

Contents

1 Introduction	1
1.1 SMBHs in Our Universe	1
1.1.1 Observed SMBHs	3
1.1.2 SMBH Formation and Growth	4
1.1.3 Stellar Tidal Disruption	6
1.2 Tidal Disruption Basics	7
1.2.1 The Newtonian Picture	7
1.2.2 The Role of General Relativity	11
1.3 Tidal Disruption Event Rates	12
1.3.1 Two Body Relaxation	12
1.3.2 Resonant Relaxation	14
1.3.3 Alternative Relaxational Mechanisms	16
1.4 Dynamics of Disruption	17
1.4.1 Vertical Collapse and Crunch: (Semi-)Analytic	17
1.4.2 Vertical Collapse and Crunch: Hydrodynamic Simulations	20
1.4.3 Debris Expansion and Circularization	21
1.5 Accretion of Circularized Debris	23
1.6 Observed Flares	27
1.6.1 X-ray and UV Observations	27
1.6.2 Optical Detection of TDEs	28
1.6.3 Relativistic TDEs	29
2 Tidal Disruption Rates from Two-Body Relaxation	31
2.1 Introduction	31
2.2 Two Body Relaxation	31
2.3 Tidal Disruption Rates in Realistic Galaxies	35
3 Prompt Tidal Disruption of Stars as an Electromagnetic Signature of Supermassive Black Hole Coalescence	41
3.1 Introduction	41
3.2 Tilting the Loss Cone	43

3.3	The Final Parsec Problem	45
3.3.1	Dry Mergers	47
3.3.2	Wet Mergers	48
3.4	Other Considerations	49
3.5	Event Rates	50
3.6	Discussion	52
4	Tidal Disruption Flares of Stars From Moderately Recoiled Black Holes	55
4.1	Introduction	55
4.2	Model	57
4.2.1	Gravitational Wave Recoil	57
4.2.2	Tidal Disruption Emission	59
4.2.3	Host Galaxy Structure	60
4.2.4	Interactions with the Galaxy	64
4.2.5	Interactions with the Bound Cloud	67
4.2.6	Observability of Recoil-Induced TDEs	69
4.3	TDE Rate	70
4.4	Results and Discussion	72
4.5	Conclusions	78
5	Consequences of Strong Compression in Tidal Disruption Events	81
5.1	Introduction	81
5.2	Dynamical Energy Spread	82
5.3	Free Solutions, and Free Collapse	84
5.4	Total Vertical Collapse and Bounce	93
5.5	Desynchronization	96
5.5.1	Desynchronized Free Solutions	97
5.5.2	Validity of Free Solutions in One Dimension	97
5.5.3	Validity of Free Solutions in Three Dimensions	100
5.6	General Relativistic Corrections	104
5.7	Gravitational Waves	106
5.8	Observational Implications	108
5.9	Discussion	111
6	General Relativistic Effects in Tidal Disruption Flares	115
6.1	Introduction	115
6.2	SMBH Spin and the Hills Mass	116
6.2.1	The Kerr Metric	116
6.2.2	Relativistic Tidal Tensors	119
6.2.3	The Relativistic Hills Mass	120
6.3	Multiple Compressions	120
6.4	Circularization of Debris	122

7 Observing Lense-Thirring Precession in Tidal Disruption Flares 129

 7.1 Introduction 129

 7.2 Spin Evolution of a Tilted Disk 130

 7.3 Differential Stream Precession 132

 7.4 Observational Implications 134

8 Conclusions and Future Directions 137

Appendices 143
