## **Part I Management of Water Resources: Challenges for Sustainability**

|                                                                                                                                                                             |           |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Hydro-geochemical Investigation and Quality Assessment of Groundwater for Drinking and Agricultural Use in Jawaharlal Nehru University (JNU), New Delhi, India .....</b> | <b>3</b>  |
| N. Janardhana Raju, Anurag Chaudhary, Sadaf Nazneen, Shubhra Singh, and Ankur Goyal                                                                                         |           |
| <b>Comparison of Relationship Between the Concentrations of Water Isotopes in Precipitation in the Cities of Tehran (Iran) and New Delhi (India).....</b>                   | <b>29</b> |
| Maryam Mosaffa, Farzin Nasiri Saleh, and Yousef Khalaj Amirhosseini                                                                                                         |           |
| <b>Geophysical Expression for Groundwater Quality in Part of Chittoor District, Andhra Pradesh, India .....</b>                                                             | <b>39</b> |
| S.Md. Farooq Basha                                                                                                                                                          |           |
| <b>Geospatial Analysis of Fluoride Contamination in Groundwater of Southeastern Part of Anantapur District, Andhra Pradesh .....</b>                                        | <b>61</b> |
| B. Muralidhara Reddy, V. Sunitha, and M. Ramakrishna Reddy                                                                                                                  |           |
| <b>Identification of Surface Water Harvesting Sites for Water Stressed Area Using GIS: A Case Study of Ausgram Block, Burdwan District, West Bengal, India.....</b>         | <b>75</b> |
| C. Prakasam                                                                                                                                                                 |           |
| <b>Forecasting Groundwater Level Using Hybrid Modelling Technique .....</b>                                                                                                 | <b>93</b> |
| Sumant Kumar and Surjeet Singh                                                                                                                                              |           |
| <b>Alterations in Physico-chemical Parameters of Water and Aquatic Diversity at Maneri-Bhali Phase I Dam Site on River Ganges in District Uttarkashi, Uttarakhand .....</b> | <b>99</b> |
| Madhu Thapliyal, Poonam Tiwari, and Ashish Thapliyal                                                                                                                        |           |

## **Part II Bio-remediation for Resource Enrichment**

|                                                                                                                                 |            |
|---------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Effective Removal of Heavy Metals and Dyes from Drinking Water Utilizing Bio-compatible Magnetic Nanoparticle .....</b>      | <b>115</b> |
| Dwiptirtha Chattopadhyay and Keka Sarkar                                                                                        |            |
| <b>UASBR: An Effective Wastewater Treatment Option to Curb Greenhouse Gas Emissions.....</b>                                    | <b>125</b> |
| Rajesh Singh and C.K. Jain                                                                                                      |            |
| <b>Biogas Upgrading and Bottling Technology for Vehicular and Cooking Applications .....</b>                                    | <b>135</b> |
| Virendra Kumar Vijay, Rimika Kapoor, Abhinav Trivedi, and Pradip Narale                                                         |            |
| <b>Use of Indigenous Bacteria from Arsenic Contaminated Soil for Arsenic Bioremediation.....</b>                                | <b>155</b> |
| Ivy Mallick, Sk Tofajjen Hossain, Sangram Sinha, and Samir Kumar Mukherjee                                                      |            |
| <b>Adsorption of Arsenite and Fluoride on Untreated and Treated Bamboo Dust .....</b>                                           | <b>167</b> |
| Sanjoy Kumar Nath and Krishna G. Bhattacharyya                                                                                  |            |
| <b>Reducing the Toxicity of Carbon Nanotubes and Fullerenes Using Surface Modification Strategy .....</b>                       | <b>181</b> |
| Jyoti Chawla and Arun Kumar                                                                                                     |            |
| <b>Phytoremediation Study and Effect of pH on Biomass Productivity of <i>Eichhornia crassipes</i> .....</b>                     | <b>193</b> |
| Ajay Kumar, Neetu Singh, Shilpa Gupta, Pallavi Joshi, Sukirti Tiwari, and Kavita Swaroop                                        |            |
| <b>Regeneration of White Oak (<i>Quercus leucotrichophora</i>) in Two Pine Invaded Forests in Indian Central Himalaya .....</b> | <b>205</b> |
| Satish Chandra Garkoti                                                                                                          |            |

## **Part III Environmental Pollution: Issues and Strategies**

|                                                                                                         |            |
|---------------------------------------------------------------------------------------------------------|------------|
| <b>Human Health Risk Assessment of Heavy Metals from Bhalaswa Landfill, New Delhi, India .....</b>      | <b>215</b> |
| Balsher Singh Sidhu, Dikshant Sharma, Tushar Tuteja, Smit Gupta, and Arun Kumar                         |            |
| <b>Transport of Trace Metals by the Rainwater Runoff in the Urban Catchment of Guwahati, India.....</b> | <b>225</b> |
| Upama Devi and Krishna G. Bhattacharyya                                                                 |            |
| <b>Analysis of Leachate Characteristics to Study Coal Ash Usability .....</b>                           | <b>241</b> |
| Pooja Vishnoi and M. Shambhavi Kamath                                                                   |            |

|                                                                                                                                                |            |
|------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| <b>Air Pollution Mapping and Quality Assessment Study<br/>at an Urban Area Tirupati Using GIS.....</b>                                         | <b>249</b> |
| M. Praveen Kumar, S. Venkata Mohan, and S. Jayarama Reddy                                                                                      |            |
| <b>Environmental Hazards and Conservation Approach<br/>to the Biodiversity and Ecosystem of the St. Martin's<br/>Island in Bangladesh.....</b> | <b>259</b> |
| Nurul Hoque Upal                                                                                                                               |            |
| <b>Uranium Toxicity in the State of Punjab in North-Western India .....</b>                                                                    | <b>271</b> |
| Alok Srivastava, Friedhart Knolle, Frieder Hoyler, Ulrich W. Scherer,<br>and Ewald Schnug                                                      |            |
| <b>Fluoride Toxicity in the Fluoride Endemic Villages<br/>of Gaya District, Bihar, India.....</b>                                              | <b>277</b> |
| Shahla Yasmin and Suneet Ranjan                                                                                                                |            |
| <b>Index.....</b>                                                                                                                              | <b>289</b> |

Management of Natural Resources in a Changing  
Environment

Raju, N.J.; Gossel, W.; Sudhakar, M. (Eds.)

2015, XVI, 298 p. 100 illus., 75 illus. in color., Hardcover

ISBN: 978-3-319-12558-9
