

Contents

Part I Historical Foundations

1 Introduction (Ignotum Per Ignotius: A Motto)	3
2 Mind–Body Issue	7
Free-Will Construct	9
Philosophical Doctrines	9
3 Localization Issue	15

Part II Functional Neural Systems Theory

4 Basic Functional Brain Units	35
First Functional Unit	36
Second Functional Unit	37
Third Functional Unit	38
5 Functional Cortical Levels Within Units 2 and 3	45
Primary Projection Areas and Secondary Association Areas	45
Tertiary Association Areas	50
6 Functional Cerebral Systems Theory: An Integrated Brain	53
Wernicke–Geschwind Model	53

Part III Three Functional Brain Units

7 Arousal Syndromes: First Functional Unit Revisited	61
Brain-Stem Sleep Mechanisms and Sleep Disorders	61
Functional Sleep Neuroanatomy	78
Functional Sleep Psychopharmacology	79
Acetylcholine	79
The Indolamines	81
The Catecholamines	82

8 Sensation and Perception: Second Functional Unit Revisited	85
Visual Systems	86
Somatosensory Systems	100
Touch and Pressure	103
Temperature	107
Pain	108
Higher Cortical Processing	111
Auditory Systems	121
Vestibular Systems: Dizziness and Falling	135
Three Chemical Senses?	139
Common Chemical Sense	139
Olfaction	140
Pheromones	148
Gustation	150
9 Motor Functions: Third Functional Unit Revisited	155
Muscle Control: Strength, Coordination, and Endurance	155
Pyramidal Motor System	155
Extrapyramidal Motor System	160
 Part IV Clinical Syndromes	
10 Thalamic and Hypothalamic Syndromes	169
Thalamic Syndromes	169
Thalamic Pain Syndrome	172
Thalamic Sleep Syndrome: Stage 2 Sleep Disorder	175
Hypothalamic Syndromes	176
11 Syndromes of the Left Brain	181
Dysphasia	181
Dyslexia	196
Dysgraphia	198
Dyslexia with Dysgraphia and Dyslexia Without Dysgraphia	200
Dyspraxia	205
Gerstmann's Syndrome	209
Left-Right and Body-Part Confusion	212
12 Syndromes of the Right Brain	215
Limb Alienation Syndrome	216
Aprosodia	218
Amusia	221
Spatial Processing Disorders	224
Visual Spatial	224
Auditory Spatial	227

Vestibular Spatial	228
Somatic Spatial	230
Olfactory Spatial	231
Facial Recognition	232
Place Recognition	238
Dressing Apraxia	241
Constructional Disorders	241
Geographical Confusion	245
Neglect Disorders	247
Emotional Disorders	260
13 Mixed Brain Syndromes	263
Foreign-Accent Syndrome	263
14 Frontal Lobe Syndromes	267
Sensory Thresholds or Sensitivity	270
Startle Responses, Orienting Responses, and Habituation	271
Reflex Regulation and Hyperreflexia	273
Amotivational/Apathetic Syndrome and the Social Anarchist	281
Intelligence and Memory	285
Inertia and Perseveration	288
Executive Functions	293
Effortful Control	300
Motor and Premotor Syndromes	304
Distractibility: Frontal Eye Fields	308
Delayed-Response Deficits	312
Hypokinesia and Mutism: Supplementary Motor	318
Part V Diagnostic Nomenclature	
15 Neuropsychopathology	325
Part VI Functional Brain Asymmetry	
16 Two Brains, Two Kidneys, Two Lungs:	
Functional Brain Asymmetry	333
Disconnection Syndromes	336
Alien-Limb Syndrome	337
17 Self-Awareness	345
Anosognosia and Anosodiaphoria	345
Body Part Awareness and Gestures	353
Limb Alienation Syndrome	355
18 Attributions and Appraisal	357

19 Confabulation of Speech, Faces, and Places	365
20 Logical Linguistic and Affective Prosodic Speech	377
Propositional Speech	377
Nonpropositional Speech	381
21 Social Approach and Social Avoidance	383
22 Positive and Negative Emotion	389
Right Hemisphere Model	389
The Valence or Balance Model	396
Behavioral Inhibition System/Behavioral Activation System	399
Approach/Withdrawal Model	400
Optimistic Anticipation of Future Events and Negative Reflection on Past Events	402
Dominance and Submission Model	404
Transient Neutral and Persistence Emotional Memory Model	405
Dynamic Functional Capacity Model	406
23 Light and Dark	415
24 Arousal Theory	427
Classic Arousal Theory	427
25 Right Hemisphere and Arousal	437
26 Parasympathetic and Sympathetic Tone	441
Sweet Memories and Rapid Heart Rate	441
Cerebral Laterality and the Autonomic Nervous System	442
27 Fast Energetic “Happy-Go-Lucky” and Slow “Cautious” Response Styles	455
28 Personal, Peripersonal, and Extrapersonal Space	461
29 Relationships: Proximal and Distal	467
30 Right Hemi-aging Theory	469
31 Right Hemisphere and Pain	475

Part VII Brain Pathology

32 Circulatory Systems	481
Vascular Pathology	483
Imaging Issues	483
Vascular Diseases	486
Types of Vascular Pathology	487
Blood Supply to the Brain and Brain Stem	488
Anterior Cerebral Artery	493
Middle Cerebral Artery	495
Posterior Cerebral Artery	497
Hemispheric Laterality and Stroke	500
Ventricular Pathology	501
33 Neurodegenerative Disorders	505
34 Traumatic Brain Injury	509
References	513
Index	589

Brain Asymmetry and Neural Systems
Foundations in Clinical Neuroscience and
Neuropsychology

Harrison, D.W.

2015, XIX, 613 p. 159 illus., 138 illus. in color.,

Hardcover

ISBN: 978-3-319-13068-2
