

Contents

1	Process Planning in Machining	1
1.1	Introduction	1
1.2	Setup Planning: Core of Process Planning	3
1.2.1	Features of a Part	4
1.2.2	Part Dimensions	6
1.2.3	Tolerances	7
1.2.4	Datum	8
1.3	Computer-Aided Setup Planning	10
1.4	Constraints in Setup Planning	11
1.4.1	Tool Approach Direction (TAD) of a Feature	11
1.4.2	Tolerance Requirements	13
1.4.3	Feature Interaction and Precedence Constraints	14
1.4.4	Fixturing Constraints	14
1.4.5	Datum and Reference Constraints	14
1.4.6	Constraints of Good Manufacturing Practice	15
1.5	Approaches of Process Planning	15
1.5.1	Variant CAPP	15
1.5.2	Generative CAPP	17
1.6	Setup Planning for Prismatic Parts	19
1.7	Setup Planning for Cylindrical Parts	20
1.8	Flexibility in Setup Planning	21
1.8.1	Exchange of Product Data	23
1.9	Setup Planning for Green Manufacturing	25
1.10	Conclusion	26
	References	26
2	Different Phases of Setup Planning	29
2.1	Introduction	29
2.2	Feature Grouping	30
2.3	Setup Formation	32
2.4	Datum Selection	32

2.5	Machining Operation Sequencing Within a Setup	34
2.5.1	Generation of Machining Precedence Constraints	35
2.5.2	Good Manufacturing Practice	38
2.6	Setup Sequencing	38
2.7	Conclusion	38
	References	39
3	Methods for Solving Setup Planning Problems	41
3.1	Introduction	41
3.1.1	Decision Tree, Decision Table and Group Technology (GT) Based Approaches	42
3.1.2	Algorithmic and Graph Theoretic Approaches	45
3.2	Application of Artificial Intelligence and Soft Computing to Setup Planning	47
3.2.1	Expert System Based Setup Planning	48
3.2.2	Fuzzy Logic Based Setup Planning	51
3.2.3	Artificial Neural Network (ANN) Based Setup Planning	56
3.2.4	Application of Evolutionary Algorithms to Setup Planning . . .	60
3.3	Conclusion	62
	References	63
4	A Fuzzy Set Based Setup Planning Methodology.	67
4.1	Introduction	67
4.2	CLIPS: An Expert System Shell	68
4.3	Architecture of the Setup Planning Expert System	70
4.3.1	Database	70
4.3.2	Knowledge-Base	72
4.3.3	The Inference Engine	77
4.3.4	The User Interface	77
4.4	Application of Fuzzy Set for Uncertainty Management	78
4.4.1	Uncertainty in the Feature Precedence Relations	79
4.4.2	Uncertainty in the Datum Selection	83
4.4.3	Strategy for Adaptive Learning and Updating the Knowledge-Base.	84
4.5	Application of the Developed Methodology	85
4.6	Conclusion	88
	References	89
5	Assigning and Fine Tuning of Fuzzy Membership Grades	91
5.1	Introduction	91
5.2	Methods to Assign Fuzzy Membership Grades	92
5.2.1	Direct Rating	93
5.2.2	Polling	93
5.2.3	Reverse Rating	93
5.2.4	Interval Estimation	93

5.2.5	Membership Function Exemplification	93
5.2.6	Pair-Wise Comparison	94
5.2.7	Review of the Recent Literature	95
5.3	Some Popular Forms of Membership Functions	96
5.4	Fine Tuning of Membership Grades	99
5.5	Application of the Proposed Methodology to Burr Height Estimation	103
5.5.1	Experimental Work	104
5.5.2	Application of the Fine Tuning Methodology	106
5.6	Conclusion	109
	References	109
6	Fixturing Consideration in Setup Planning	111
6.1	Introduction	111
6.2	Different Types of Fixtures and Brief Review on Fixture Design . .	112
6.3	The Architecture of the Fixturing Information Generation Module . .	117
6.3.1	Setups, Operation Sequence and Datum Selection Module A	118
6.3.2	Approximate Machining Force Calculation Module B	118
6.3.3	Locator and Clamp Layout Optimization Module C	119
6.3.4	Workpiece-Fixture Contact Module D	121
6.3.5	Locator and Clamp Design Module E	122
6.4	The General Methodology for Generating Fixturing and Process Related Information	123
6.5	An Example of End Milling Process	124
6.6	Conclusion	129
	References	130
