

Contents

1	Introduction	1
1.1	Two-Dimensional Systems	1
1.1.1	Preliminary Background	1
1.1.2	Analysis and Synthesis of 2-D Discrete Systems	4
1.1.3	Some Classes of 2-D Systems	12
1.2	Linear Repetitive Processes	16
1.2.1	Preliminary Background	16
1.2.2	Stability Analysis and Control of LRPs	18
1.3	Outline of the Book	23
 Part I General Theory of Some Classes of 2-D Systems		
2	Robust Filtering of 2-D Uncertain State-Delayed Systems	33
2.1	Introduction	33
2.2	System Description and Preliminaries	33
2.3	Main Results	35
2.3.1	Filtering Analysis	35
2.3.2	Filter Design	41
2.4	Further Extensions	45
2.4.1	Polytopic Uncertain Case	45
2.4.2	Norm-Bounded Uncertain Case	47
2.5	Illustrative Example	50
2.6	Conclusion	55
 3	 Robust Filtering of 2-D Linear Parameter-Varying Systems	 57
3.1	Introduction	57
3.2	System Description and Preliminaries	57
3.3	$\mathcal{H}_\infty$ Filtering	60
3.4	ℓ_2 - ℓ_∞ Filtering	70
3.5	Illustrative Example	75
3.6	Conclusion	80

4	Filter Design Approach to Fault Detection of 2-D Markovian Jump Systems	81
4.1	Introduction	81
4.2	System Description and Preliminaries	82
4.3	Main Results	86
4.3.1	Performance Analysis	86
4.3.2	Fault Detection Filter Design	97
4.4	Illustrative Example	100
4.5	Conclusion.	104
5	Dynamic Output Feedback Control of 2-D Linear Parameter-Varying Systems	107
5.1	Introduction	107
5.2	Problem Formulation and Preliminaries	107
5.3	Main Results	109
5.4	Illustrative Example	115
5.5	Conclusion.	120
6	Sliding Mode Control of 2-D Systems	121
6.1	Introduction	121
6.2	System Description and Preliminaries	121
6.3	2-D Reaching Law	122
6.4	SMC Design: Method I	124
6.5	SMC Design: Method II	130
6.6	Illustrative Example	134
6.7	Conclusion.	138
7	Model Approximation of 2-D State-Delayed Systems	139
7.1	Introduction	139
7.2	Problem Formulation and Preliminaries	140
7.3	Main Results	142
7.3.1	Single Delay Case.	142
7.3.2	Multiple Delay Case	147
7.4	Illustrative Example	158
7.5	Conclusion.	167

Part II A Special Class of 2-D Systems: Linear Repetitive Processes

8	Robust Filtering of Differential and Discrete LRPs	171
8.1	Introduction	171
8.2	Filtering of Differential LRPs	171
8.2.1	Problem Formulation.	171
8.2.2	Main Results	173

8.2.3	Extension to Uncertain Case.	177
8.2.4	Illustrative Example	180
8.3	Filtering of Discrete LRP	186
8.3.1	Problem Formulation.	186
8.3.2	Main Results	187
8.3.3	Illustrative Example	192
8.4	Conclusion.	195
9	Reduced-Order $\mathcal{H}_2$ Filter Design for Discrete LRP	197
9.1	Introduction	197
9.2	Problem Formulation and Preliminaries	197
9.3	$\mathcal{H}_2$ Performance Analysis	199
9.4	Full-Order $\mathcal{H}_2$ Filter Design	202
9.5	Reduced-Order $\mathcal{H}_2$ Filter Design.	205
9.5.1	Convex Linearization Approach	205
9.5.2	Projection Approach	207
9.6	Illustrative Example	211
9.7	Conclusion.	216
10	Filter Design Approach to Fault Detection of Discrete LRP	217
10.1	Introduction	217
10.2	Problem Formulation and Preliminaries	217
10.3	Main Results	221
10.4	Illustrative Example	227
10.5	Conclusion.	233
11	Dynamic Output Feedback Control of Differential and Discrete LRP	235
11.1	Introduction	235
11.2	Differential LRP Case	235
11.2.1	Problem Formulation and Preliminaries	235
11.2.2	Generalized $\mathcal{H}_2$ Performance Analysis.	239
11.2.3	Generalized $\mathcal{H}_2$ Static Feedback Control	242
11.2.4	Generalized $\mathcal{H}_2$ Dynamic Output Feedback Control	244
11.2.5	Illustrative Example	250
11.3	Discrete LRP Case.	252
11.3.1	Problem Formulation and Preliminaries	252
11.3.2	Performances Analysis.	254
11.3.3	$\mathcal{H}_\infty$ Dynamic Output Feedback Control.	257
11.3.4	Generalized $\mathcal{H}_2$ Dynamic Output Feedback Control	261
11.3.5	Illustrative Example	262
11.4	Conclusion.	265

12	State Estimation and Quasi Sliding Mode Control of Differential LRPs	267
12.1	Introduction	267
12.2	Problem Formulation and Preliminaries	267
12.3	Main Results	269
12.3.1	Analysis of Sliding Mode Process	269
12.3.2	Observer and SMC Law Design	271
12.3.3	Reachability Analysis	276
12.4	Illustrative Example	278
12.5	Conclusion	281
13	Model Approximation of Differential and Discrete LRPs	283
13.1	Introduction	283
13.2	Differential LRPs Case	284
13.2.1	Problem Formulation	284
13.2.2	Hankel-Norm Performance	286
13.2.3	Hankel-Norm Model Approximation	290
13.2.4	A Special Case	296
13.2.5	Illustrative Example	300
13.3	Discrete LRPs Case	303
13.3.1	Problem Formulation	303
13.3.2	Hankel-Norm Performance	305
13.3.3	Hankel-Norm Model Approximation	308
13.3.4	A Special Case	312
13.3.5	Illustrative Example	316
13.4	Conclusion	322
14	Conclusion and Further Work	323
14.1	Conclusion	323
14.2	Further Work	325
	References	327

Filtering and Control for Classes of Two-Dimensional
Systems

Wu, L.; Wang, Z.

2015, XVI, 336 p. 92 illus. in color., Hardcover

ISBN: 978-3-319-13697-4
