1	Introduction to Digital Image	1
1.1	Formation of an Image	1
1.2	Definition of Signal	3
1.3	Analog and Digital Image as 2D Signal	6
1.3.1	Continuous Time Continuous Valued Electrical Signal	7
1.3.2	Continuous Space Continuous Intensity (CSCI) Image	7
1.3.3	Sampling: Discrete Time Continuous Valued (DTCV) Electrical Signal	8
1.3.4	Concept of Sampling in Images (2D Signal)	9
1.3.5	Quantization: Discrete Time Discrete Valued (DTDV) Electrical Signal	10
1.3.6	Quantization in Images (2D Signal)	12
1.3.7	Encoding in Images (2D Signal)	14
1.4	Relationships Between Pixels	14
1.4.1	Neighborhood	14
1.4.2	Adjacency	16
1.4.3	Distance Measures	16
1.5	Geometric Transformations	18
1.5.1	Translation	18
1.5.2	Scaling	21
1.5.3	Rotation	22
1.5.4	Homogeneous Transformation	25
1.5.5	Concatenation of Transformation	27
1.5.6	Affine Transformation	30
1.6	Convolution	31
1.6.1	Transformed Domain Simplicity	33
1.6.2	2D Convolution: Convolution in Image Processing	35
1.7	Correlation	36
1.7.1	Case Study: Pattern (Shape Feature) Matching Between Two Objects Using Cross-Correlation	37

1.8	MATLAB Codes	40
1.8.1	Sampling of a Sweep Image	40
1.8.2	Resolution of Image	40
1.8.3	Quantization of Image	41
1.8.4	Correlation Subroutine	42
	Reference	42
2	Image Enhancement in Spatial Domain	43
2.1	Intensity Transformations	44
2.1.1	Linear Transformation	44
2.1.2	Contrast Stretching and Thresholding	46
2.1.3	Negative Intensity Transform	46
2.1.4	Logarithmic Intensity Transformation	46
2.1.5	Power-Law Intensity Transform and Gamma Correction	47
2.2	Histogram of an Image	49
2.2.1	Skewness	51
2.2.2	Kurtosis	51
2.3	Histogram Equalization and Histogram Specification	52
2.4	Image Smoothing	58
2.4.1	Mean Filter	58
2.4.2	Ordered Statistics Filter	61
2.5	Image Sharpening	63
2.5.1	Image Sharpening by Gradient Mask: First-Order Derivative	65
2.5.2	Image Sharpening by Laplacian mask: Second-Order Derivative	67
2.6	Image Interpolation and Resampling	68
2.6.1	B-Spline Function	72
2.6.2	Interpolation of 1D Signal by B-Spline	74
2.6.3	Interpolation of 2D Image	80
2.7	MATLAB codes	88
2.7.1	Image Transformation Without Interpolation	88
2.7.2	Image Rotation with Different Interpolation Techniques	89
2.7.3	Mean and Median Filter Response on Noisy Image	90
2.7.4	Image Sharpening by Laplacian Mask	91
	Reference	91
3	Interpretation and Processing of Image in Frequency Domain.....	93
3.1	Concept of Frequency in Image	94
3.1.1	Fourier Series	94
3.1.2	Interpretation and Direction of Frequency in Image	99
3.2	Phase Congruency and Edge Detection in an Image	100
3.3	Fourier Transform for Continuous and Discrete Time Signals	106
3.3.1	Discrete Time Fourier Transform	107
3.3.2	DFT and FFT	109
3.4	DFT of Digital Image	110

3.5	Translation and Scaling Properties of 2D Fourier Transform	112
3.5.1	Translation: Dragging the LF (DC) Component at the Center of the 2D Spectra	112
3.5.2	Scaling: Space-Frequency Relationship in Image	114
3.6	Concept of Image Filtering in Frequency Domain	120
3.7	Smoothing Filter	124
3.7.1	Ideal LPF	125
3.7.2	Butterworth LPF	126
3.7.3	Gaussian LPF	129
3.8	Sharpening Filter	130
3.8.1	Ideal HPF	132
3.8.2	Butterworth HPF	133
3.8.3	Gaussian HPF	135
3.9	Case Studies	136
3.9.1	Importance of Phase over Amplitude in DFT Spectrum	136
3.9.2	DFT over DFT	138
3.10	Matlab Codes	143
3.10.1	Ideal 2D Filters in Frequency Domain	143
3.10.2	Subroutine of 2D Butterworth Filter	145
3.10.3	Subroutine of 2D Gaussian Filter	145
3.10.4	Importance of Phase over Amplitude in Image Spectrum ...	146
