|----------|---|-----------|
| <b>1</b> | <b>Process Equipment Procurement: Need and Options</b>                                    | <b>1</b>  |
| 1.1      | Introduction  | 1         |
| 1.2      | Procurement of an Entire Manufacturing Facility or Technology                             | 2         |
| 1.3      | Options to Be Considered  | 3         |
| 1.3.1    | Procurement of an Entire Plant on “Turnkey Basis” Procuring an old plant and Revamping it | 3         |
| 1.3.2    | Purchase of Know-How  | 6         |
| 1.3.3    | Options for External Procurement  | 7         |
| 1.4      | History Cards   | 9         |
| 1.5      | Need to Purchase New/Additional Equipment   | 10        |
| 1.6      | Deciding on New Purchase  | 11        |
| 1.7      | Options to Be Considered for External Procurement   | 12        |
| 1.8      | Technical Specifications  | 12        |
| 1.9      | Financial Implications of Procurements  | 13        |
| <b>2</b> | <b>Classification of Equipment, Inquiry Document and Instructions to Vendors</b>          | <b>17</b> |
| 2.1      | Instructions to Vendor  | 18        |
| 2.1.1    | Exclusion from Scope of Supply  | 20        |
| 2.1.2    | General Conditions  | 20        |
| 2.2      | Quality Assurance Plan (QAP)  | 22        |
| 2.2.1    | The Vendor Should Include in the QAP  | 22        |
| 2.2.2    | Visit by Purchaser’s Inspection Engineer to Vendors Works                                 | 22        |
| 2.2.3    | Documents to Be Included in the QAP   | 23        |
| <b>3</b> | <b>Solid Material Feeding Equipmentsb for Process Units</b>                               | <b>25</b> |
| 3.1      | General Information to Be Given to Vendor   | 25        |
| 3.2      | Electrical Overhead Travelling EOT Cranes   | 26        |
| 3.2.1    | Procurement/Selection Criteria  | 26        |
| 3.2.2    | Vendor to Give Details of   | 26        |
| 3.3      | Hoists  | 27        |
| 3.4      | Belt Conveyors  | 28        |

|          |  |           |
|----------|--|-----------|
| 3.4.1    | Main Components of the System                        | 28        |
| 3.4.2    | Properties of Materials to be Taken into Account     | 28        |
| 3.4.3    | Considerations for Selection                         | 28        |
| 3.4.4    | System Design Considerations for Belt Conveyor       | 29        |
| 3.4.5    | Safety Arrangements                                  | 30        |
| 3.4.6    | Tightening of Conveyor Belt                          | 31        |
| 3.5      | Bucket Elevators                                     | 31        |
| 3.5.1    | Continuous Discharge Type                            | 32        |
| 3.5.2    | Centrifugal Discharge Type                           | 32        |
| 3.5.3    | Properties of Materials to be Taken into Account     | 32        |
| 3.5.4    | Main Components of the System                        | 32        |
| 3.5.5    | Purchaser to Discuss with Vendor                     | 33        |
| 3.5.6    | General—Vendor to Inform the Following               | 34        |
| 3.6      | Screw Conveyors                                      | 34        |
| 3.6.1    | Purchaser Should Inform the Following                | 35        |
| 3.7      | Pneumatic Conveying System                           | 35        |
| 3.7.1    | Important System Components                          | 36        |
| 3.7.2    | Limitations of the System                            | 36        |
| 3.7.3    | Considerations For Pneumatic Conveying Systems       | 36        |
| <b>4</b> | <b>Equipments/Accessories for Handling of Fluids</b> | <b>39</b> |
| 4.1      | Pumps  | 39        |
| 4.1.1    | Considerations for Selection of Pumps                | 39        |
| 4.1.2    | Special Precautions for Boiler Feed Water Pumps      | 42        |
| 4.1.3    | Metering Pumps                                       | 42        |
| 4.2      | Blowers and Compressors                              | 43        |
| 4.2.1    | Compressors  | 45        |
| 4.2.2    | Positive Displacement Type (Roots Blower)            | 46        |
| 4.2.3    | Induced Draft Fans                                   | 47        |
| 4.3      | Vacuum Pumps and Exhausters, Steam Jet Ejectors      | 47        |
| 4.3.1    | Vacuum Pumps   | 47        |
| 4.3.2    | Industrial Exhausters                                | 48        |
| 4.3.3    | Steam Jet Ejectors                                   | 49        |
| 4.4      | Valves, Pipelines, Gaskets and Flanges               | 49        |
| 4.4.1    | Valves   | 49        |
| 4.4.2    | PIPELINES  | 51        |
| 4.4.3    | Gaskets  | 52        |
| 4.4.4    | Flanges  | 52        |
| 4.4.5    | Expansion Bellows                                    | 52        |
| <b>5</b> | <b>Procurement of Raw Materials and Catalysts</b>    | <b>55</b> |
| 5.1      | Raw Materials  | 55        |
| 5.1.1    | Starting Materials                                   | 55        |
| 5.1.2    | Intermediate Items                                   | 55        |
| 5.1.3    | Selection/Procurement Criteria                       | 56        |
| 5.1.4    | Other Specifications                                 | 56        |

|          |  |           |
|----------|--|-----------|
| 5.1.5    | Types of Packing for Procurement . . . . .                               | 56        |
| 5.1.6    | Purchasing by Tanker loads . . . . .                                     | 57        |
| 5.1.7    | Solids/Powders . . . . .   | 57        |
| 5.2      | Catalysts . . . . .  | 58        |
| 5.2.1    | Considerations for Procurement of Catalyst . . . . .                     | 58        |
| 5.2.2    | Fixed Bed of Catalyst . . . . .  | 58        |
| 5.2.3    | Fluidised Bed of Catalyst . . . . .                                      | 58        |
| 5.2.4    | Loss due to Attrition . . . . .  | 59        |
| 5.2.5    | Deactivation/Poisoning of Catalyst . . . . .                             | 59        |
| 5.2.6    | Initial Cost and Royalty . . . . .                                       | 59        |
| 5.2.7    | Handling, Storage, etc. . . . .  | 60        |
| 5.2.8    | Performance Guarantee . . . . .  | 60        |
|          | Conclusion . . . . .   | 60        |
| <b>6</b> | <b>Process Reactors . . . . .</b>  | <b>63</b> |
| 6.1      | Chemical Reactors . . . . .  | 63        |
| 6.1.1    | Fixed-Bed Reactors (Catalytic) . . . . .                                 | 64        |
| 6.1.2    | Fluidised-Bed Reactors . . . . .   | 64        |
| 6.1.3    | Stirred-Tank Reactors . . . . .  | 65        |
| 6.1.4    | Gas Induction Reactors . . . . .   | 67        |
| 6.1.5    | Selection of Agitators . . . . .   | 68        |
| 6.1.6    | Standard Fittings and Mountings to Be Considered . . . . .               | 69        |
| 6.2      | Properties of Reaction Mass and Process Conditions . . . . .             | 70        |
| 6.3      | Electric Furnaces . . . . .  | 71        |
| 6.3.1    | Installation/Ordering an Electric Furnace . . . . .                      | 71        |
| 6.3.2    | Instrumentation to Be Provided . . . . .                                 | 72        |
| 6.3.3    | Whether Water-Cooling of the Electrodes Is Required . . . . .            | 72        |
| 6.3.4    | Furnace Accessories to Be Supplied by Vendor . . . . .                   | 72        |
| 6.4      | Electrolytic Cells . . . . .   | 73        |
| 6.4.1    | Selection of Electrolytic Cells . . . . .                                | 73        |
| 6.4.2    | Instrumentation Provided . . . . .                                       | 74        |
| 6.4.3    | Cell Grouping . . . . .  | 74        |
| 6.5      | Rectifier . . . . .  | 74        |
| <b>7</b> | <b>Pressure Vessels, Glass Vessels and Glass-lined Vessels . . . . .</b> | <b>77</b> |
| 7.1      | Considerations for Procurement of Pressure Vessels . . . . .             | 77        |
| 7.1.1    | Arrangements . . . . .   | 78        |
| 7.1.2    | External Fittings . . . . .  | 78        |
| 7.1.3    | Factors for Deciding Wall Thickness of Pressure Vessels . . . . .        | 79        |
| 7.1.4    | Heads for Pressure Vessels . . . . .                                     | 79        |
| 7.1.5    | General Considerations for Design and Fabrication . . . . .              | 79        |
| 7.1.6    | Materials of Construction . . . . .                                      | 80        |
| 7.1.7    | Fabrication Drawings . . . . .   | 81        |
| 7.1.8    | Steps for Ordering and Procurement . . . . .                             | 81        |
| 7.1.9    | Quality Assurance Plan . . . . .   | 82        |
| 7.1.10   | Visit to Vendors Shop . . . . .  | 83        |

|          |   |            |
|----------|---|------------|
| 7.1.11   | Statutory Documents Required  | 85         |
| 7.1.12   | Safety Valves   | 85         |
| 7.2      | Glass Equipment/Glass-lined Equipment   | 86         |
| 7.2.1    | Special Precautions   | 86         |
| 7.2.2    | Details To Be Given to the Vendor   | 87         |
| <b>8</b> | <b>Mechanical Screening and Filtration Equipment</b>  | <b>89</b>  |
| 8.1      | Vibratory Screens   | 89         |
| 8.2      | Rotary Screens  | 90         |
| 8.3      | Filters   | 90         |
| 8.3.1    | Important Considerations for Procurement  | 91         |
| 8.3.2    | Rotary Vacuum Filter Procurement  | 92         |
| 8.3.3    | Pressure Leaf Filter  | 93         |
| 8.3.4    | Filter Press  | 94         |
| 8.3.5    | Centrifuge  | 95         |
| 8.4      | Filters for Gases   | 96         |
| 8.4.1    | Quick Discharge Type Filter (Case study—please see the two figures given below for comparison of these filters) | 97         |
| 8.4.2    | Filter with Horizontal Beds of Filter Media   | 98         |
| 8.4.3    | Supports for Filter Media   | 99         |
| 8.4.4    | General Features to be Provided   | 99         |
| <b>9</b> | <b>Heat Exchangers</b>  | <b>101</b> |
| 9.1      | Criteria for Selection of Heat Exchangers   | 101        |
| 9.2      | Allowable Pressure Drop   | 102        |
| 9.3      | Expansion Bellows   | 102        |
| 9.4      | Floating Tube Bundle  | 102        |
| 9.5      | Margin for Fouling of Heat Transfer Surfaces  | 102        |
| 9.6      | Tie Rods  | 103        |
| 9.7      | Segmental Baffles   | 103        |
| 9.8      | Radiography   | 103        |
| 9.9      | Pressure Test   | 103        |
| 9.10     | Heat Exchangers with Disc-and-Donut-Type Baffles  | 103        |
| 9.11     | Plate Heat Exchangers (PHEs)  | 104        |
| 9.11.1   | Information Required from Manufacturer  | 105        |
| 9.11.2   | PHE-Based Heat Recovery System  | 105        |
| 9.12     | Other Types of Heat Exchangers  | 108        |
| 9.12.1   | Trombone Coolers  | 108        |
| 9.12.2   | Atmospheric Cooling Loops   | 108        |
| 9.12.3   | Finned Tube Banks and Radiators   | 109        |
| 9.13     | Condensers  | 109        |
| 9.13.1   | Pressure Test   | 109        |
| 9.13.2   | External Reinforcement for the Shell  | 110        |
| 9.14     | Evaporators   | 110        |
| 9.14.1   | Open Type   | 110        |
| 9.14.2   | Closed Type   | 111        |

|           |  |            |
|-----------|--|------------|
| 9.14.3    | Multiple Effect Evaporators  | 111        |
| 9.14.4    | Separate Measurement of Condensate                                 | 112        |
| <b>10</b> | <b>Air Pollution Control Equipment</b>                             | <b>117</b> |
| 10.1      | Cyclone Separators   | 117        |
| 10.2      | Bag Filters  | 119        |
| 10.3      | Absorption Equipment for Pollution Control                         | 120        |
| 10.3.1    | Inquiry for Gas Scrubbing Systems                                  | 120        |
| 10.3.2    | Venturi Scrubber   | 121        |
| 10.3.3    | Packed Towers  | 123        |
| 10.3.4    | Jet Scrubber/Ejector Scrubber                                      | 123        |
| 10.3.5    | Spray Tower  | 125        |
| 10.3.6    | Tangential Scrubbing Tower   | 125        |
| 10.4      | Tower Packing Items  | 125        |
| 10.4.1    | Loading Pattern in the Towers                                      | 125        |
| 10.4.2    | Spray Nozzles  | 126        |
| 10.5      | Candle Demisters and Entrainment Separators                        | 127        |
| 10.6      | Electrostatic Precipitators (ESP)                                  | 129        |
| 10.6.1    | Dry ESP  | 130        |
| 10.7      | Wet ESP  | 130        |
| 10.8      | Chimney  | 131        |
| <b>11</b> | <b>Heat Recovery Equipments</b>                                    | <b>135</b> |
| 11.1      | Selection of Waste Heat Boilers (WHB)                              | 135        |
| 11.2      | Steaming Economiser  | 137        |
| 11.2.1    | Selection Criteria   | 138        |
| 11.3      | Air Preheater/Heat Recuperators/Other Devices<br>for Heat Recovery | 139        |
| 11.3.1    | Selection Criteria for Air Preheaters                              | 139        |
| 11.3.2    | Recuperators   | 139        |
| 11.4      | Cogeneration of Power  | 142        |
| 11.4.1    | Feasibility Study  | 143        |
| 11.4.2    | Steam Turbines   | 144        |
| 11.5      | Steam Pressure Reducing Station                                    | 145        |
| 11.6      | Steam Superheaters   | 145        |
