

Contents

1	Introduction	1
1.1	Tracers, Fingerprints, and Riverine Sediments	1
1.2	Book Format and Overview	6
	References	8
2	Geochemical Fingerprinting	11
2.1	Introduction	11
2.2	Conceptual Model and Inherent Assumptions	14
2.3	Methodological Approach	19
2.3.1	Source Delineation	19
2.3.2	Collection and Characterization of River Sediment	20
2.3.3	Identifying Effective Geochemical Fingerprints	23
2.3.4	Inverse/Unmixing Models	27
2.4	Applications	33
2.5	Use of Geochemical Fingerprinting as a Management Tool	41
	References	43
3	Fallout Radionuclides	53
3.1	Introduction	53
3.2	Lead-210, Cesium-137 and Beryllium-7: General Characteristics	54
3.3	Applications	60
3.3.1	Use as a Geochemical Tracer to Determine Sediment Provenance	60
3.3.2	Determination of Sediment Redistribution and Erosion Rates	63
3.4	Estimating Sediment Age, Residence Times, Transport Distances, and Other Contemporary Sedimentation Processes	74
3.5	Use of Fallout Radionuclides as an Age Dating Tool	81
	References	82

4 Radiogenic Isotopes	89
4.1 Introduction	89
4.2 Sr and Nd Isotopic Systems	90
4.2.1 Tracing Sediments and Other Geological Materials	90
4.2.2 Tracing Contaminated Particles	96
4.3 Pb Isotopes	99
4.3.1 General Characteristics	99
4.3.2 Applying Pb Isotopes as a Tracer in Riverine Environments	101
4.4 Summary and Management Implications	109
References	112
5 Stable ‘Non-Traditional’ Isotopes	117
5.1 Introduction	117
5.2 Zn and Cd Isotopes	120
5.2.1 Use of Zn Isotopes as Contaminated Sediment Tracers	121
5.2.2 Use of Cd Isotopes as Contaminated Sediment Tracers	126
5.3 Copper Isotopes	128
5.4 Mercury Isotopes	131
5.5 Summary and Management Implications	133
References	134
Appendix A: Abbreviations, Unit Conversions, and Elemental Data	139

Application of Geochemical Tracers to Fluvial Sediment

Miller, J.; Mackin, G.; Orbock Miller, S.M.

2015, X, 142 p. 40 illus. in color., Softcover

ISBN: 978-3-319-13220-4
