**Part I Statistical Process Control**

**Social Network Monitoring: Aiming to Identify Periods of Unusually Increased Communications Between Parties of Interest** ..... 3

Ross Sparks

1 Introduction ..... 3

2 The Methodology ..... 5

2.1 Multivariate EWMA Statistic ..... 7

2.2 An Algorithm for Detecting Unusually High Communication Networks Based on Order Statistics ..... 8

3 Simulated Example of Application ..... 10

4 Concluding Remarks ..... 12

References ..... 12

**Some Recent Results on Monitoring the Rate of a Rare Event** ..... 15

William H. Woodall and Anne R. Driscoll

1 Introduction ..... 15

2 Performance Metrics ..... 16

3 The Use of a Power Transformation ..... 17

4 Performance Metrics ..... 19

5 The Effect of Aggregating Data ..... 21

6 Some Generalizations ..... 23

7 Research Ideas ..... 24

8 Conclusions ..... 25

References ..... 26

**Statistical Perspectives on “Big Data”** ..... 29

Fadel M. Megahed and L. Allison Jones-Farmer

1 Introduction ..... 29

2 What is Big Data? ..... 31

2.1 Volume ..... 31

2.2 Variety ..... 32

2.3 Velocity ..... 33

3	Beyond the 3V's .....	34
4	Applications of SPC to Big Data Problems .....	35
4.1	Labeled Data .....	35
4.2	Unlabeled Data .....	36
4.3	Functional Data .....	36
4.4	Graph Data .....	38
4.5	Multistream Data .....	39
5	Some Challenges in Big Data SPC .....	40
6	Concluding Remarks .....	43
	References .....	44
	<b>Statistical Control of Multiple-Stream Processes: A Literature Review ...</b>	<b>49</b>
	Eugenio K. Epprecht	
1	Introduction .....	49
2	The Beginnings: The Group Control Chart and Nelson's Run Scheme ....	50
3	Two Sources of Variation .....	52
4	Other Approaches and Particular Problems .....	57
5	Perspectives: Other Applications, Open Issues, Challenges and Opportunities for Research .....	60
	References .....	63
	<b>Regenerative Likelihood Ratio Control Schemes .....</b>	<b>65</b>
	Emmanuel Yashchin	
1	Introduction .....	65
2	The Problem Setup .....	66
3	The Regenerative Likelihood Ratio Approach .....	68
4	Example: Monitoring of the Multivariate Normal Mean .....	70
5	Selected ARL Comparisons .....	72
6	Weighted Likelihood Schemes .....	73
7	Discussion .....	74
	References .....	75

## **Part II Acceptance Sampling**

### **Sampling Inspection by Variables with an Additional**

<b>Acceptance Criterion</b> .....	251
-----------------------------------	-----

Peter-Th. Wilrich

1	Introduction .....	252
2	The OC Function of the Extended Sampling Plans with Known Standard Deviation $\sigma$ .....	254
3	The OC Function of the Extended Sampling Plans with Unknown Standard Deviation $\sigma$ .....	258
4	The OC of the Sampling Plan if the Standard Deviation Differs from the Assumed Value .....	260
4.1	"Known" Standard Deviation .....	260
4.2	Unknown Standard Deviation .....	262
5	The Performance of the Sampling Plans If the Distributional Assumption Is Violated .....	263
6	Conclusions .....	268
	References .....	269

<b>Fractional Acceptance Numbers for Lot Quality Assurance</b> .....	271
K. Govindaraju and G. Jones	
1 Introduction .....	271
2 Fractional Acceptance Numbers .....	273
3 Measurement Error Correction for Attribute Inspection .....	276
4 Measurement Error Correction for Variables Inspection .....	281
5 Summary and Conclusions .....	284
Appendix .....	284
References .....	284

<b>Sampling Plans for Control-Inspection Schemes Under Independent and Dependent Sampling Designs with Applications to Photovoltaics</b> .....	287
Ansgar Steland	
1 Introduction .....	287
2 Preliminaries .....	289
2.1 Related Work .....	289
2.2 Applications in Photovoltaics .....	291
3 Method .....	292
3.1 Two-Stage Acceptance Sampling .....	292
3.2 A Two-Stage Procedure Using Additional Data .....	294
4 Approximations of the Operating Characteristics .....	296
4.1 Independent Sampling .....	300
4.2 Dependent Sampling .....	300
4.3 Sampling in Spatial Batches .....	304
5 Computational Aspects .....	305
6 Simulations .....	306
7 Discussion .....	310
Appendix: Proofs .....	311
References .....	316

### **Part III Design of Experiments**

<b>An Overview of Designing Experiments for Reliability Data</b> .....	321
G. Geoffrey Vining, Laura J. Freeman, and Jennifer L.K. Kensler	
1 Introduction .....	321
2 Introduction to Reliability Data .....	322
3 Current Approaches to Planning Experiments with Reliability Data .....	324
4 Motivating Example .....	325
5 Naive Two-Stage Analysis of Reliability Data with Sub-Sampling .....	326
5.1 First Stage of the Naive Analysis .....	327
5.2 The Second Stage: The Model Between Experimental Units .....	328
6 Joint Likelihood Approach .....	330
7 Extensions to Random Blocks with Sub-sampling .....	333
8 Conclusions and Future Research .....	335
References .....	335

<b>Bayesian <math>D</math>-Optimal Design Issues for Binomial Generalized Linear Model Screening Designs</b> .....	337
Edgar Hassler, Douglas C. Montgomery, and Rachel T. Silvestrini	
1 Introduction .....	337
2 Optimal Non-linear Design .....	341
3 Utility and Prior Specification .....	343
3.1 GLMs with Near Constant Responses .....	345
3.2 Simplified Priors and Shifted Models .....	347
3.3 Computational Difficulty .....	348
4 Poor Coverage and Few Design Points .....	349
5 Conclusion .....	351
References .....	352
<b>Bayesian Lasso with Effect Heredity Principle</b> .....	355
Hidehisa Noguchi, Yoshikazu Ojima, and Seiichi Yasui	
1 Introduction .....	355
2 Lasso and Bayesian Lasso .....	356
3 The Bayesian Lasso and the Effect Heredity Principle .....	357
3.1 Strong and Weak Heredity Models .....	357
3.2 Hierarchical Model .....	359
4 Example .....	360
4.1 12-Run Plackett–Burman Design .....	360
4.2 Blood Glucose Experiment Using Mixed-Level Design .....	363
5 Discussion .....	364
References .....	365
<b>Part IV Related Areas</b>	
<b>Comparative Study of Time Scales in Optimal Time Scale Analysis of Field Reliability Data</b> .....	369
Watalu Yamamoto and Kazuki Takeshita	
1 Introduction .....	369
2 Optimal Lifetime Scale .....	372
2.1 Models for Lifetime Scales .....	372
2.2 Estimation of Time Scales .....	372
2.3 Lifetime Scale Estimations for Competing Risks Cases .....	374
3 Time Scale Analysis of a Field Reliability Data .....	374
3.1 Case A .....	374
3.2 Case B .....	376
4 Simulation Study on the Properties of the Time Scale Estimator .....	377
4.1 Lifetime Scale Estimations Under Random Censoring or Competing Risks Cases .....	377
4.2 Lifetime Scale Estimations Under Misspecified Settings .....	379
5 Conclusion .....	382
References .....	383

<b>Why the Naive Bayesian Classifier for Clinical Diagnostics or Monitoring Can Dominate the Proper One Even for Massive Data Sets</b> .....	385
Hans - J. Lenz	
1 Introduction .....	385
2 Some Well-Known Definitions and Theorems .....	387
3 Estimation of Marginal and Conditional Probabilities Using a Clinical Database System .....	389
3.1 Strategy 1: Marginal Probability Estimation .....	389
3.2 Strategy 2: Direct Estimation .....	389
3.3 Strategy 3: Proper Bayesian Approach .....	390
3.4 Strategy 4: Idiot Bayes Approach .....	390
4 The Gammerman and Thatcher Study .....	391
5 Modeling and Estimation Accuracy .....	392
References .....	393
