

Contents

1	Research Updates on Protein Folding	1
1.1	Protein Folding Problem and its Challenges	1
1.2	Research Contributions	2
2	Classes of Protein and Their Folding	13
2.1	Introduction	13
2.2	Structural Classes of Protein (Fig. 2.1)	14
2.3	Correlation of Protein Folding with Structural Classes	17
2.4	Protein Misfolding and Aggregation	24
2.5	Protein Folding Inside Cell	25
3	Energetics of Protein Folding and Significance of Intermediates	27
3.1	Introduction	27
3.2	Folding Mechanism and Kinetics	28
3.3	Role of Enthalpy and Entropy in Protein Folding	30
3.4	Energetics of Intermediates Formation in Protein Folding and Their Stabilization	33
4	Involvement of Bioinformatics in Solving Protein Folding Problem	39
4.1	Introduction	39
4.2	Understanding Energy Landscapes	40
4.3	Role of Energy Landscapes in Protein Folding	42
4.4	Computational Approaches to the Energy Landscapes of Protein Folding	43
4.5	Prediction of Protein Folding Pathways Using Various Servers	46
4.6	Future Prospects	47
	References	49

Protein Folding

Examining the Challenges from Synthesis to Folded
Form

Dwevedi, A.

2015, VII, 55 p. 6 illus., 4 illus. in color., Softcover

ISBN: 978-3-319-12591-6
