

Contents

1	Introduction	1
1.1	Noise Reduction	1
1.2	Organization of the Work	2
	References	2
2	Conceptual Framework	3
2.1	Signal Model	3
2.2	Principle of the Conceptual Framework	4
2.3	Performance Measures	6
2.4	Mean-Squared-Error (MSE) Based Criterion	9
2.5	Summary	12
	References	13
3	Single-Channel Noise Reduction in the Time Domain	15
3.1	Signal Model	15
3.2	Linear Filtering	17
3.3	Performance Measures	18
3.4	MSE-Based Criterion	20
3.5	Optimal Filters	22
3.6	Simulations	24
	References	30
4	Single-Channel Noise Reduction in the STFT Domain with Interframe Correlation	31
4.1	Signal Model	31
4.2	Linear Filtering	33
4.3	Performance Measures	34
4.4	MSE-Based Criterion	39
4.5	Optimal Filters	41
4.6	Particular Case	44
4.7	Simulations	44

References	50
5 Binaural Noise Reduction in the Time Domain	51
5.1 Signal Model.....	51
5.2 Widely Linear Filtering	53
5.3 Performance Measures	56
5.4 MSE-Based Criterion	58
5.5 Optimal Filters	61
5.6 Simulations	62
References	65
6 Multichannel Noise Reduction in the STFT Domain	67
6.1 Signal Model.....	67
6.2 Linear Filtering	70
6.3 Performance Measures	71
6.4 MSE-Based Criterion	75
6.5 Optimal Filters	77
6.6 Simulations	81
References	86
Index	87

A Conceptual Framework for Noise Reduction

Benesty, J.; Chen, J.

2015, VIII, 89 p. 11 illus. in color., Softcover

ISBN: 978-3-319-12954-9
