

Contents

Part I Introduction

Earth System Science—Past Experiences and Future Trends.	3
Vikram Unnithan, Astrid Bracher, Klaus Grosfeld, Annette Ladstätter-Weissenmayer, Gerrit Lohmann, Helge Meggers, Justus Notholt and Dieter Wolf-Gladrow	
The Educational Program of the Earth System Science Research School (ESSReS).	9
Helge Meggers, Matthias Buschmann, Klaus Grosfeld and Stefanie Klebe	
Time Evolution of a PhD Student’s Mood—A Review of My Time as PhD Student of the Research School ESSReS.	19
Christoph Gregor Hoffmann	
Progress in Earth System Science: What Does It Take to Make Our Ideas Clear?.	25
Gerrit Lohmann	

Part II Remote Sensing and Modelling of Atmospheric Chemistry and Sea Ice Parameters

Towards a Better Tropospheric Ozone Data Product from SCIAMACHY: Improvements in High Latitude Stratospheric Ozone.	39
Jia Jia, Annette Ladstätter-Weissenmayer, Alexei Rozanov and John P. Burrows	

Ten-Year SCIAMACHY Stratospheric Aerosol Data Record: Signature of the Secondary Meridional Circulation Associated with the Quasi-Biennial Oscillation.	49
Lena A. Brinkhoff, Alexei Rozanov, René Hommel, Christian von Savigny, Florian Ernst, Heinrich Bovensmann and John P. Burrows	
Investigating the Link Between Glyoxal and Biogenic Activities.	59
Leonardo M.A. Alvarado, Andreas Richter, Mihalis Vrekoussis, Folkard Wittrock, Andreas Hilboll, Stefan F. Schreier and John P. Burrows	
Estimates of NO_x Emission Factors from GOME-2 Measurements for the Major Types of Open Biomass Burning.	67
Stefan F. Schreier, Andreas Richter and John P. Burrows	
The Use of FTIR-Spectrometry in Combination with Different Biosphere-Atmosphere Flux Measurement Techniques	77
Hella van Asperen, Thorsten Warneke and Justus Notholt	
Near-Infrared Lunar Absorption Spectroscopy for the Retrieval of Column Averaged CO₂ and CH₄	85
Matthias Buschmann, Nicholas M. Deutscher, Mathias Palm, Thorsten Warneke, Tine Weinzierl and Justus Notholt	
A New Method to Filter Out Radio-Frequency Interference (RFI) from SMOS Level 1C Data for Sea Ice Applications	91
Marcus Huntemann and Georg Heygster	
Arctic Multiyear Ice Concentration Retrieval from SSM/I Data Using the NASA Team Algorithm with Dynamic Tie Points	99
Yufang Ye and Georg Heygster	
Detecting CDOM Fluorescence Using High Spectrally Resolved Satellite Data: A Model Study	109
Aleksandra Wolanin, Vladimir Rozanov, Tilman Dinter and Astrid Bracher	
 Part III Physical Oceanography	
The Flow of Dense Water Plumes in the Western Weddell Sea Simulated with the Finite Element Ocean Model (FEOM)	125
Mathias Rucker van Caspel, João Marcelo Absy, Qiang Wang, Hartmut H. Hellmer and Michael Schröder	

Data Analysis and Modeling of the Amundsen Sea Embayment.	131
Yoshihiro Nakayama, Ralph Timmermann, Michael Schröder and Hartmut H. Hellmer	

Part IV Sea-ice Physics

Impact of Sea-Ice Bottom Topography on the Ekman Pumping.	139
Giulia Castellani, Rüdiger Gerdes, Martin Losch and Christof Lüpkes	

Classification of CryoSat-2 Radar Echoes	149
Robert Ricker, Stefan Hendricks, Veit Helm and Rüdiger Gerdes	

Part V Earth System Modelling and Data Analysis

Integration of Passive Tracers in a Three-Dimensional Ice Sheet Model.	161
Johannes Sutter, Malte Thoma and Gerrit Lohmann	

Part VI Climate Archives and Geotectonics

Bivalve Shells—Unique High-Resolution Archives of the Environmental Past	173
Lars Beierlein, Gernot Nehrke, Tamara Trofimova and Thomas Brey	

Functional Diversity and Traits Assembly Patterns of Benthic Macrofaunal Communities in the Southern North Sea.	183
Mehdi Ghodrati Shojaei, Lars Gutow, Jennifer Dannheim, Hendrik Pehlke and Thomas Brey	

Snow Accumulation in North Greenland over the Last Millennium	197
Stefanie Weißbach, Anna Wegner and Sepp Kipfstuhl	

Seismostratigraphic Analysis and Glacial History of the Weddell Sea Region, Antarctica	207
Xiaoxia Huang and Karsten Gohl	

Part VII Geoinformatics

Visual Analysis of Relevant Fields in Geoscientific Multifield Data.	221
Anatoliy Antonov and Lars Linsen	

A Database Language More Suitable for the Earth System Sciences	233
Dimitar Misev and Peter Baumann	
Towards Collaborative Exploration and Analysis of Big Data from Mars: A Noachis Terra Case Study	241
Jelmer H.P. Oosthoek, Angelo P. Rossi and Vikram Unnithan	

**Towards an Interdisciplinary Approach in Earth System
Science**

Advances of a Helmholtz Graduate Research School

Lohmann, G.; Meggers, H.; Unnithan, V.; Wolf-Gladrow,
D.; Notholt, J.; Bracher, A. (Eds.)

2015, X, 251 p. 86 illus., 83 illus. in color., Softcover

ISBN: 978-3-319-13864-0
