

Contents

1	Introduction	1
2	Preliminaries	5
2.1	The Bochner and the Pettis Integral	5
2.2	Stochastic Processes in Banach Spaces	10
2.3	Martingales in Banach Spaces	13
2.4	Poisson Random Measures	15
2.5	Characteristic Functions	20
2.6	Remarks and Related Literature	23
3	Stochastic Integrals with Respect to Compensated Poisson Random Measures	25
3.1	The Wiener Integral with Respect to Compensated Poisson Random Measures	25
3.2	Lévy Processes	38
3.3	The Lévy–Itô Decomposition in Banach Spaces	43
3.4	Isomorphisms for Spaces of Predictable Processes	49
3.5	The Itô Integral	52
3.6	Integration with Respect to Martingales	66
3.7	Itô’s Formula	73
3.8	Remarks and Related Literature	85
4	Stochastic Integral Equations in Banach Spaces	87
4.1	Existence and Uniqueness Results for Non-Markovian Solutions	87
4.2	Existence and Uniqueness of Markovian Solutions in $D([0, T], F)$	92
4.3	Existence and Uniqueness of Markovian Solutions Under Local Lipschitz Conditions	97

4.4	Continuous Dependence on Initial Data, Coefficients and the Markov Property	99
4.5	Remarks and Related Literature	103
5	Stochastic Partial Differential Equations in Hilbert Spaces	105
5.1	Elements of Semigroup Theory	105
5.2	Existence and Uniqueness of Solutions of SPDEs Under Adapted Lipschitz Conditions	112
5.3	Existence and Uniqueness of Solutions of SPDEs Under Markovian Lipschitz Conditions	116
5.4	The Markov Property of the Solution of SPDEs	121
5.5	Existence of Solutions for Random Coefficients	124
5.6	Continuous Dependence on Initial Data, Drift and Noise Coefficients	127
5.7	Differential Dependence of the Solutions on the Initial Data	129
5.8	Remarks and Related Literature	133
6	Applications	135
6.1	The HJMM Equation from Interest Rate Theory	135
6.1.1	Introduction to the HJMM Equation	135
6.1.2	The Space of Forward Curves and Mild Solution to the HJMM Equation	138
6.1.3	Forward Curve Evolutions as Strong Solutions of Infinite-Dimensional Stochastic Differential Equations	144
6.2	A Bayes Formula for Non-linear Filtering with Gaussian and Cox Noise	149
6.2.1	Introduction to the Problem	149
6.2.2	Reproducing Kernel Hilbert Space and Stochastic Processes	151
6.2.3	The Filter Setting and a Bayes Formula	153
6.2.4	Zakai Type Equations	158
6.3	Remarks and Related Literature	163
7	Stability Theory for Stochastic Semilinear Equations	165
7.1	Exponential Stability in the Mean Square Sense	165
7.2	Exponential Ultimate Boundedness in the Mean Square Sense . . .	179
7.3	Invariant Measures	185
7.4	Remarks and Related Literature	193
	Appendix A: Some Results on Compensated Poisson Random Measures and Stochastic Integrals	195
	References	203
	Index	209

Stochastic Integration in Banach Spaces

Theory and Applications

Mandrekar, V.; Rüdiger, B.

2015, VIII, 211 p., Hardcover

ISBN: 978-3-319-12852-8
