

# Contents

|          |  |    |
|----------|--|----|
| <b>1</b> | <b>Introduction</b>                                | 1  |
| <b>2</b> | <b>Model Specification and Data</b>                | 9  |
| 2.1      | Model Specification and Definitions of Convergence | 9  |
| 2.2      | Data Description                                   | 12 |
| <b>3</b> | <b>Econometric Methods</b>                         | 15 |
| 3.1      | Test for Cross-Sectional Dependence in Panels      | 15 |
| 3.2      | Panel Unit Root and Stationarity Tests             |    |
|          | with Cross-Sectional Dependence                    | 16 |
| 3.2.1    | Smith et al. (2004) Panel Unit Root Statistics     | 16 |
| 3.2.2    | Breitung and Das (2005) Panel Unit Root Test       | 18 |
| 3.2.3    | Chang (2002) Panel Unit Root Tests                 | 18 |
| 3.2.4    | Hadri (2000) Panel Stationarity Statistic          | 19 |
| 3.2.5    | Choi (2002) Panel Unit Root Tests                  | 20 |
| 3.2.6    | Moon and Perron (2004) Panel Unit Root Statistics  | 21 |
| 3.2.7    | Pesaran (2007) Panel Unit Root Statistics          | 22 |
| 3.2.8    | Harris et al. (2005) Panel Stationarity Statistic  | 23 |
| <b>4</b> | <b>Empirical Results</b>                           | 25 |
| 4.1      | Initial Results Regarding $\sigma$ -Convergence    | 25 |
| 4.2      | Results Regarding Cross-Sectional Dependence       | 30 |
| 4.3      | Analysis of Stochastic Convergence                 | 32 |
| 4.3.1    | Convergence in Real GDP per Worker                 | 32 |
| 4.3.2    | Convergence in the Sources of Output per Worker    | 36 |
| 4.4      | Analysis of Deterministic Convergence              | 42 |
| <b>5</b> | <b>PANIC Approach</b>                              | 45 |
| 5.1      | Methodological and Conceptual Limitations          |    |
|          | of the Previous Analysis                           | 45 |
| 5.2      | PANIC Methodology                                  | 48 |

|          |   |           |
|----------|---|-----------|
| 5.2.1    | Analysis of the Idiosyncratic Component. . . . .                                    | 49        |
| 5.2.2    | Analysis of the Common Component . . . . .  | 50        |
| <b>6</b> | <b>PANIC Results. . . . .</b>   | <b>53</b> |
| 6.1      | Determining the Optimal Number of Common Factors . . . . .                          | 53        |
| 6.2      | Applying the PANIC Approach to Log Real GDP per Worker<br>and Its Sources . . . . . | 55        |
| 6.2.1    | PANIC Analysis of Stochastic Convergence . . . . .                                  | 61        |
| 6.2.2    | PANIC Analysis of Deterministic Convergence . . . . .                               | 62        |
| 6.3      | Discussion of Results . . . . .   | 63        |
| <b>7</b> | <b>Concluding Remarks . . . . .</b>   | <b>65</b> |
|          | <b>References. . . . .</b>  | <b>71</b> |

Convergence in Output and Its Sources Among  
Industrialised Countries

A Cross-Country Time-Series Perspective

Hernández Salmerón, M.; Romero-Ávila, D.

2015, IX, 74 p. 10 illus., 5 illus. in color., Softcover

ISBN: 978-3-319-13634-9
