

Contents

1	Hybrid Systems and Verification by Abstraction	1
	Maria Domenica Di Benedetto, Stefano Di Gennaro and Alessandro D’Innocenzo	
2	Observer Design for Discrete-Time Switching Nonlinear Models	27
	Zsófia Lendek, Paula Raica, Jimmy Lauber and Thierry Marie Guerra	
3	Realization Theory of Linear Hybrid Systems	59
	Mihaly Petreczky	
4	Nonlinear Observer for Autonomous Switching Systems with Jumps	103
	Mohamed Djemai, Nouredine Manamanni and Jean Pierre Barbot	
5	On the Observation Analysis and Observer Design for a Class of Hybrid Continuous-Discrete Dynamic System	129
	Nouredine Manamanni, Mohamed Djemai and Jean Pierre Barbot	
6	State Estimation on Switching Systems via High-Order Sliding Modes.	151
	Hector Rios, Jorge Davila and Leonid Fridman	
7	Observer Design for Switched Linear Systems with State Jumps	179
	Aneel Tanwani, Hyungbo Shim and Daniel Liberzon	
8	Observability of Switched Linear Systems	205
	Mihaly Petreczky, Aneel Tanwani and Stephan Trenn	

9 Sampled-Data Control of Switched Affine Systems 241
Laurentiu Hetel and Emilia Fridman

**10 Continuous–Discrete-Time Observers for a Class of Uniformly
 Observable Systems 261**
Mondher Farza, Mohammed M’Saad and Krishna Busawon

**11 Self-Triggered Robust Control of Nonlinear
 Stochastic Systems 277**
Woihida Aggoune, Bernardino Castillo Toledo
and Stefano Di Gennaro

**12 Multicellular Converter: A Benchmark for Control
 and Observation for Hybrid Dynamical Systems 293**
Michael Defoort, Jeremy Van Gorp and Mohamed Djemai

**13 Application of Hybrid Dynamical Theory to the Cardiovascular
 System 315**
Taous Meriem Laleg-Kirati, Zehor Belkhatir
and Fernando Diaz Ledezma

Index 329

Hybrid Dynamical Systems

Observation and Control

Djemai, M.; Defoort, M. (Eds.)

2015, XVII, 332 p. 74 illus., 30 illus. in color., Softcover

ISBN: 978-3-319-10794-3
