## Part I Molecular Cell Signaling by NO in Cancer

<b>1 Inflammation-Associated Carcinogenesis Involves Interaction Between the iNOS/NO and Wnt/<math>\beta</math>-catenin Signaling Pathways</b> .....	3
Qiang Du and David A. Geller	
Overview of iNOS and Wnt/ $\beta$ -catenin in Carcinogenesis .....	4
iNOS/NO is Associated with the Initiation of Intestinal Cancers .....	7
iNOS/NO Promotes $\beta$ -catenin/TCF Signaling for Carcinogenesis .....	10
iNOS/NO Fine-Tunes $\beta$ -catenin/TCF Signaling by Down-Regulating DKK1 .....	11
iNOS/NO Regulates the Interaction Between $\beta$ -catenin/TCF and NF- $\kappa$ B Pathways .....	13
Specific iNOS Inhibitors Down-Regulate $\beta$ -catenin/TCF Signaling .....	15
iNOS/NO Activates Wnt/ $\beta$ -catenin Signaling Through Other Oncogenic Pathways .....	16
Conclusions and Future Directions .....	16
References .....	17
<b>2 Nitric Oxide and Genomic Stability</b> .....	25
Vasily A. Yakovlev	
Inflammation and Carcinogenesis: Role of NO/RNS Generation .....	26
Non-Inflammatory Stimulation of NO/RNS Generation and Its Role in Carcinogenesis .....	27
NO/RNS: Different Concentrations, Different Effects .....	27
Mechanisms of NO/RNS-Dependent Mutagenesis .....	30
Synthetic Lethality: Combination of NO-Donors and PARP-Inhibitors .....	31
From Bystander Effect to Mutator Field .....	33
References .....	35

<b>3 Targeting Hyponitroxia in Cancer Therapy .....</b>	<b>39</b>
Bryan Oronsky, Neil Oronsky, Michelle Lybeck, Gary Fanger and Jan Scicinski .....	
Introduction .....	40
The Hyponitroxia and Hypoxia Axis .....	40
The “Goldilocks Zone” and Nitric Oxide .....	41
The Dose and Cytotoxicity Threshold .....	42
Conclusions and Future Directions .....	46
References .....	47
 <b>4 Mechanisms of Nitric Oxide-Dependent Regulation of Tumor Invasion and Metastasis .....</b>	 <b>49</b>
Aideen E. Ryan, Amy J. Burke, Francis J. Giles, Francis J. Sullivan and Sharon A. Glynn .....	
Introduction .....	50
Concentration-Dependent Effects of NO .....	51
Evidence for the Effects of Tumor Epithelial-Associated NOS Expression in the Development of Human Metastatic Disease .....	51
Evidence for the Effects of Macrophage-Associated NOS2 Expression in Experimental Tumor Models .....	55
Conclusion .....	57
References .....	58
 <b>5 Role of Nitric Oxide in the Regulation of the Pro-tumourigenic Hypoxic Phenotype: From Instigation to Mitigation .....</b>	 <b>65</b>
Lynne-Marie Postovit .....	
Introduction .....	67
Hypoxia: A Microenvironmental Driver of Tumour Progression .....	67
Hypoxia Inducible Factors: Master Transcriptional Regulators of the Hypoxic Response .....	69
Nitric Oxide .....	69
Cellular Nitric Oxide Production .....	70
Nitric Oxide Production in Hypoxia .....	70
Nitric Oxide Signalling .....	71
NO as A Hypoxia-Mimetic .....	73
NO in the Mitigation of Hypoxia-Induced Phenotypes .....	74
Conclusions: Moving toward the Clinical Use of NO for the Treatment of Cancer .....	75
References .....	76

## Part II S-Nitrosylation and Cancer

<b>6 Impacts of S-Nitrosylation in Cancer</b> .....	87
Tysha N. Medeiros, Dana M. Jarigese, Melissa A. Edwards and Mark A. Brown	
Introduction .....	88
S-Nitrosylation and Cancer .....	89
Conclusions .....	92
References .....	93
<b>7 S-Nitrosylation in Cancer Cells: To Prevent or to Cause?</b> .....	97
Ali Bettaieb, Stéphanie Plenchette, Catherine Paul, Véronique Laurens, Sabrina Romagny and Jean-François Jeannin	
Introduction .....	98
Transcription Factors .....	99
Receptors .....	100
Enzymes .....	102
Chaperone Proteins .....	104
Discussion and Conclusion .....	105
References .....	105
<b>8 The Emerging Role of Protein S-Nitrosylation in Cancer Metastasis</b> .....	111
Sudjit Luanpitpong and Yon Rojanasakul	
Introduction .....	112
Cancer Metastasis .....	113
<i>S</i> -nitrosylation and Anoikis .....	114
<i>S</i> -Nitrosylation and Cell Migration and Invasion .....	118
<i>S</i> -Nitrosylation and Angiogenesis .....	120
Conclusion .....	121
References .....	122

## Part III Modulation of Anti-tumor Immune Responses by NO

<b>9 Nitric Oxide, Immunity and Cancer: From Pathogenesis to Therapy</b> .....	129
Hermes J. Garbán	
Introduction .....	130
Nitric Oxide: Basic Concepts .....	132
Nitric Oxide and Immunity .....	132

Regulation of Immunological Apoptosis-related Genes: The NF- $\kappa$ B Case .....	133
Nitric Oxide: Pathogenesis of Cancer .....	135
Final Remarks, Conclusions .....	137
References .....	138
<b>10 Regulation of Anti-Tumor Immune Responses .....</b>	<b>143</b>
Peter Siesjö	
Introduction .....	145
The Dual Role of NO in the Physiological Regulation of the Immune System .....	145
Effects of NO in Immune Homeostasis .....	146
Regulation of T Cell Activation by NO .....	146
The Immune Suppressive Role of NO .....	147
The Role of NO in the (Pathological) Regulation of Anti-Tumor Responses .....	147
NO-Mediated Immune Suppression in Tumor Bearing Hosts .....	149
Boosting Anti-Tumor Immunity by Modulation of NO-Mediated Immunosuppression .....	151
Crosstalk in the Immune Suppressive Networks .....	152
Clinical Studies .....	152
Concluding Remarks and Future Directions .....	153
References .....	154
<b>11 Nitric Oxide: Immune Modulation of Tumor Growth.....</b>	<b>159</b>
Naveena B. Janakiram and Chinthalapally V. Rao	
Introduction .....	161
Nitric Oxide, Immune Response, and Tumor Growth .....	161
Role of NO in Inflammation and Cancer Progression .....	163
Dose-Dependent Effects of NO in Cancer Progression .....	165
Potential Positive and Negative Regulation of Immune Responses .....	166
Conclusions .....	169
References .....	170
<b>Part IV Therapeutics and Overcoming Resistance</b>	
<b>12 Pivotal Role of Nitric Oxide in Chemo and Immuno Sensitization of Resistant Tumor Cells to Apoptosis.....</b>	<b>179</b>
Benjamin Bonavida	
Introduction .....	181
NO-Mediated Sensitization of Resistant Cancer Cells to Drug-Induced Apoptosis .....	182
NO-Mediated Induction of Resistance .....	186
NO-Mediated Alteration of the Dysregulated NF- $\kappa$ B/Snail/RKIP/YY1 Loop .....	186

In Vivo Application of NO Donors in Tumor Regression in Pre-Clinical Animal Models .....	191
Concluding Remarks .....	192
References .....	194
<b>13 Emerging Role of NO-Mediated Therapeutics.....</b>	<b>203</b>
Cian M. McCrudden and Helen O. McCarthy	
Introduction—NO as a Therapeutic .....	205
NO Donor Classes .....	205
New Therapeutics .....	208
iNOS Gene Therapy .....	214
NO Interference .....	215
Conclusions .....	218
References .....	220
