2.4	Jet Region B. . . . .	67
4.2.5	Jet Region D . . . . .	70
4.2.6	Jet Region C. . . . .	73
4.2.7	Summary of Cross-Identification . . . . .	75
4.2.8	Variation of the Apparent Speed and Doppler Factor . . . . .	76
4.2.9	Variation of the Brightness Temperature, $T_b$ . . . . .	79
4.3	Discussion . . . . .	83
4.3.1	The Physical Parameters Along the Jet. . . . .	83
4.3.2	Helical Versus Over-Pressured Jet . . . . .	85
4.3.3	The Connection to the 2006 Radio Flare . . . . .	86
4.4	Summary . . . . .	88
	References . . . . .	90

<b>5</b>	<b>Core-Shift and Spectral Analysis.</b>	91
5.1	Data Analysis	91
5.1.1	Image Alignment.	92
5.1.2	Spectral Analysis.	97
5.2	Core-Shift Analysis	98
5.3	Transversal Jet Structure and Jet Ridge Line	104
5.4	Spectral Analysis	107
5.4.1	Region C ( $r < 1\text{ mas}$ )	108
5.4.2	Region D ( $1\text{ mas} < r < 4\text{ mas}$ )	110
5.4.3	Region B ( $4\text{ mas} < r < 10\text{ mas}$ )	113
5.4.4	Region A ( $8\text{ mas} < r < 20\text{ mas}$ )	113
5.5	Spatial and Temporal Evolution of Physical Parameters	114
5.5.1	Position of the Jet Nozzle.	114
5.5.2	Core Region in May 2005	116
5.5.3	Region D	118
5.6	Discussion	123
5.6.1	Region C (core)	123
5.6.2	Region D	124
5.6.3	Regions B and A2.	125
5.7	Summary	125
	References	126
<b>6</b>	<b>eRHD Simulations</b>	127
6.1	Setup of the Simulations.	127
6.2	On the Formation of Recollimation Shocks	128
6.2.1	Recollimation Shocks in a Homogeneous Ambient Medium	130
6.2.2	Recollimation Shocks in a Decreasing Pressure Ambient Medium	133
6.3	Recollimation Shock—Travelling Shock Interaction	139
6.4	Application to the Blazar CTA 102	143
6.4.1	RHD Simulations	143
6.4.2	Non-thermal Emission	147
6.4.3	The Influence of the Cooling Mechanism on the Non-thermal Emission	153
6.4.4	The Influence of $\epsilon_b$ , $\epsilon_e$ , and, $\epsilon_a$ on the Non-thermal Emission	154
6.4.5	Single-Dish Spectra and Radio Maps for CTA 102	155
6.4.6	Emission Calculation for Shock–Shock Interaction	158
6.5	Comparison with Observations	162
6.6	Summary	164
	References	165

<b>7 The Jet in CTA 102: A Global Perspective . . . . .</b>	<b>167</b>
7.1 Observations . . . . .	167
7.2 Simulations . . . . .	168
References . . . . .	169
<b>Appendix A: Model Fit Results . . . . .</b>	<b>171</b>
<b>Appendix B: The Influence of the UV-Range on the Spectral Parameters . . . . .</b>	<b>195</b>
<b>Appendix C: Spectral Parameter Maps . . . . .</b>	<b>201</b>
<b>Appendix D: Error Estimates for the Spectral Parameters . . . . .</b>	<b>207</b>

Spectral Evolution in Blazars

The Case of CTA 102

Fromm, C.

2015, XVI, 210 p. 127 illus., 112 illus. in color.,

Hardcover
