

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Fixed Point Theory in Metric Spaces: An Introduction</b>	<b>5</b>
2.1	Banach Contraction Principle	5
2.2	Pointwise Lipschitzian Mappings	7
2.3	Caristi-Ekeland Extension	12
2.4	Some Applications	13
2.4.1	ODE and Integral Equations	13
2.4.2	Cantor and Fractal sets	14
2.5	Metric Fixed Point Theory in Banach Spaces	15
2.5.1	Classical Existence Results	16
2.5.2	The Normal Structure Property	19
2.5.3	The Demiclosedness Principle	23
2.5.4	Opial and Kadec-Klee Properties	25
2.6	Ishikawa and Mann Iterations in Banach spaces	31
2.7	Metric Convexity and Convexity Structures	34
2.8	Uniformly Convex Metric Spaces	37
2.9	More on Convexity Structures	43
2.10	Common Fixed Points	44
<b>3</b>	<b>Modular Function Spaces</b>	<b>47</b>
3.1	Foundations	47
3.2	Space $E_\rho$ , Convergence Theorems, and Vitali Property	58
3.3	An Equivalent Topology	65
3.4	Compactness and Separability	67
3.5	Examples	69
3.6	Generalizations and Special Cases	71
3.6.1	General Definition of Function Modular	71
3.6.2	Nonlinear Operator Valued Measures	72
3.6.3	Nonlinear Fourier Transform	75

<b>4</b>	<b>Geometry of Modular Function Spaces</b>	79
4.1	Uniform Convexity in Modular Function Spaces	79
4.2	Parallelogram Inequality and Minimizing Sequence Property	88
4.3	Uniform Noncompact Convexity in Modular Function Spaces	91
4.4	Opial and Kadec–Klee Properties	98
<b>5</b>	<b>Fixed Point Existence Theorems in Modular Function Spaces</b>	111
5.1	Definitions	111
5.2	Contractions in Modular Function Spaces	114
5.2.1	Banach Contraction Principle in Modular Function Spaces	114
5.2.2	Case of Uniformly Continuous Function Modularity	116
5.2.3	Case of Modular Function Spaces with Strong Opial Property	118
5.2.4	Quasi-Contraction Mappings in Modular Function Spaces	118
5.3	Nonexpansive and Pointwise Asymptotic Nonexpansive Mappings	121
5.3.1	Case of Uniformly Convex Function Modularity	121
5.3.2	Normal Structure Property in Modular Function Spaces	127
5.3.3	Case of Uniformly Lipschitzian Mappings	134
5.3.4	Common Fixed Point Theorems in Modular Function Spaces	146
5.3.5	Asymptotic Nonexpansive Mappings in Modular Function Spaces Satisfying $\Delta_2$ -type Condition	153
5.3.6	KKM and Ky Fan Theorems in Modular Function Spaces	159
5.4	Applications to Differential Equations	163
<b>6</b>	<b>Fixed Point Construction Processes</b>	171
6.1	Preliminaries	171
6.2	Demiclosedness Principle	172
6.3	Generalized Mann Iteration Process	175
6.4	Generalized Ishikawa Iteration Process	180
6.5	Strong Convergence	184
<b>7</b>	<b>Semigroups of Nonlinear Mappings in Modular Function Spaces</b>	185
7.1	Definitions	185
7.2	Fixed Point Existence for Semigroups of Nonexpansive Mappings	186
7.3	Characterization of the Set of Common Fixed Points	190
7.4	Convergence of Mann Iteration Processes	198
7.5	Convergence of Ishikawa Iteration Processes	202
7.6	Applications to Differential Equations	205
7.7	Asymptotic Pointwise Nonexpansive Semigroups	211
<b>8</b>	<b>Modular Metric Spaces</b>	219
8.1	Definitions	219
8.2	Banach Contraction Principle in Modular Metric Spaces	223
8.3	Nonexpansive Mappings in Modular Metric Spaces	230
	<b>References</b>	235
	<b>Index</b>	243
