

Contents

| | | |
|----------|--|-----------|
| 1 | Fundamental Physics with Black Holes | 1 |
| | Xavier Calmet | |
| 1.1 | Introduction | 1 |
| 1.2 | Quantum Black Holes | 4 |
| 1.3 | Low Scale Quantum Gravity and Black Holes at Colliders | 5 |
| 1.4 | An Effective Theory for Quantum Gravity | 11 |
| 1.5 | Quantum Black Holes in Loops | 13 |
| 1.6 | Quantum Black Holes and the Unification of General Relativity and Quantum Mechanics | 16 |
| 1.7 | Quantum Black Holes, Causality and Locality | 20 |
| 1.8 | Conclusions | 23 |
| | References | 24 |
| 2 | Black Holes and Thermodynamics: The First Half Century | 27 |
| | Daniel Grumiller, Robert McNees and Jakob Salzer | |
| 2.1 | Introduction and Prehistory | 27 |
| 2.2 | 1963–1973 | 29 |
| 2.3 | 1973–1983 | 33 |
| 2.4 | 1983–1993 | 39 |
| 2.5 | 1993–2003 | 45 |
| 2.6 | 2003–2013 | 50 |
| 2.7 | Conclusions and Future | 56 |
| | References | 57 |
| 3 | The Firewall Phenomenon | 71 |
| | R.B. Mann | |
| 3.1 | Introduction | 71 |
| 3.2 | Black Holes | 72 |
| 3.2.1 | Gravitational Collapse | 75 |
| 3.2.2 | Anti de Sitter Black Holes | 77 |
| 3.3 | Black Hole Thermodynamics | 78 |

| | | |
|----------|---|------------|
| 3.4 | Black Hole Radiation | 80 |
| 3.4.1 | Quantum Field Theory in Curved Spacetime | 80 |
| 3.4.2 | Pair Creation | 83 |
| 3.5 | The Information Paradox | 88 |
| 3.5.1 | Implications of the Information Paradox | 94 |
| 3.5.2 | Complementarity | 95 |
| 3.6 | Firewalls | 98 |
| 3.6.1 | The Firewall Argument | 98 |
| 3.6.2 | Responses to the Firewall Argument | 100 |
| 3.7 | Summary | 107 |
| | References | 108 |
| 4 | Monsters, Black Holes and Entropy | 115 |
| | Stephen D.H. Hsu | |
| 4.1 | Introduction | 115 |
| 4.2 | What is Entropy? | 116 |
| 4.3 | Constructing Monsters | 117 |
| 4.3.1 | Monsters | 118 |
| 4.3.2 | Kruskal–FRW Gluing | 120 |
| 4.4 | Evolution and Singularities | 123 |
| 4.5 | Quantum Foundations of Statistical Mechanics | 124 |
| 4.6 | Statistical Mechanics of Gravity? | 126 |
| 4.7 | Conclusions | 127 |
| | References | 128 |
| 5 | Primordial Black Holes: Sirens of the Early Universe | 129 |
| | Anne M. Green | |
| 5.1 | Introduction | 129 |
| 5.2 | PBH Formation Mechanisms | 130 |
| 5.2.1 | Large Density Fluctuations | 130 |
| 5.2.2 | Cosmic String Loops | 132 |
| 5.2.3 | Bubble Collisions | 132 |
| 5.3 | PBH Abundance Constraints | 133 |
| 5.3.1 | Evaporation | 133 |
| 5.3.2 | Lensing | 135 |
| 5.3.3 | Dynamical Effects | 136 |
| 5.3.4 | Other Astrophysical Objects and Processes | 137 |
| 5.4 | Constraints on the Primordial Power Spectrum and Inflation | 138 |
| 5.4.1 | Translating Limits on the PBH Abundance into Constraints on the Primordial Power Spectrum. | 139 |
| 5.4.2 | Constraints on Inflation Models | 141 |
| 5.5 | PBHs as Dark Matter | 142 |
| 5.6 | Summary | 143 |
| | References | 144 |

| | | |

| 6 | Self-gravitating Bose-Einstein Condensates | 151 |
| | Pierre-Henri Chavanis | |
| 6.1 | Introduction | 152 |
| 6.2 | Self-gravitating Bose-Einstein Condensates | 155 |
| 6.2.1 | The Gross-Pitaevskii-Poisson System | 155 |
| 6.2.2 | Madelung Transformation | 156 |
| 6.2.3 | Time-Independent GP Equation | 158 |
| 6.2.4 | Hydrostatic Equilibrium | 158 |
| 6.2.5 | The Non-interacting Case | 159 |
| 6.2.6 | The Thomas-Fermi Approximation | 160 |
| 6.2.7 | Validity of the Thomas-Fermi Approximation | 161 |
| 6.2.8 | The Total Energy | 162 |
| 6.2.9 | The Virial Theorem | 163 |
| 6.3 | The Gaussian Ansatz | 163 |
| 6.3.1 | The Total Energy | 164 |
| 6.3.2 | The Mass-Radius Relation | 164 |
| 6.3.3 | The Virial Theorem | 169 |
| 6.3.4 | The Pulsation Equation | 169 |
| 6.4 | Application of Newtonian Self-gravitating BECs to Dark Matter Halos | 170 |
| 6.4.1 | The Non-interacting Case | 170 |
| 6.4.2 | The Thomas-Fermi Approximation | 170 |
| 6.4.3 | Validity of the Thomas-Fermi Approximation | 172 |
| 6.4.4 | The Case of Attractive Self-interactions | 172 |
| 6.5 | Application of General Relativistic BECs to Neutron Stars, Dark Matter Stars, and Black Holes | 173 |
| 6.5.1 | Non-interacting Boson Stars | 174 |
| 6.5.2 | The Thomas-Fermi Approximation for Boson Stars | 175 |
| 6.5.3 | Validity of the Thomas-Fermi Approximation | 177 |
| 6.5.4 | An Interpolation Formula Between the Non-interacting Case and the TF Approximation | 177 |
| 6.5.5 | Application to Supermassive Black Holes | 178 |
| 6.5.6 | Application to Neutron Stars and Dark Matter Stars | 179 |
| 6.5.7 | Are Microscopic Quantum Black Holes Bose-Einstein Condensates of Gravitons? | 180 |
| 6.6 | Conclusion | 182 |
| 6.7 | Self-interaction Constant | 185 |
| 6.8 | Conservation of Energy | 185 |
| 6.9 | Virial Theorem | 186 |
| 6.10 | Stress Tensor | 187 |
| 6.11 | Lagrangian and Hamiltonian | 189 |
| | References | 191 |

Quantum Aspects of Black Holes

Calmet, X. (Ed.)

2015, XI, 322 p. 57 illus., 23 illus. in color., Hardcover

ISBN: 978-3-319-10851-3
