

Contents

Part I Evolution and Detection of Endogenous ADP-Ribosylation

The Natural History of ADP-Ribosyltransferases and the ADP-Ribosylation System	3
L. Aravind, Dapeng Zhang, Robson F. de Souza, Swadha Anand and Lakshminarayan M. Iyer	
Identification and Analysis of ADP-Ribosylated Proteins	33
Friedrich Haag and Friedrich Buck	

Part II ADP-Ribosylation by ARTCs (R-S-E ARTs)

<i>Photorhabdus luminescens</i> Toxins TccC3 and TccC5: Insecticidal ADP-Ribosyltransferases that Modify Threonine and Glutamine	53
Klaus Aktories, Gudula Schmidt and Alexander E. Lang	
Reaction Mechanism of Mono-ADP-Ribosyltransferase Based on Structures of the Complex of Enzyme and Substrate Protein	69
Hideaki Tsuge and Toshiharu Tsurumura	
Regulation of Nitrogenase by Reversible Mono-ADP-Ribosylation	89
Vivian R. Moure, Flavia F. Costa, Leonardo M. Cruz, Fabio O. Pedrosa, Emanuel M. Souza, Xiao-Dan Li, Fritz Winkler and Luciano F. Huergo	
ADP-Ribosylation of P2X7: A Matter of Life and Death for Regulatory T Cells and Natural Killer T Cells.	107
Björn Rissiek, Friedrich Haag, Olivier Boyer, Friedrich Koch-Nolte and Sahil Adriouch	

Pierisins and CARP-1: ADP-Ribosylation of DNA by ARTCs in Butterflies and Shellfish	127
Tsuyoshi Nakano, Azusa Takahashi-Nakaguchi, Masafumi Yamamoto and Masahiko Watanabe	
 Part III ADP-Ribosylation by ARTDs (H-Y-E ARTs)	
Comparative Structural Analysis of the Putative Mono-ADP-Ribosyltransferases of the ARTD/PARP Family	153
Ana Filipa Pinto and Herwig Schöler	
Function and Regulation of the Mono-ADP-Ribosyltransferase ARTD10	167
Max Kaufmann, Karla L. H. Feijs and Bernhard Lüscher	
Regulation of Nucleocytoplasmic Transport by ADP-Ribosylation: The Emerging Role of Karyopherin-β1 Mono-ADP-Ribosylation by ARTD15.	189
Maria Di Girolamo	
Index	211
