Part I The Natural Environment and Biogeography of the Olympic Peninsula, Washington

1	The Modern Landscape of the Olympic Peninsula	3
1.1	Geography of the Olympic Peninsula and Olympic National Park	3
1.2	Regional Climate on the Olympic Peninsula	7
1.3	Indicators of Recent Climate Change on the Olympic Peninsula	8
1.4	Vegetation Zones of the Olympic Peninsula and Climate	
	Controls on Forest Vegetation	13
1.4.1	Sitka Spruce Zone	16
1.4.2	Western Hemlock Zone	20
1.4.3	Pacific Silver Fir Zone	22
1.4.4	Mountain Hemlock Zone	23
1.4.5	Subalpine Fir Zone	23
1.4.6	Douglas-fir Zone	24
1.4.7	Subalpine Parkland Zone	25
1.5	Natural Disturbance Regimes of the Olympic Peninsula	25
1.5.1	Fire	25
1.5.2	Wind	31
1.5.3	Other Disturbance Agents	32
2	Geology and Historical Biogeography of the Olympic Peninsula	37
2.1	Late Cenozoic Geologic and Climatic History	37
2.2	Endemism, Disjunction, and the Insular Nature of the Olympic Biota	40

Part II Postglacial Paleoclimate and Environmental Change on the Olympic Peninsula, Washington

3	Postglacial Climate on the Olympic Peninsula	51
3.1	Forcing Factors in the Climate System	51
3.2	The Late Pleistocene and the Last Glacial Maximum: >60–19 ka	53
3.3	The Late-Glacial: 19–11.6 ka	56

3.4	The Early Holocene: 11.6–6 ka.....	57
3.5	The Middle-to-Late Holocene: 6 ka to Present.....	59
4	Late Quaternary Vegetation and Fire History of the Olympic Peninsula.....	61
4.1	Pioneering Studies	61
4.2	The Late Pleistocene.....	62
4.3	The Late-Glacial and Holocene	66
4.4	Postglacial Vegetation and Fire at Five Sites on the Olympic Peninsula.....	68
4.4.1	Study Sites.....	68
4.4.2	Field and Laboratory Methods.....	69
4.4.3	Sediment Stratigraphy and Chronology.....	72
4.4.4	Late-Glacial: 14–11.6 ka.....	76
4.4.5	Early Holocene: 11.6–6 ka.....	84
4.4.6	Middle and Late Holocene: 6–0 ka.....	87
4.4.7	Additional Late Holocene Paleovegetation Studies.....	88
4.5	Regional Synthesis of Vegetation Changes in the Pacific Northwest.....	89
4.5.1	Species Dominant During the Late-Glacial (14–11.6 ka): Pine, Spruce, Mountain Hemlock, and Poplar	91
4.5.2	Species Dominant During the Early Holocene (11.6 to 6 ka): Douglas-fir, Oak, Alder, and Maple.....	96
4.5.3	Species Dominant During the Middle to Late Holocene (6 ka to Present): True Firs, Western Hemlock, and Western Redcedar	101
4.5.4	Alternative Approaches to Interpreting Postglacial Vegetation Change.....	105
5	Brief Review of the Archeological Record in a Context of Environmental Change	107
5.1	Introduction.....	107
5.2	The Manis Mastodon Site (Late-Glacial Period).....	107
5.3	Late Holocene Cultural Phases	109
6	Insights and Future Research Needs.....	113
	Appendix.....	119
	Literature.....	123
	Index.....	139

Late Pleistocene and Holocene Environmental Change
on the Olympic Peninsula, Washington

Gavin, D.G.; Brubaker, L.B.

2015, XII, 142 p. 52 illus., 36 illus. in color., Hardcover

ISBN: 978-3-319-11013-4
