1 Introduction	1
Tomoko Sano, Charles L. Rando and Chang-Soo Kim	
1.1 Introduction	2
1.2 Hybrid Composites	3
1.3 Hierarchical Composites	4
1.4 Concluding Remarks	6
References	7

Part I Hybrid Composites

2 Organic–Inorganic Polymer Hybrids: Synthetic Strategies and Applications	11
Theodora Krasia-Christoforou	
2.1 Introduction	11
2.2 Synthetic Strategies for the Preparation of Organic–Inorganic Polymer Hybrids	12
2.2.1 Blending	13
2.2.1.1 Solution and Melt Blending	13
2.2.1.2 Powder Blending	14
2.2.2 Sol–Gel Synthesis	15
2.2.2.1 Basics of the Sol–Gel Method	15
2.2.2.2 In Situ Preparation of Polymer-Based Hybrids via Sol–Gel	17
2.2.2.3 Structurally Defined Polymer-Based Hybrids by Sol–Gel	19
2.2.3 Emulsion Polymerization	21
2.2.4 Metallosupramolecular and Coordination Approaches	22
2.2.5 Photopolymerization	23
2.2.6 Intercalation	24
2.2.7 Microwave Irradiation	24
2.2.8 Electrochemical Synthesis	25

2.2.9	Surface Grafting	26
2.2.9.1	Surface-Initiated Polymerization (the “grafting from” Approach)	26
2.2.9.2	Post-modification (the “grafting to” Approach)	26
2.2.9.3	The “grafting through” Approach	27
2.2.10	Self-Assembly	28
2.2.11	Amphiphilic Block Copolymer-Mediated Synthetic Approaches	29
2.3	Applications of Organic–Inorganic Polymer Hybrids	32
2.3.1	Sensing	32
2.3.2	Biomedicine	34
2.3.3	Energy	36
2.3.3.1	Hybrid Solar Cells	36
2.3.3.2	Hybrid Fuel Cells	39
2.3.3.3	Hybrid Nanocomposites: Thermoelectrics	41
2.3.3.4	Hybrid Energy Storage Devices: Hydrogen Storage, Batteries, and Capacitors	42
2.3.4	Catalysis	43
2.3.5	Optoelectronics	45
2.3.6	Environmental (Water) Remediation	47
2.3.7	Construction, Automotive and Coatings	48
2.4	Conclusions and Outlook	49
	References	50
3	Polymer-Tethered Nanoparticle Materials—An Emerging Platform for Multifunctional Hybrid Materials	65
	Golda L. Chakkalakal, Subramanian Ramakrishnan and Michael R. Bockstaller	
3.1	Introduction	66
3.2	Synthesis of Polymer-Tethered (Nano) Particle Interfaces	68
3.2.1	Surface Modification by Surface-Initiated Atom Transfer Controlled Radical Polymerization	69
3.2.2	Fundamentals of SI-ATRP	71
3.2.2.1	Initiation	72
3.2.2.2	Propagation	73
3.2.2.3	Exchange Reactions	73
3.2.2.4	Termination	74
3.2.3	Toward More Complex Polymer-Graft Architectures with SI-ATRP	74
3.3	Role of Polymer-Graft Modification on the Interaction, Dynamics, and Assembly of Particle Brush Materials	76
3.4	Conclusions and Future Directions	85
	References	90

4 Multiferroic Magnetoelectric Composites/Hybrids	95
Yongke Yan and Shashank Priya	
4.1 Introduction	97
4.2 Materials Constituent: Piezoelectrics	99
4.2.1 Piezoelectrics and Ferroelectrics	99
4.2.2 Composition Selection Methodology	103
4.2.3 Microstructure Design Methodology	104
4.2.4 Piezoelectric Materials	110
4.3 Materials Constituent: Magnetostriction	110
4.3.1 Magnetostriction	110
4.3.2 Magnetostriction Materials	112
4.4 Composite Design and Interface Coupling	113
4.4.1 Connectivity Schemes	113
4.4.2 Working Modes of ME Composites	114
4.4.3 Interface Coupling	115
4.5 Important Hybrid Material Systems	117
4.5.1 Overview of Fabrication Process	117
4.5.2 ME Composite/Hybrid with 0–3 Connectivity	118
4.5.3 ME Composite/Hybrid with 2–2 Connectivity	123
4.5.4 ME Composite/Hybrid with 1–3 Connectivity	139
4.5.5 ME Composite/Hybrid with 2–3 Connectivity	141
4.6 Scaling Effect	142
4.6.1 Critical Size in Ferroelectric Materials	142
4.6.2 Critical Size in Ferromagnetic Materials	144
4.6.3 Coupling Mechanism	145
4.7 Theoretical Models for ME Composites	146
4.7.1 Low-Frequency ME Effect in Free Standing Bilayers	147
4.7.2 ME Effect at EMR	148
4.8 Application of ME Composite	149
4.8.1 ME Magnetic Field Sensors	150
4.8.2 ME Energy Harvesters	154
4.9 Summary and Future Perspective	156
References	157
5 Clay/Polymer Nanocomposites:	
Processing, Properties, and Applications	161
Vasanth Chakravarthy Shunmugasamy, Chongchen Xiang and Nikhil Gupta	
5.1 Introduction	161
5.2 Applications of Nanoclay Composites	162
5.2.1 Flame Retardant Materials	163
5.2.2 Drug Delivery System	164

5.3	Components	164
5.3.1	Clay	164
5.3.1.1	Group 1:1—Kaolin Group	165
5.3.1.2	Group 2:1—Smectite Group	165
5.3.1.3	Group 2:1—Illite Group	166
5.3.1.4	Group 2:2—Chlorite Group	166
5.3.1.5	Surface Modification	166
5.3.2	Epoxy	166
5.3.3	Clay/Epoxy Morphology	167
5.4	Fabrication of Clay/Epoxy Nanocomposites	173
5.4.1	Mechanical Processing Methods	174
5.4.2	Chemical Methods	178
5.5	Properties of Clay/Epoxy Nanocomposites	179
5.5.1	Tensile Properties	179
5.5.2	Flexural Properties	182
5.5.3	Glass Transition Temperature	182
5.5.4	Transport Properties	186
5.6	Modeling and Simulations	186
5.6.1	Flexural Modulus	186
5.6.2	Tensile Modulus	188
5.6.3	Molecular Simulation Studies	191
	Summary	195
	References	196

Part II Hierarchical Composites

6	Medical Applications of Hierarchical Composites	203
	Manoj Kumar R, Khelendra Agrawal and Debrupa Lahiri	
6.1	Introduction	203
6.2	Types of Hierarchically Structured Composites in Medical Applications	204
6.2.1	Ceramics-Based Hierarchically Structured Composite	205
6.2.2	Collagen-Based Hierarchically Structured Composite	211
6.2.3	Inorganic/Organic Polymer-Based Hierarchical Structured Composites	213
6.3	Processing of Hierarchical Composites for Medical Applications	215
6.4	Properties of Hierarchical Composites	219
6.4.1	Mechanical Properties	219
6.4.2	Biological Properties	222
6.5	Medical Applications of Hierarchical Composite	224
6.5.1	Tissue Engineering	224
6.5.2	Drug Delivery Agent	225
6.6	Composite Modeling and Simulation	229
6.7	Challenges and Future Direction	231
	Conclusions	232

7 Electrochemical Hierarchical Composites	239
Yu Zhao, Lele Peng and Guihua Yu	
7.1 Introduction	239
7.2 Applications in Energy Storage	241
7.2.1 Supercapacitors	242
7.2.1.1 Basic Working Mechanisms of ECs	242
7.2.1.2 Hierarchical Carbon-Based Materials for ELDCs	244
7.2.1.3 Hierarchical Carbon-TMO Composites for Pseudocapacitors	246
7.2.1.4 Hierarchical Carbon-Conducting Polymer Composites for Pseudocapacitors	250
7.2.2 Li-Ion Batteries	254
7.2.2.1 Hierarchical Alloy Anodes	255
7.2.2.2 Hierarchical TMOs Anodes	259
7.2.2.3 Hierarchical Alloy/Conductive Polymer Composite Electrodes	262
7.3 Applications in Energy Conversion	265
7.3.1 Photoelectrochemical Cells	265
7.3.2 Fuel Cell Electrode Scaffold/Catalyst	268
7.4 Applications in Biosensing Devices	272
7.5 Concluding Remarks	277
