

Contents

1 Basic Results from the Theory of Continuous Semigroups of Operators	1
1.1 Strongly Continuous Semigroups of Linear Operators	2
1.2 Nonlinear Semigroups	6
1.3 Asymptotic Behavior of Contraction Semigroups	9
References	10
2 Partial Asymptotic Stability	13
2.1 Partial Stability of Multivalued Dynamical Systems	13
2.2 Application to Differential Inclusions and Ordinary Differential Equations	18
2.2.1 Differential Equations with Discontinuous Right-Hand Sides	18
2.3 Stabilization of Finite-Dimensional Systems with Respect to a Part of Variables	22
2.3.1 Theorem on Partial Stabilization	22
2.3.2 Partial Stabilization of a Rigid Body	24
2.3.3 A Satellite with Moving Masses	27
2.4 Partial Asymptotic Stability of Nonlinear Semigroups	31
2.5 Relative Compactness of Trajectories in a Banach Space	33
2.5.1 Compactness Lemmas	34
2.5.2 Trajectories of the Perturbed System	35
References	37
3 Stabilization of a Rotating Body with Euler–Bernoulli Beams	39
3.1 Equations of Motion of a Rigid Body with Elastic Attachments	40
3.1.1 Hamilton’s Principle	41
3.1.2 Equations with Elastic Coordinates	43

3.2	Stabilization by a State Feedback Law	48
3.3	Partial Stabilization in the Case of Multiple Frequencies	56
3.4	Numerical Example: Stabilization of a Finite-Dimensional System	59
3.5	Stabilization of a Flexible-Link Manipulator Model	61
3.5.1	Description of the Model	61
3.5.2	Equations of Motion	65
3.5.3	Equilibrium Conditions	69
3.5.4	Motion of a Single-Link Manipulator	70
3.5.5	Stability of the Linearized System	72
3.5.6	Localization of the Limit Set	79
	References	95
4	Reachable Sets and Controllability Conditions	97
4.1	Problem Statement and Preliminaries	98
4.2	Controllability of a Family of Oscillators Without Damping	101
4.2.1	Canonical Form of a Finite-Dimensional Subsystem	102
4.2.2	Feedback Linearization Test	108
4.2.3	L^2 -Minimal Control	113
4.2.4	Approximate Controllability Theorem	121
4.3	Application for the Euler–Bernoulli Beam	126
	References	129
5	Observer-Based Stabilization of a Manipulator Based on the Timoshenko Beam Model	131
5.1	Description of the Model	131
5.2	Equations of the Perturbed Motion	136
5.3	Spectrum of the Linearized Model	137
5.4	Galerkin’s Approximations	150
5.5	Controllability and Stabilization by a State Feedback Law	153
5.6	Observability Conditions	157
5.7	Observer-Based Stabilization	161
5.8	Simulation Results	162
	References	165
6	Control and Stabilization of a Rotating Kirchhoff Plate	169
6.1	Rotating Kirchhoff Plate	170
6.2	Partial Stabilization of the Equilibrium	175
6.3	Finite Dimensional Controllability	187
6.4	Spectral Controllability	190
6.5	Optimal Control Problem	192

Contents	xiii
6.6 Numerical Simulations	197
6.7 Reachable Sets of the Single-Input Model.	200
References	212
Appendix A: Convergence of Galerkin’s Method.	215
Index	231

Partial Stabilization and Control of Distributed
Parameter Systems with Elastic Elements

Zuyev, A.L.

2015, XIII, 232 p. 16 illus., 1 illus. in color., Softcover

ISBN: 978-3-319-11531-3
