

Contents

1	Audiovisual Quality for Interactive Communication	1
1.1	Concept of Quality	1
1.2	Quality Formation Process	3
1.2.1	Human Perception	3
1.2.2	Descriptive Quality Models	5
1.2.3	Multi-modal Perception	7
1.3	Quality Elements and Features for Videotelephony	8
1.3.1	Audiovisual Signal Capturing	9
1.3.2	Media Encoding	11
1.3.3	Network Transmission and Reception	14
1.3.4	Recovery Techniques	15
1.3.5	Media Decoding and Playout	15
1.4	Subjective Quality Assessment	15
1.4.1	Experimental Methodologies	16
1.4.2	Experimental Design	19
1.4.3	Rating Scales	20
1.4.4	Experimental Context	21
1.5	Audiovisual Quality Prediction Models	23
1.5.1	Parameter-Based Models	24
1.5.2	Media-Based Models	28
1.6	Multi-modal Integration	31
1.6.1	Cross-Modal Interaction	31
1.6.2	Audiovisual Integration	32
1.6.3	One-Way Delay	33
1.6.4	Temporal Pooling	34
1.7	Summary	39
2	Interactive Model Framework	41
2.1	Modeling Framework	41
2.2	Experimental Setup	44
2.2.1	Videotelephony Software	44

2.2.2	Test Controller	46
2.2.3	Rating Scales	47
2.2.4	Experimental Environment	48
2.2.5	Test Subjects	48
2.3	Quality Evaluation and Level of Interactivity.	49
2.4	Audiovisual Stimuli	50
2.4.1	Short Samples	50
2.4.2	Simulated Conversations Scenarios	51
2.5	Interactive Conversational Scenarios.	52
2.6	Summary	55
3	Extension of Auditory and Visual Quality Estimation	
	Functions for Videotelephony	57
3.1	Introduction	57
3.2	Viewing Distance.	58
3.3	Video Resolution and Size	59
3.4	Derivation of the G.1070 Video Quality Function Parameters	60
3.4.1	G.1070 Video Coefficients Derivation Procedure.	60
3.4.2	Video Quality Model Description	61
3.4.3	Experimental Results	63
3.4.4	Modeling Limitations.	65
3.4.5	Performance Evaluation	66
3.5	Quality Impact of Video Encoding Resolution and Display Size	70
3.5.1	Experimental Design	70
3.5.2	Experimental Results	71
3.5.3	Normalization	74
3.5.4	Validation of the Experimental Results.	74
3.6	Extension of the G.1070 Video Quality Function for the Resolution and Size Factors	78
3.6.1	Dependency of the Model Parameters on the Encoding Resolution	79
3.6.2	Modeling the Quality Impact of the Display Size.	80
3.6.3	Performance Evaluation	83
3.7	Extension of the G.1070 Audio Quality Function to Wideband Applications.	84
3.7.1	Assumptions and Modeling.	84
3.7.2	Performance Evaluation	86
3.8	G.1070 Model Performance Evaluation.	88
3.9	Summary	90

4	Audiovisual Integration for Call Quality	93
4.1	Introduction	93
4.2	Experimental Design	95
4.2.1	Test Procedure	95
4.2.2	Test Conditions	95
4.3	Influence of the Experimental Context on the Audiovisual Qualities	98
4.3.1	Influence of the Experimental Context on Video Quality	98
4.3.2	Influence of the Experimental Context on Audio Quality	99
4.3.3	Influence of the Experimental Context on Audiovisual Quality	101
4.4	Influence of Cross-Modal Interactions	102
4.4.1	Cross-Modal Interactions for Passive Testing	102
4.4.2	Cross-Modal Interactions for Interactive Testing	104
4.4.3	Discussion	106
4.5	Impact of the Conversational Scenario on the Audiovisual Qualities	107
4.5.1	Influence of the Conversational Scenario on Auditory and Visual Qualities	107
4.5.2	Impact of the Conversational Scenario on the Audiovisual Quality	108
4.6	Application-Oriented Audiovisual Integration	109
4.6.1	Quality-Based Audiovisual Metrics: Literature Review	110
4.6.2	Experimental Factors of Influence	116
4.6.3	Computational Procedure for Application-Oriented Integration Functions	117
4.6.4	Performance Evaluation	118
4.7	Validation of the Application-Oriented Models on Independent Databases	121
4.8	Summary	122
5	Temporal Integration for Audiovisual Call Quality	125
5.1	Introduction	125
5.2	Experimental Design	126
5.2.1	Test Procedure	126
5.2.2	Quality Profiles	127
5.2.3	Discussion	128
5.3	Statistical Analysis on Dialog-Final Judgments	129
5.3.1	Constant Profiles	130
5.3.2	Continuous Change	130

5.3.3	Single Strong Degradations.	131
5.3.4	Asymmetric Profiles.	131
5.4	Modeling Audiovisual Temporal Integration	131
5.4.1	Approaches for Temporal and Audiovisual Integration	131
5.4.2	Optimization Procedure	133
5.4.3	Performance Analysis of the Time Integration Models.	134
5.5	Validation of the Optimized Models.	136
5.5.1	Description of the Dataset and Profiles.	136
5.5.2	Results Analysis of the Optimized Models on the Validation Dataset	138
5.6	Results Analysis Using Instrumental Estimates	140
5.6.1	Performance of Instrumental Models for Short Stimuli	140
5.6.2	Performance of the Time Integration Models on Instrumental Estimates.	141
5.7	Summary	142
6	Conclusion.	145
6.1	Summary	145
6.2	Outlook	148
Appendix A: Audiovisual Simulated Conversation Scenarios		151
Appendix B: Audiovisual Short Conversation Test Scenarios.		155
Appendix C: Experimental Testing Design		161
