Part I Fundamentals, Basic Information and Description of Bench Scale Calorimeters

1	Introduction	3
2	Bench Scale Calorimeter	7
2.1	Devices for Discontinuous Reactions	7
2.1.1	Isothermal Reaction	7
2.1.2	Non-isothermal Reaction	30
2.2	Device for Continuous Reaction	45
2.2.1	Isothermal Flow Calorimeter TKR	45
2.3	Device with Reflux Condenser for Isothermal, Discontinuous Reaction (Isothermal Condition)	48
2.4	Device with Reflux Condenser for Isothermal, Discontinuous Reaction (Boiling Condition)	49
2.5	Online Calorimeter (Sensor)	51
2.5.1	Working Mode and Design	52
2.5.2	Specification	58
3	Practical Hints	59
3.1	Standardization of Signal Accuracy of Electric Heating Powers in a Measuring Kettle, Intermediate Thermostat, and Reflux Condenser as well as the Stirring Power in a Measuring Kettle	59
3.1.1	Heating Power in Intermediate Thermostat	60
3.1.2	Stirrer Power in Measuring Kettle	60
3.1.3	Intermediate Thermostat of the Reflux Condenser	63
3.2	Attenuation of Interference Due to the Occasional Phenomenon of Vaporization and Condensation Within the Calorimeter During Isothermal Reactions	64
3.3	Instantaneous Dosing of Granule Material	65

3.4	Instantaneous Dosing of Slurry	65
3.5	Diminution of Interferences on Evaluation of Non-isothermal Net Measuring Results	67
4	Thermokinetic Analysis	73
4.1	Introduction	73
4.2	Elucidation of Rate and Enthalpy of Reaction on the Basis of Mathematical–Analytical Relations	78
4.2.1	Isothermal, Discontinuous Reaction	78
4.2.2	Isothermal, Continuous Reaction	146
4.2.3	Non-isothermal, Discontinuous Reaction	151
4.3	Elaboration of Rate Function and Enthalpy of Reaction on Basis of Electronic Data Processing (Numeric Evaluation)	160
4.4	Influence of Molecular Interaction on Thermal Reaction Power . . .	163
4.5	Estimating the Equilibrium Constant by Thermokinetic Measurements	169
5	Examples of Thermokinetic Investigations	173
5.1	Isothermal, Discontinuous, Constant-Volume Reactions	173
5.1.1	Reaction of a Sulphide with Hydrogen Peroxide	173
5.1.2	Belousow–Zhabotinski Reaction in a Closed Reactor	192
5.1.3	Reaction of Formic Acid with Hexamethylene-Diisocyanate	193
5.2	Non-isothermal, Discontinuous, Constant-Volume Reaction	197
5.2.1	Reaction of an Amine Hydrochloride and an Alkali Nitrite	197
5.2.2	Reaction of a Substituted Triazine with a Substituted Naphthylamine Sulphonic Acid in Water	201
5.3	Measurements of Online Calorimeter (Sensor)	208
 Part II Practical Information and Applications		
6	Use of the Described Calorimeters to Determine Additional Relevant Quantities in Chemical Engineering	215
6.1	Determining the Heat of Dilution, Solution, Mixture, Precipitation and Reaction	215
6.1.1	Isothermal Measurements	215
6.1.2	Non-isothermal Measurement	217
6.2	Determining Specific Heat of Filling in Measuring Kettle	222
6.3	Determining the Stirrer Power Within the Filling of the Measuring Kettle	223
6.4	Determining Fractional Conversion of a One-Step Reaction	224
6.5	Determination of Heat Transfer Coefficient of Measuring Kettle	225
6.6	Determining the Heat Transfer from the Batch Within a Tank Reactor to Its Coolant Medium	227

6.7 Calorimetric Investigation of Incrustation of Foreign Matter on
Superheated Metal (Fouling) 230

7 The Heat Flow Calorimeter by Regenass 233
