Part I Critical Issues in Ethical Investment

1	The Ethical Financial Question and the MCDM Framework	3
	Enrique Ballester, Blanca Pérez-Gladish, and Ana Garcia-Bernabeu	
1.1	What SRI Means	3
1.2	Historical Outline	8
1.3	Why SRI? Sustainability Constraints in the Classical Economic Model	11
1.4	Multiple Criteria Decision Making (MCDM) Framework	12
1.4.1	A Brief MCDM History	13
1.4.2	MCDM and Portfolio Selection	14
1.4.3	MCDM Applications to SRI	16
	Conclusions	16
	References	17
2	Profiling Ethical Investors	23
	Paz Méndez-Rodríguez, Laura Galguera, Mila Bravo, Karen Benson, Robert Faff, and Blanca Pérez-Gladish	
2.1	Introduction	23
2.1.1	The Australian SRI Market	24
2.1.2	The Spanish SRI Market	25
2.2	Literature Review	27
2.3	Research Design and Results	30
2.4	Case Studies for the Spanish and the Australian Investors	32
2.4.1	Spanish Investors	33
2.4.2	Australian Investors	42
	Conclusions	49
	References	51

3	Social Performance and Financial Performance: A Controversial Relationship	53
	Hajer Tebini, Bouchra M'Zali, Pascal Lang, and Paz Méndez-Rodríguez	
3.1	Introduction	54
3.2	Research Hypothesis	56
3.3	Research Method	57
3.3.1	Description of Data and Sample	57
3.3.2	Methodological Approach	58
3.3.3	Measures	59
3.3.4	Model Specification	61
3.4	Results	62
3.4.1	The Impact of SP on FP Depends on the Period of Study	63
3.4.2	The Impact of SP on FP Depends on the Extent of SP	65
3.4.3	The Impact of SP on FP Depends on the Extent of FP	65
3.4.4	The Impact of SP on FP Depends on the Selected Sample	66
3.4.5	The Impact of SP on FP Depends on the Model Used	67
	Conclusions	69
	References	70
4	Measurement of Assets' Social Responsibility Degree	75
	Mila Bravo, Ana B. Ruiz, David Pla-Santamaria, and Paz Méndez-Rodríguez	
4.1	Introduction	75
4.2	The Role and Practice of Social Rating Agencies	76
4.2.1	KLD	80
4.2.2	VIGEO	81
4.2.3	EIRIS	86
4.3	Academic Literature Review on the Measurement of Mutual Funds' Social Responsibility Degree	87
4.4	A First Proposal for the Measurement of Assets' Social Responsibility Degree	97
4.4.1	Aggregated Social Responsibility Indicator	97
4.4.2	Applying SRD Indicator to a Real World Case Study	99
	Conclusions	106
	References	107

Part II Goal Programming and SRI Funds

5	Portfolio Selection by Goal Programming Techniques	111
	Enrique Ballester, Ana Garcia-Bernabeu, and Adolfo Hilario	
5.1	Deterministic Weighted Goal Programming	111
5.2	An Example of SRI Decisions	115
5.3	Risk Aversion and Statistical Risk	117
5.3.1	Risk Aversion as Depending on the Investor's Utility	117
5.3.2	Eliciting ARA in Arrow's Utility Scenarios.....	120
5.4	Risk Aversion for Portfolio Random Returns: How to Elicit ARA Coefficients	121
5.4.1	Mean-Variance Stochastic Goal Programming (MV-SGP) Model.....	123
5.4.2	Markowitz E-V Model	124
5.4.3	A Multiobjective Extension: The MV-SGP Model	124
5.4.4	Two Objective Case	127
5.5	Selecting SRI-Financial Portfolios: Stages in the Process	127
	Conclusions	128
	References.....	129
6	Selecting SRI Financial Portfolios Applying MV-SGP Model	131
	Enrique Ballester and Ana Garcia-Bernabeu	
6.1	Goal Statement Under Uncertainty from Financial and SRI Perspectives	131
6.2	Analytic Statement for the Financial-Ethical Bicriteria Model	133
6.3	Model Targets	134
6.4	Estimating ARA Coefficients	135
6.5	Meaning of the Model in Terms of Risk and Risk Aversion	139
	Conclusions	140
	References.....	140
7	An Actual Case of SRI Financial Portfolio Choice by MV-SGP	143
	Enrique Ballester, Ana Garcia-Bernabeu, David Pla-Santamaria, and Mila Bravo	
7.1	Introduction.....	143
7.2	Defining Investor's Profiles	145
7.3	Specifying and Solving the Model	146
7.4	Results	147
7.4.1	Achievement in Terms of Expected Return and Risk	148
7.4.2	Portfolio Weights: A Comparison from the Green Perspective.....	150
7.5	Sensitivity Analysis	150
	Conclusions	151
	References.....	151

Part III Compromise Programming and SRI Funds

8	Compromise Programming and Utility Functions	155
	Enrique Ballesteros and Ana Garcia-Bernabeu	
8.1	Introduction to CP Modelling	155
8.2	Choice Problems and the Decision Maker's Utility	157
8.3	Reviewing the CP Model	158
8.3.1	An Example of CP Setting from Economic and Ethical Objectives	159
8.3.2	CP Proxy for the Decision Maker's Utility Function	162
8.3.3	SRI Example: Carbon Pollution from a Power Plant	162
8.4	Linear–Quadratic Composite Metric: Advanced Approaches.....	165
8.4.1	Utility Function: An Extended Approach	166
8.4.2	Normalizing the x_j Criteria	167
8.4.3	Normalizing the Objective Function.....	168
8.4.4	Linear–Quadratic CP Achievement Function	168
8.4.5	A Case of Polymer Industry	169
	Conclusions	173
	References.....	174
9	Portfolio Selection by Compromise Programming	177
	Enrique Ballesteros, David Pla-Santamaria, Ana Garcia-Bernabeu, and Adolfo Hilario	
9.1	Using CP to Select Securities Portfolios	177
9.2	A Real World Case of Stock Market Investment	181
9.3	First Stage: Basic Statements	185
9.4	Second Stage: Bounding the Investor's Utility Optimum	186
	Conclusions	194
	References.....	195
10	Ethically Constrained Portfolio Selection of Funds by CP Modelling: A Real World Environmental Case	197
	Ana Garcia-Bernabeu, Blanca Pérez-Gladish, and Adolfo Hilario	
10.1	Motivating the Problem	197
10.2	The CP Model	199
10.3	Actual Environmental Case	201
10.3.1	Empirical Information	202
10.3.2	Applying CP to the Portfolio Selection Process	203
	Conclusions	208
	References.....	209

11 Evaluating Fund Performance from Financial and SRI Criteria	211
Ana Garcia-Bernabeu, Blanca Pérez-Gladish, and Adolfo Hilario	
11.1 Performance Composite Measures in Classic Financial Analysis	211
11.2 Purely Financial Performance Analysis Regardless of the Investor's Preferences	212
11.3 Purely Financial Performance and Combined SRI-Financial Performance from the Investor's Preferences	213
11.3.1 Purely Financial Performance	214
11.3.2 Combined SRI-Financial Performance	216
11.4 Numerical Examples	216
11.4.1 An Actual Case of Purely Financial Performance	217
11.4.2 An Example of Combined SRI-Financial Performance	220
Conclusions	223
References	224

Part IV Other Decision-Making Support Methods

12 Ranking Socially Responsible Mutual Funds Based on the Particular Preferences of the Decision Maker	227
Ana B. Ruiz, Bouchra M'Zali, and Paz Méndez-Rodríguez	
12.1 Introduction	228
12.2 Ranking SRI Mutual Funds Based on the Analytical Hierarchy Process (AHP)	229
12.2.1 Socially Responsible Criteria	229
12.2.2 Ranking Mutual Funds Based on Socially Responsible Criteria	238
12.3 Ranking SRI Mutual Funds Based on Macbeth	243
12.3.1 Evaluation of Mutual Funds' Socially Responsible Performance	244
12.3.2 Weighting the Evaluation Criteria	251
12.4 Discussion	258
Conclusions	260
References	260
13 Portfolio Selection with SRI Synthetic Indicators: A Reference Point Method Approach	263
Paz Méndez-Rodríguez, Blanca Pérez-Gladish, José Manuel Cabello, and Francisco Ruiz	
13.1 Introduction	263
13.2 The Reference Point Based Approach	264
13.3 Synthetic Indicators of Stocks' Social Responsibility	269

13.4	Portfolio Selection Model.....	271
13.4.1	Banks and Financial Services	272
13.4.2	Broadcasting, Advertising and Publishing	273
13.4.3	Electric, Gas Utility and Energy	273
13.4.4	Heavy Construction and Logistics	273
13.4.5	Rest of Stocks.....	274
	Conclusions	280
	References.....	281
14	Soft Computing Techniques for Portfolio Selection:	
	Combining SRI with Mean-Variance Goals	283
	Clara Calvo, Carlos Ivorra, and Vicente Liern	
14.1	Introduction.....	283
14.2	Elements of Fuzzy Set Theory.....	284
14.3	Fuzzy Measurement of Social Responsibility.....	286
14.4	Portfolio Selection Under Cardinality and Semicontinuous Variable Constraints.....	289
14.5	A Soft Computing Approach to SRI	292
	Conclusions	300
	References.....	300

Socially Responsible Investment

A Multi-Criteria Decision Making Approach

Ballesteros, E.; Pérez-Gladish, B.; Garcia Bernabeu, A.M.

(Eds.)

2015, XVIII, 301 p. 33 illus., Hardcover

ISBN: 978-3-319-11835-2
