

Contents

Molecular Modeling of pH-Dependent Properties of Emeraldine Base Polyaniline for pH-Based Chemical Sensors	1
Xianping Chen, Cell K.Y. Wong, Tianling Ren, Daoguo Yang, Junke Jiang, Qihua Liang, and Guoqi Zhang	
Two Approaches of Study Cu/Epoxy Interface Enhancement with Benzenethiol Promoter	19
Peng He, Haibo Fan, and Matthew M.F. Yuan	
Molecular Dynamics Simulation of Pore Formation Mechanism for Deposition of Poly(vinylidene fluoride-co-trifluoroethylene) on Gold Substrate	29
W. Hau, N. Iwamoto, H.B. Fan, G.D. Zhu, J. Wang, and M.M.F. Yuen	
Microelectronics Packaging Materials: Investigating the Influence of Moisture by Molecular Dynamics Simulations	41
Ole Hölck and Bernhard Wunderle	
Analysis of the Adhesion Work with a Molecular Modeling Method and a Wetting Angle Measurement	67
Dawid Jan Król, Artur Wymysłowski, and Kamil Nouri Allaf	
Using Coarse-Grained Molecular Models (Molecular-Mesoscale) of a Copper Oxide-Epoxy Interface to Obtain Stress–Strain Failure Predictions Which Include Interfacial Roughness, Water and Filler Effects	81
Nancy E. Iwamoto	

Establishment of the Mesoscale Parameters for Separation: A Nonequilibrium Molecular Dynamics Model	133
Cell K.Y. Wong, S.Y.Y. Leung, R.H. Poelma, K.M.B. Jansen, C.C.A. Yuan, W.D. van Driel, and G.Q. Zhang	
Mechanics of Graphene and Carbon Nanotubes Under Uniaxial Compression and Tension	149
R.H. Poelma and G.Q. Zhang	
Analysis of an Influence of a Conversion Level on Simulation Results of the Crosslinked Polymers	175
Sebastian J. Tesarski, Artur Wymysłowski, and Kamil Nouri Allaf	

Molecular Modeling and Multiscaling Issues for
Electronic Material Applications

Volume 2

Wymysłowski, A.; Iwamoto, N.; Yuen, M.; Fan, H. (Eds.)

2015, X, 194 p. 153 illus., 77 illus. in color., Hardcover

ISBN: 978-3-319-12861-0
