3	Passive Devices: Simulation and Design	33
3.1	2.5D Simulation of Planar Passive Devices	34
3.2	Transmission Lines	35
3.2.1	Microstrip	36
3.2.2	Differential Microstrip	37
3.2.3	Differential Slow-Wave Transmission Line	37
3.2.4	High Characteristic Impedance Transmission Line	38
3.2.5	Topology Comparison	38
3.3	Hybrid Coupler	44
3.4	Transformers	46

3.4.1	Transformer Topologies	47
3.4.2	Transformer Sizing	51
3.5	Mm-wave Antennas	57
3.5.1	The Need for mm-Wave On-chip Antennas	57
3.5.2	3D Simulation of Radiating Structures	59
3.5.3	Substrate and Chip Carrier	60
3.5.4	Fully Integrated Dipoles	61
3.5.5	Pseudo Integrated Dipoles: Bondwire Antennas	67
3.5.6	Antenna Comparison	74
3.6	Conclusion	75
