

Contents

Black Holes: Thermodynamics, Information, and Firewalls	1
1 Introduction	1
2 Black Holes	2
2.1 Gravitational Collapse	6
2.2 Anti de Sitter Black Holes	7
3 Black Hole Thermodynamics.	10
3.1 Black Hole Mechanics	11
3.2 Enthalpy, Pressure, and Volume	15
3.3 Black Holes as Chemical Systems	18
4 Field Quantization in Curved Spacetime	22
4.1 Quantum Field Theory in Curved Spacetime.	22
4.2 Scalars	23
4.3 Spinors	28
4.4 Hadamard States	31
5 Particle Creation and Observer-Dependent Radiation	32
5.1 Thermality	33
5.2 Acceleration Radiation	34
5.3 Pair Creation	44
5.4 Accelerating Detectors	46
6 Black Hole Radiation	46
6.1 Tunnelling	52
6.2 Black Hole Entropy	61
7 The Information Paradox	64
7.1 Implications of the Information Paradox	71
7.2 Remedies for the Information Paradox	73
7.3 Complementarity	74

8	Firewalls.	77
8.1	The Firewall Argument	77
8.2	Responses to the Firewall Argument	80
8.3	A Toy Firewall Model.	86
9	Summary	86
	References	87
	Index	97
