

Contents

1	Semiconducting Materials	1
	Aracely Hernández-Ramírez and Iliana Medina-Ramírez	
2	New Visible-Light Active Semiconductors	41
	Roberto Candal and Azael Martínez-de la Cruz	
3	Synthesis Methods for Photocatalytic Materials	69
	Iliana Medina-Ramírez, Aracely Hernández-Ramírez, and M. Lourdes Maya-Treviño	
4	Physicochemical Characterization of Photocatalytic Materials	103
	Montserrat Bizarro and Sandra E. Rodil	
5	Electrochemical Characterization of Photocatalytic Materials	155
	Erika Bustos, Juan Manríquez, Juan Manuel Peralta-Hernández, and Edgar J. Ruiz-Ruiz	
6	Semiconductor Materials for Photocatalytic Oxidation of Organic Pollutants in Wastewater	187
	Laura Hinojosa-Reyes, Jorge Luis Guzmán-Mar, and Minerva Villanueva-Rodríguez	
7	Application of Semiconductor Photocatalytic Materials for the Removal of Inorganic Compounds from Wastewater	229
	Jorge Luis Guzmán-Mar, Minerva Villanueva-Rodríguez, and Laura Hinojosa-Reyes	

8 Photocatalytic Materials in Water Disinfection	255
Erick R. Bandala and Erika Bustos	
9 Future and Perspectives for Photocatalytic Materials in Environmental Photocatalysis	279
Aracely Hernández-Ramírez and Iliana Medina-Ramírez	
Index	287

Photocatalytic Semiconductors

Synthesis, Characterization, and Environmental
Applications

Hernández-Ramírez, A.; Medina-Ramírez, I. (Eds.)

2015, XII, 289 p. 117 illus., 44 illus. in color., Hardcover

ISBN: 978-3-319-10998-5
