

# Contents

<b>Hierarchical Control of Four-Leg Three-Level Grid-Connected Converter for RES . . . . .</b>	<b>1</b>
M.P. Kazmierkowski, M. Sędlak, S. Stynski and M. Malinowski	
<b>Model of Hybrid Active Power Filter in the Frequency Domain. . . . .</b>	<b>15</b>
Dawid Buła and Marian Pasko	
<b>Analysis of Resonance Phenomena in Series <i>RLC</i> Circuit with Supercapacitor. . . . .</b>	<b>27</b>
Janusz Walczak and Agnieszka Jakubowska	
<b>Study the Quality of Global Neural Model with Regard to the Local Models of Dynamic Complex System . . . . .</b>	<b>35</b>
G. Drałus	
<b>Transient Analysis of Interstitial Microwave Hyperthermia Using Multi-slot Coaxial Antenna. . . . .</b>	<b>63</b>
Piotr Gas	
<b>Impulse Responses of Generalized First Order LTV Sections. . . . .</b>	<b>73</b>
Anna Piwowar and Janusz Walczak	
<b>On Some Inequalities for Fourier Coefficients . . . . .</b>	<b>81</b>
Piotr Lorenc, Damian Słota, Marcin Szczygiał, Jacek Uryga and Roman Witula	
<b>On the Three, Five and Other Periodic Orbits of Some Polynomials . . . . .</b>	<b>91</b>
Roman Witula, Edyta Hetmaniok, Damian Słota, Tomasz Trawiński and Wojciech Kołton	

<b>Examination of Chaos Occurring in Selected Branched Kinematic Chains of Robot Manipulators . . . . .</b>	<b>109</b>
Tomasz Trawiński, Wojciech Kołton, Edyta Hetmaniok, Damian Słota and Roman Wituła	
<b>An Estimation of the Geothermal Energy Sources for Generating Electricity . . . . .</b>	<b>127</b>
Roman Szostek	
<b>Thermal Coupling Analysis of the Permanent Magnet Synchronous Generator . . . . .</b>	<b>135</b>
Lesław Gołębiowski, Marek Gołębiowski and Damian Mazur	
<b>Universal High Speed Induction Motor Driver . . . . .</b>	<b>149</b>
Tomasz Binkowski	
<b>Improvement of Immunity of Adjustable AC Drives with Induction Motors on Voltage Sags . . . . .</b>	<b>163</b>
Z. Głowacz and H. Krawiec	
<b>Investigation of End Winding Proximity Losses in a High-Speed PM Machine . . . . .</b>	<b>171</b>
Adrian Młot, Mariusz Korkosz and Marian Łukaniszyn	
<b>Modeling of the Squirrel-Cage Induction Motor Having Symmetrically Distributed Groups of Broken Cage Bars . . . . .</b>	<b>187</b>
Damian Krawczyk	
<b>Analysis of Established Thermal Conditions for Magnetorheological Clutch for Different Loading Conditions . . . . .</b>	<b>197</b>
Zbigniew Pilch	
<b>An Analytical Model of an Electrical Machine with Internal Permanent Magnets . . . . .</b>	<b>215</b>
Tomasz Drabek, Andrzej Matras and Jerzy Skwarczyński	
<b>Modeling of Repetitive Ignitions in Switching Devices: Case Studies on Vacuum Circuit Breaker and GIS Disconnecter . . . . .</b>	<b>241</b>
Marcin Szewczyk, Tomasz Kuczek, Piotr Oramus and Wojciech Piasecki	
<b>The Use of Statistical Signatures to Detect Anomalies in Computer Network . . . . .</b>	<b>251</b>
Marek Bolanowski and Andrzej Paszkiewicz	

<b>Wireless Networks Environment and Complex Networks. . . . .</b>	<b>261</b>
Franciszek Grabowski, Andrzej Paszkiewicz and Marek Bolanowski	
<b>Network Anomaly Detection Based on the Statistical Self-similarity Factor . . . . .</b>	<b>271</b>
Paweł Dymora and Mirosław Mazurek	
<b>Analysis of Static Characteristics of a Switched Reluctance Motor. . . .</b>	<b>289</b>
B. Jankowski, D. Kapelski, M. Karbowski, M. Przybylski and B. Ślusarek	
<b>Robust Integral Sliding Mode Tracking Control of a Servo Drives with Reference Trajectory Generator. . . . .</b>	<b>305</b>
Stefan Brock	
<b>Dynamic Modeling of the Skin Effect in Rotor Bars with Optimized Ladder Networks. . . . .</b>	<b>315</b>
C. Schmülling and A. Conradi	
<b>Using Balsa Environment for the Asynchronous Microprocessor Design. . . . .</b>	<b>321</b>
Dariusz Stachańczyk	
<b>Random Dynamical Systems of the First Order . . . . .</b>	<b>329</b>
J. Walczak and S. Mazurkiewicz	
<b>Analysis of the Distribution of Air Flow Rate Through Stator End Winding of Turbo Generator . . . . .</b>	<b>337</b>
K. Zhao and C. Kreischer	
<b>Two-Directional Two-Pole Single Phase Line Start Permanent Magnet Synchronous Motor. . . . .</b>	<b>343</b>
M. Gwoździewicz	
<b>Overhead Lines in Power System with Wind Power Plants and Photovoltaic Power Plants . . . . .</b>	<b>349</b>
M. Zeńczak	
<b>An Analysis of a Brushless DC Motor with a Cup-Rotor. . . . .</b>	<b>365</b>
M.P. Ciurys, I. Dudzikowski and G. Bogusz	
<b>Description of the Cross Saturation in an IPMSM for Electric Vehicles Using Bicubic Splines . . . . .</b>	<b>377</b>
Patrick Seibt and André Fischer	

<b>Method for Diagnosing the Vacuum Conditions Using Pulses Voltage Generator. . . . .</b>	<b>383</b>
W. Chmielak and Z. Pochanke	
<b>The Group and Individual Connection to the Rail System Modelling in a Lightning Discharge Analysis . . . . .</b>	<b>393</b>
Zofia Wróbel	
<b>Gearless Pedaling Electric Driven Tricycle . . . . .</b>	<b>411</b>
K. Zawirski, K. Nowopolski, B. Wicher, D. Janiszewski, B. Fabiański and K. Siembab	
<b>Calculations of Conjugated Fields in the Ferromagnetic Medium. . . . .</b>	<b>423</b>
Robert Pękala, Tadeusz Kwater and Bogdan Kwiatkowski	

Analysis and Simulation of Electrical and Computer  
Systems

Gołębiowski, L.; Mazur, D. (Eds.)

2015, X, 433 p. 321 illus., 94 illus. in color., Hardcover

ISBN: 978-3-319-11247-3
