

# Contents

<b>1</b>	<b>What is Airworthiness?</b>	<b>1</b>
1.1	Introduction	1
1.2	The Basic Principles of Certification	2
1.3	Civil Aircraft Certification Practice	4
1.3.1	Civil Design Codes	4
1.4	Military Aircraft Certification Practice	11
1.5	Release for Flight Test	13
<b>2</b>	<b>The Atmosphere</b>	<b>15</b>
2.1	General Principles of the Atmosphere	15
2.2	The International (or US) Standard Atmosphere	18
2.2.1	Troposphere	19
2.2.2	Lower Stratosphere	20
2.2.3	Middle Stratosphere	20
2.3	Which Altitude Matters?	21
2.4	Variation in the Tropopause	22
2.5	The Effects of Atmospheric Conditions Upon Human Survivability	23
2.5.1	Pressure and Oxygen Supply	24
2.5.2	Temperature Effects	28
2.6	Exercises	29
2.6.1	Standard Atmosphere Exercise	29
2.6.2	Life Support	29
2.7	Sample Answers to Exercises, With Commentary	30
2.7.1	Standard Atmosphere Exercise	30
2.7.2	Life Support Exercise	31
<b>3</b>	<b>The Pitot-Static System</b>	<b>33</b>
3.1	The Measurement of Airspeed	33
3.2	Pitot-Static System Design	34

3.3	Calculating Airspeed Values.....	39
3.3.1	IAS .....	39
3.3.2	CAS .....	39
3.3.3	EAS .....	40
3.3.4	TAS.....	42
3.3.5	Groundspeed .....	44
3.4	Methods of ASI Calibration .....	45
3.4.1	Wind Vector and Groundspeed Based Methods .....	46
3.4.2	Non-GPS Variant Methods.....	49
3.4.3	Comparison Methods .....	50
3.5	Machmeters .....	51
3.6	Display of Airspeed Limits .....	52
3.7	Pressure Altimetry .....	54
3.8	Methods of Altimeter/Static System Calibration .....	57
3.9	Considerations of Minimum Accuracy .....	58
3.10	A Note About Electronic Devices .....	59
3.11	Sample Problems.....	60
3.11.1	Determination of TPEC.....	60
3.11.2	Determination of SPEC .....	60
3.11.3	General Pitot-Static System Problem.....	60
3.12	Sample Solutions.....	61
3.12.1	Determination of TPEC.....	61
3.12.2	Determination of SPEC.....	63
<b>4</b>	<b>The Flight Envelope.....</b>	<b>69</b>
4.1	Introduction.....	69
4.2	Constructing the Manoeuvre Envelope.....	70
4.2.1	Flaps in the Flight Envelope .....	78
4.2.2	Other Services .....	79
4.2.3	Converting and Displaying Limitations .....	79
4.3	Constructing the Gust Envelope.....	79
4.3.1	A Simple Model of Gust Response .....	80
4.3.2	Response to a Sharp-Edged Gust.....	81
4.4	Gust Loading Requirements in Civil Airworthiness Standards .....	86
4.5	Flutter and Resonance.....	88
4.6	Sample Problems.....	91
4.6.1	Construction of a Manoeuvre Envelope #1.....	91
4.6.2	Construction of a Manoeuvre Envelope #2.....	92
4.7	Solutions to Sample Problems .....	93
4.7.1	Solution to #1 is not Shown and is an Exercise for the Reader.....	93
<b>5</b>	<b>First Principles of Structural Approval.....</b>	<b>95</b>
5.1	Introduction.....	95
5.2	The Role of the Structural Airworthiness Engineer .....	96

5.3	Concepts and Terminology in Structural Approvals .....	97
5.3.1	Definition of Reserve Factor .....	98
5.4	The Structural Report .....	99
5.5	Sample Problem .....	101
<b>6</b>	<b>Approving an Aircraft's Main Flight Structure .....</b>	<b>105</b>
6.1	Loads and Factors Analysis .....	105
6.2	Approval by Test .....	108
6.3	Approval by Analysis .....	109
6.4	The Reality of Approval Practice .....	112
6.5	A Special Case—Structural Approval of an Existing Kitplane .....	113
6.6	Materials Fatigue .....	116
<b>7</b>	<b>Undercarriage Structural Approvals .....</b>	<b>119</b>
7.1	What is an Undercarriage For? .....	119
7.2	Determining Undercarriage Energy Absorption .....	121
7.2.1	Drop Testing .....	122
7.2.2	Load Versus Deflection Testing .....	125
7.2.3	Comparing $P_{Z,max}$ from Drop Test and Load Versus Displacement .....	128
7.3	Typical Undercarriage Load Cases .....	129
7.3.1	Typical Mainwheel Load Cases .....	129
7.3.2	A Note on Attitudes .....	132
7.3.3	Reaction of Undercarriage Loads .....	133
7.3.4	Typical Nosewheel and Tailwheel Load Cases .....	134
7.4	Using Drop-Tests to Avoid Static Load Testing Requirements .....	137
7.5	Braking Systems .....	138
7.6	Non-Structural Undercarriage Airworthiness Issues .....	140
7.7	Sample Problems .....	141
7.7.1	Determination of Undercarriage Landing Loads #1 .....	141
7.7.2	Determination of Undercarriage Landing Loads #2 .....	141
7.8	Solutions to Sample Problems .....	142
7.8.1	Determination of Undercarriage Landing Loads #1 .....	142
7.8.2	Determination of Undercarriage Landing Loads #2 .....	143
<b>8</b>	<b>Control Surfaces and Circuits .....</b>	<b>145</b>
8.1	Introduction .....	145
8.2	Control Inceptors .....	146
8.2.1	Structural Airworthiness of Control Inceptors .....	148
8.2.2	Non-Structural Airworthiness of Control Inceptors .....	151
8.3	Control Surfaces and Linkages .....	160
8.3.1	A Special Case—Aileron Reversal .....	162
<b>9</b>	<b>Powerplant Airworthiness .....</b>	<b>165</b>
9.1	Airworthiness of the Powerplant .....	165
9.2	Protecting the Aircraft from its Engine .....	167

9.3	Engine Mounts .....	169
9.4	Integrity of the Engine .....	170
9.5	Engine Instrumentation .....	174
9.5.1	A Special Case—ETOPS.....	176
9.6	Propellers.....	178
<b>10</b>	<b>An Introduction to Crashworthiness.....</b>	<b>183</b>
10.1	The Objective of Crashworthiness .....	183
10.2	Common Causes of Post Crash Injuries and Means of Prevention ...	184
10.2.1	Emergency Egress from the Aircraft.....	184
10.2.2	Fire Resistance of Structural and Cabin Materials.....	185
10.2.3	Smoke and Fumes: Evacuation, Detection and Survival ...	186
10.2.4	Undercarriage Collapse.....	188
10.3	Crash Loads.....	189
10.4	The Challenge of New Materials .....	191
<b>11</b>	<b>An Introduction to Flying Qualities Evaluation .....</b>	<b>193</b>
11.1	About Flying Qualities .....	193
11.2	The Essential Terminology of Aeroplane Stability .....	194
11.3	The Use of the Cooper Harper Pilot Compensation Rating Scale .....	196
<b>12</b>	<b>Longitudinal Stability and Control .....</b>	<b>201</b>
12.1	Apparent Longitudinal Static Stability, CG Range Determination, and Pitch Effects of Services.....	201
12.1.1	What are Acceptable Longitudinal Static Stability Characteristics? .....	206
12.1.2	Fixing Apparent LSS Problems.....	207
12.1.3	Effects of Services.....	207
12.2	Longitudinal Dynamic Stability.....	210
12.2.1	Short Period Longitudinal Dynamic Stability.....	211
12.2.2	Long Period Longitudinal Dynamic Stability .....	212
12.3	Manoeuvre Stability .....	214
<b>13</b>	<b>Lateral and Directional Stability and Control .....</b>	<b>217</b>
13.1	Lateral and Directional Static Stability and Control.....	217
13.2	Dynamic Lateral and Directional Stability .....	225
13.2.1	A (Very) Abbreviated Theory of Dynamic Lat-Dir.....	225
<b>14</b>	<b>Aeroplane Asymmetry .....</b>	<b>235</b>
14.1	Why Asymmetry Can Matter .....	235
14.2	A Basic Theory of Asymmetric Thrust Handling.....	236
14.3	Testing for Control Speeds in the Air .....	237
14.4	Behaviour Following an Engine Failure, and Control With an Inoperative Engine .....	238
14.5	Minimum Control Speeds .....	238

14.5.1	Minimum Control Speed in the Air.....	238
14.5.2	Minimum Control Speed in the Landing Configuration ...	241
14.5.3	Requirements for $V_{MCL-1}$ .....	244
14.5.4	Requirements for $V_{MCL-2}$ .....	245
14.5.5	Minimum Control Speed on the Ground.....	246
14.6	Asymmetric Controls and Services .....	246
<b>15</b>	<b>Stalling Characteristics .....</b>	<b>249</b>
15.1	The Unaccelerated and Turning Flight Stalls.....	251
15.1.1	The Turning Flight Stall.....	252
15.1.2	Defining Test Conditions for Large Aeroplane Testing .....	254
15.1.3	Stall Recovery .....	254
15.2	Other Stall Cases—The Accelerated and Dynamic Stalls.....	256
15.2.1	The Accelerated or Dynamic Stall .....	256
15.2.2	Predicting the Dynamic Stalling Speed.....	258
15.2.3	The Stall Warning Margin in a Dynamic Stall .....	258
<b>16</b>	<b>Systems Assessment .....</b>	<b>259</b>
16.1	Defining Systems .....	259
16.2	System Failure Numeric Analysis.....	260
16.3	Systems Testing and Performance Identification.....	264
16.4	Electrical and EMC Considerations .....	267
16.5	Environmental Testing .....	267
16.6	Ergonomics: The Human in the System.....	269
16.6.1	Hardware—Liveware .....	270
16.6.2	Software—Liveware .....	274
<b>17</b>	<b>Facilitating Continued Airworthiness .....</b>	<b>275</b>
17.1	The Nature of Continued Airworthiness .....	275
17.2	Constructing Maintenance Procedures.....	276
17.3	Continued Airworthiness Oversight.....	279
17.4	A Final Thought.....	281
<b>Appendix</b>	<b>.....</b>	<b>283</b>
<b>Index</b>	<b>.....</b>	<b>315</b>

Initial Airworthiness

Determining the Acceptability of New Airborne Systems

Gratton, G.

2015, XV, 319 p. 158 illus., 128 illus. in color.,

Hardcover

ISBN: 978-3-319-11408-8
