1	Introduction to Location Science	1
	Gilbert Laporte, Stefan Nickel, and Francisco Saldanha da Gama	
1.1	Introduction	1
1.2	The Roots	2
1.3	Towards a New Science	7
1.4	Purpose and Structure of This Book	9
1.5	How to Use This Book	10
	References	17
 Part I Basic Concepts		
2	The p-Median Problem	21
	Mark S. Daskin and Kayse Lee Maass	
2.1	Introduction	21
2.2	Model Properties	22
2.3	The p -Median Problem on a Tree	23
2.4	Model Formulation	25
2.5	Solution Heuristics for the p -Median Model	
	on a General Network	26
2.5.1	Basic Construction and Improvement Algorithms	26
2.5.2	Metaheuristics for the p -Median Problem	29
2.5.3	A Lagrangian Heuristic for the p -Median Problem	30
2.6	Computational Results	32
2.7	Multi-objective Extensions of the p -Median Model	40
2.8	Conclusions	44
	References	44

3	Fixed-Charge Facility Location Problems	47
	Elena Fernández and Mercedes Landete	
3.1	Introduction	47
3.2	Overview and Modeling Issues	49
3.2.1	Set Partitioning Formulation of FLPs	53
3.3	Solution Algorithms for Fixed-Charge Facility Location	54
3.3.1	Lagrangian Relaxation	55
3.3.2	The Pricing Problem for SPSFLP	58
3.4	The Uncapacitated Facility Location Problem	58
3.4.1	Bounds for UFLP Derived from LP Duality	60
3.4.2	The UFLP as the Optimization of a Supermodular Set Function	62
3.5	Polyhedral Analysis of the UFLP	67
3.5.1	Extreme Points	68
3.5.2	Valid Inequalities and Facets	69
3.5.3	Lifting Procedures	71
3.6	Conclusions	72
	References	73
4	p-Center Problems	79
	Hatice Calik, Martine Labbé, and Hande Yaman	
4.1	Introduction	79
4.2	Polynomial Cases, Complexity and Approximation Results	81
4.3	Exact Methods for p -Center Problems	82
4.4	Heuristics	86
4.5	Variants	87
4.5.1	The Capacitated p -Center Problem	87
4.5.2	The Conditional p -Center Problem	88
4.5.3	The Continuous p -Center Problem	89
4.5.4	The p -Center Problem with Uncertain Parameters	90
4.6	Conclusions	90
	References	91
5	Covering Location Problems	93
	Sergio García and Alfredo Marín	
5.1	Introduction	93
5.2	Models	95
5.3	Theoretical Results	103
5.4	Solution Methods	104
5.5	Approximate Solution Methods	105
5.6	Lagrangian Relaxation	107
5.7	Continuous Covering Location Problems	109
5.8	Conclusions	110
	References	111

6	Anti-covering Problems	115
	Emilio Carrizosa and Boglárka G.-Tóth	
6.1	Introduction	115
6.2	Regional Covering Model	117
6.2.1	Individual-Facility Interactions	117
6.2.2	Facility-Facility Interactions	122
6.2.3	The Anti-covering Model	123
6.3	Computational Approach	124
6.4	Numerical Examples	126
6.5	Conclusions	129
	References	130

Part II Advanced Concepts

7	Location of Dimensional Facilities in a Continuous Space	135
	Anita Schöbel	
7.1	Introduction	135
7.2	Location of Dimensional Facilities	136
7.3	Locating Lines and Hyperplanes	138
7.3.1	Applications	138
7.3.2	Ingredients for Analyzing Hyperplane Location Problems	140
7.3.3	The Minsum Hyperplane Location Problem	142
7.3.4	The Minmax Hyperplane Location Problem	146
7.3.5	Algorithms for Minsum and Minmax Hyperplane Location	148
7.3.6	Ordered Median Line and Hyperplane Location Problem	151
7.3.7	Some Extensions of Line and Hyperplane Location Problems	152
7.4	Locating Circles and Spheres	155
7.4.1	Applications	156
7.4.2	Distances Between Points and Hyperspheres	157
7.4.3	The Minsum Hypersphere Location Problem	158
7.4.4	The Minmax Hypersphere Location Problem	161
7.4.5	Some Extensions of Circle Location Problems	164
7.5	Locating Other Types of Dimensional Facilities	166
7.5.1	Locating Line Segments	166
7.6	Conclusions	169
	References	171
8	Facility Location Under Uncertainty	177
	Isabel Correia and Francisco Saldanha da Gama	
8.1	Introduction	177
8.2	Uncertainty Issues	178

8.3	Robust Facility Location Problems	179
8.4	Stochastic Facility Location Problems	185
8.5	Chance-Constrained Facility Location Problems	194
8.6	Challenges and Further Reading	196
8.6.1	Multi-Stage Stochastic Programming Models	196
8.6.2	Solution Methods	197
8.6.3	Scenario Generation	199
8.6.4	Other Notes	199
8.7	Conclusions	200
	References	200
9	Location Problems with Multiple Criteria	205
	Stefan Nickel, Justo Puerto, and Antonio M. Rodríguez-Chía	
9.1	Introduction	205
9.2	1-Facility Planar/Continuous Location Problems	207
9.2.1	Polyhedral Planar Minisum Location Problems	213
9.3	Network Location Problems	225
9.3.1	1-Facility Median Problems	225
9.3.2	Other Multicriteria Location Problems on Networks	240
9.4	Discrete Location Problems	240
9.4.1	Model and Notation	241
9.4.2	Determining the Entire Set of Pareto-Optimal Solutions	242
9.4.3	Determining Supported Pareto-Optimal Solutions	244
9.5	Conclusions	245
	References	246
10	Ordered Median Location Problems	249
	Justo Puerto and Antonio M. Rodríguez-Chía	
10.1	Introduction	249
10.2	The Ordered Median Function	251
10.3	The Continuous Ordered Median Problem	254
10.3.1	The Single Facility Polyhedral Ordered Median Location Problem	254
10.3.2	Generalized Continuous Ordered Median Location Problems	260
10.4	The Ordered Median Problem on Networks	268
10.4.1	The Single Facility Ordered Median Problem	268
10.4.2	The p -Facility Ordered Median Problem	271
10.5	The Capacitated Discrete Ordered Median Problem	278
10.5.1	A Three-Index Formulation	279
10.5.2	A Covering Formulation and Some Properties	280
10.6	Conclusions	286
