1	What Is Portfolio Analytics?	1
1.1	Fixed-Income Portfolio Management	1
1.2	Strategy	2
1.3	Tactics	4
1.3.1	Asset Classes vs. Risk Factors	5
1.4	Strategy and Tactics	7
1.5	Key Characteristics	8
1.5.1	Principles	10
1.6	An Appetizer	11
1.6.1	Exposure	12
1.6.2	Risk	13
1.6.3	Return	15
1.7	The Coming Chapters	16
	References	17

Part I From Risk Factors to Returns

2	Computing Exposures	21
2.1	A Starting Point	21
2.2	Simple Yield Exposure	22
2.3	Correcting for Our Linear Approximation	29
2.4	Time Exposure	31
2.5	Key-Rate Exposures	33
2.5.1	A Word of Caution	39
2.6	Spread Exposure	40
2.7	Foreign-Exchange Exposure	45
2.8	Concluding Thoughts	46
	Reference	46
3	A Useful Approximation	47
3.1	What We Want	48
3.2	The Taylor Series	50

3.3	Applying the Taylor Series	55
3.3.1	Adding Risk Factors	60
3.4	The Foreign-Exchange Dimension	62
3.5	Closing Thoughts.....	65
	References.....	66
4	Extending Our Framework.....	67
4.1	Handling Inflation-Linked Bonds	68
4.1.1	Revisiting Exposures	68
4.1.2	Adjusting our Useful Approximation	80
4.2	Handling Floating-Rate Notes	84
4.3	Handling Fixed-Income Derivatives Contracts	90
4.3.1	Interest-Rate Futures	90
4.3.2	Bond Futures.....	98
4.4	Closing Thoughts.....	109
	References.....	109
 Part II The Yield Curve		
5	Fitting Yield Curves	113
5.1	Getting Started.....	114
5.2	Yield Curves 101	117
5.2.1	Pure-Discount Bond Prices.....	118
5.2.2	Spot Rates	119
5.2.3	Par Yields	120
5.2.4	Implied-Forward Rates	124
5.2.5	Bringing It All Together	126
5.3	Curve-Fitting	128
5.3.1	The Classic Approach	129
5.3.2	Non-Classical Approaches	137
5.4	Concluding Thoughts	148
	References.....	148
6	Modelling Yield Curves	151
6.1	Why a Dynamic Yield-Curve Model?.....	152
6.2	Building a Model	159
6.2.1	\mathcal{A}_1	160
6.2.2	\mathcal{A}_2	162
6.2.3	\mathcal{A}_3	166
6.2.4	Bringing it All Together	167
6.3	A Statistical Digression	168
6.4	Model Examples.....	174
6.4.1	A Toy Example	174
6.4.2	A Complex Example	177
6.4.3	A Simpler Example.....	184
6.5	Concluding Thoughts	189
	References.....	190

Part III Performance

7	Basic Performance Attribution	195
7.1	A Single Security.....	200
7.1.1	Dealing with Cash-Flows	201
7.1.2	Revisiting Our Risk-Factor Decomposition	206
7.2	Attribution of a Single Fixed-Income Security	208
7.2.1	Carry Return	211
7.2.2	Credit-Spread Return	215
7.2.3	Treasury-Curve Return	215
7.2.4	Convexity Return	226
7.2.5	Foreign-Exchange Return	227
7.2.6	Pulling It All Together.....	228
7.3	Attribution of a Fixed-Income Portfolio	229
7.4	Closing Thoughts.....	241
	References.....	241
8	Advanced Performance Attribution	243
8.1	Truth in Advertising	244
8.2	Daily Attribution	246
8.3	A Simple Practical Example	251
8.3.1	The Very Fine Print.....	259
8.4	A Complicated Practical Example.....	260
8.4.1	An Experiment.....	260
8.4.2	Regression Analysis	261
8.4.3	An Invented Measure	264
8.4.4	Approximation Errors	265
8.5	Some Frustrating Mathematical Facts	267
8.6	Smoothing Returns	271
8.7	Concluding Thoughts	274
	References.....	274
9	Traditional Performance Attribution	277
9.1	Asset Allocation and Security Selection	278
9.2	The Roll-Down Effect.....	288
9.3	Concluding Thoughts	294
	References.....	294

Part IV Risk

10	Introducing Risk	297
10.1	Defining Risk.....	297
10.1.1	Determining Outcomes	298
10.1.2	Assigning Probabilities	299
10.1.3	Getting to Risk.....	300
10.2	A Simple Example	302

10.3	A More Complicated Example	306
10.3.1	Enter the Distribution.....	310
10.3.2	Relaxing Normality.....	312
10.3.3	The Role of Dependence	314
10.4	A Specific Risk Measure	317
10.4.1	Looking Backwards	319
10.4.2	Looking Forward	321
10.4.3	Comparing Forward- and Backward-Looking Perspectives	324
10.5	Using Tracking Error.....	326
10.6	Concluding Thoughts	328
	References.....	329
11	Portfolio Risk.....	331
11.1	The Punchline	334
11.2	Getting Started.....	336
11.2.1	Portfolio Weights	337
11.2.2	Incorporating Risk-Factor Exposures.....	340
11.2.3	Handling Market Movements	343
11.2.4	Computing Return Distributions	346
11.3	Understanding and Exploring Ω_R	348
11.3.1	Variance 101	348
11.3.2	Linking Covariance and Correlation.....	351
11.3.3	Classic and Alternative Estimators of Ω_R	353
11.3.4	Simulating Random Realizations	360
11.4	The Final Results.....	366
11.5	Attributing Risk	369
11.6	Concluding Thoughts	380
	References.....	381
12	Exploring Uncertainty in Risk Measurement	383
12.1	Sensitivity Analysis	384
12.1.1	Setting the Stage	385
12.1.2	The Data Frequency	388
12.1.3	Weighting Scheme.....	391
12.1.4	Role of Dependence	397
12.1.5	Summing Up	400
12.2	Backtesting	401
12.2.1	A Heuristic Perspective	402
12.2.2	A More Formal Perspective	405
12.2.3	Thinking Optimally.....	409
12.3	Concluding Thoughts	416
	References.....	416

Part V Risk and Performance

13	Combining Risk and Return	419
13.1	The Data	422
13.1.1	Understanding Our data	423
13.2	Dampening Return Noise	429
13.2.1	The Moving Average	429
13.2.2	The Hodrick–Prescott Filter	430
13.2.3	The Kernel Regression	431
13.2.4	An Engineering Approach	432
13.2.5	Model Comparison	434
13.2.6	Implications of Filtering	435
13.3	Combining Risk and Return	437
13.3.1	Moving to the Risk-Factor Level	441
13.4	So What?	442
13.5	Concluding Thoughts	444
	References	445
14	The Ex-Post World	447
14.1	Basic Statistical Analysis	448
14.2	Some Theory	459
14.2.1	Introducing β	460
14.2.2	Introducing α	463
14.2.3	α and β	465
14.3	Relative Risk	467
14.4	Risk-Adjusted Ratios	472
14.5	Beyond CAPM	479
14.6	Bringing It All Together	482
14.7	Concluding Thoughts	483
	References	484
A	Some Mathematical Background	485
A.1	Set Theory	486
A.2	Probability	487
A.2.1	Conditional Probability	489
A.2.2	Independence	491
A.3	Statistics	491
A.3.1	Distributions and Densities	492
A.3.2	Working with Distribution and Density Functions	496
A.3.3	Some Sample Statistical Distributions	497
A.3.4	Multivariate Statistics	504
A.4	Matrix Theory	508
A.4.1	Solving Linear Systems	511
A.4.2	Cholesky Decomposition	516
A.4.3	Eigenvalues and Eigenvectors	518
	References	523

B	A Few Thoughts on Optimization	525
B.1	A Linear Program	527
B.1.1	A Simple Case	528
B.1.2	Extending the Simple Case.....	532
B.2	Concluding Thoughts	533
	References.....	534
	Index.....	535
	Author Index.....	541

Fixed-Income Portfolio Analytics

A Practical Guide to Implementing, Monitoring and
Understanding Fixed-Income Portfolios

Bolder, D.J.

2015, XXVII, 544 p. 170 illus., 15 illus. in color.,

Hardcover

ISBN: 978-3-319-12666-1
