

# Contents

<b>1</b>	<b>Multiple Criteria Decision Analysis</b> . . . . .	<b>1</b>
1.1	Preference Relations . . . . .	1
1.2	Classes of Decision Problems . . . . .	1
1.3	Probabilities of Choice . . . . .	2
1.4	Applications of the Probabilistic Approach . . . . .	2
<b>2</b>	<b>Approaches to Criteria Combination</b> . . . . .	<b>5</b>
2.1	Uncertainty About Preferences . . . . .	5
2.1.1	General Criteria Features . . . . .	6
2.1.2	Criteria Combination . . . . .	6
2.2	Weighted Averages . . . . .	7
2.2.1	The Analytic Hierarchy Process . . . . .	8
2.2.2	AHP Tools . . . . .	9
2.2.3	Example of AHP Application . . . . .	11
2.3	Capacities . . . . .	12
2.3.1	Choquet Integral . . . . .	13
2.3.2	Example of Application of the Choquet Integral . . . . .	16
2.3.3	Pairwise Comparisons in the Space of Sets of Criteria . . . . .	17
2.3.4	Binary Relations . . . . .	18
2.3.5	Example of Capacity Determination . . . . .	20
	References . . . . .	21
<b>3</b>	<b>The Probabilistic Approach to Preferences Measurement</b> . . . . .	<b>23</b>
3.1	Probability of Preference . . . . .	23
3.2	Fuzzy Sets and Fuzzy Logic . . . . .	24
3.2.1	Fuzzy Numbers . . . . .	24
3.2.2	Fuzzy Logic . . . . .	25
3.3	Computation of Probabilities of Preference . . . . .	25
3.3.1	Computation of the Probability of Being the Best . . . . .	26
3.3.2	Example of Probability of Being the Best . . . . .	26

3.4	Combination of Probabilities of Preference. . . . .	27
3.5	Example of Choice of a Car. . . . .	28
	References. . . . .	30
<b>4</b>	<b>Computation of Probabilities of Preference . . . . .</b>	<b>31</b>
4.1	Preferences Quantification . . . . .	31
4.2	The Initial Quantification of Attributes . . . . .	32
4.3	Modeling the Probability Distribution . . . . .	32
4.4	Transformation in Probabilities of Being the Best . . . . .	34
4.5	Comparison to a Sample . . . . .	35
	References. . . . .	38
<b>5</b>	<b>Composition by Joint Probabilities . . . . .</b>	<b>39</b>
5.1	Approaches by Joint Probabilities . . . . .	39
5.2	Different Assumptions About Correlation. . . . .	41
5.2.1	Progressive and Pessimistic Point of View . . . . .	42
5.2.2	Progressive and Optimistic Point of View . . . . .	42
5.2.3	Conservative and Pessimistic Point of View . . . . .	43
5.2.4	Conservative and Optimistic Point of View . . . . .	43
5.3	Examples. . . . .	44
	References. . . . .	50
<b>6</b>	<b>Composition by DEA Distance to the Frontier . . . . .</b>	<b>51</b>
6.1	Data Envelopment Analysis . . . . .	51
6.1.1	BCC Model Oriented to the Minimization of Inputs . . . . .	54
6.1.2	BCC Model Oriented to the Maximization of Outputs . . . . .	54
6.2	Use of DEA Scores. . . . .	55
6.3	A Human Development Index . . . . .	56
	References. . . . .	63
<b>7</b>	<b>Dynamic Probabilistic Indices . . . . .</b>	<b>65</b>
7.1	Malmquist Indices. . . . .	65
7.2	Variants for the Computation of Malmquist Indices. . . . .	66
7.3	Malmquist Analysis of a Production Model . . . . .	68
	References. . . . .	75
<b>8</b>	<b>Probabilities in the Problem of Classification . . . . .</b>	<b>77</b>
8.1	Modeling the Problem of Classification . . . . .	77
8.2	Computation of Probabilities of Preference. . . . .	78
8.3	Composition Rules . . . . .	79
8.4	The Algorithm of Classification . . . . .	81
8.5	Classification of Car Models . . . . .	84

8.6 Classification of Countries by HDI Criteria . . . . . 87

8.7 Evaluation of the Classification. . . . . 89

References. . . . . 95

**9 Capacities Determination . . . . . 97**

9.1 The Maximization Capacity . . . . . 97

9.2 Use of the Capacity to Evaluate the Alternatives. . . . . 98

9.3 Example of Capacity Estimation . . . . . 99

References. . . . . 102

**10 Rough Sets Modeling . . . . . 103**

10.1 Roughness Modeling. . . . . 103

10.2 Rough Sets Theory . . . . . 104

10.3 VC-DRSA . . . . . 106

10.4 Aggregation of Classes . . . . . 107

10.5 A Probabilistic Aggregation Algorithm . . . . . 108

10.6 Example of Car Models. . . . . 109

References. . . . . 110

**11 Application to FMEA Priority Assessments . . . . . 113**

11.1 Risk Priority Probabilities . . . . . 113

11.2 FMEA. . . . . 115

11.3 Risk Indices . . . . . 116

11.4 Practical Considerations. . . . . 117

11.5 Classification Example . . . . . 118

References. . . . . 120

**Appendix: Basic Notions of Probability Theory . . . . . 121**

**Index . . . . . 139**

Probabilistic Composition of Preferences, Theory and  
Applications

Parracho Sant'Anna, A.

2015, VII, 141 p., Hardcover

ISBN: 978-3-319-11276-3
