

Contents

1	The <i>Lens</i> Genus	1
1.1	Morphology and Taxonomy	2
1.1.1	<i>Lens</i> Morphology	3
1.1.2	Key to the <i>Lens</i> Species	3
1.2	Description, Ecology and Distribution	4
1.2.1	<i>Lens culinaris</i> ssp. <i>culinaris</i>	4
1.2.2	<i>Lens culinaris</i> ssp. <i>orientalis</i>	4
1.2.3	<i>Lens ervoides</i>	5
1.2.4	<i>Lens ervoides</i> in Ethiopia and Uganda	6
1.2.5	<i>Lens lamottei</i>	7
1.2.6	<i>Lens nigricans</i>	8
1.2.7	<i>Lens odemensis</i>	9
1.2.8	<i>Lens tomentosus</i>	10
1.3	Genetics of Morphological Variation in Wild Lentils	10
1.4	Dwarfing Genes in the Genus <i>Lens</i>	12
1.5	Variation in Molecular Markers	13
1.6	Chromosome Variation	13
1.7	Crossability and Cytogenetic Relationships	15
1.7.1	Genetic Nature of Hybrid Embryo Breakdown in the Genus <i>Lens</i>	17
1.8	The Wild Gene Pool of Lentil	17
1.8.1	Potential of the Wild Genetic Resources	18
1.9	The Species Concept	19
1.10	Lentil Domestication	21
1.10.1	Wild Lentil as a Food Source for Prehistoric Humans	21
1.10.2	The Mystery of Early Lentil Cultivation	22
1.11	Wild Genetic Stock of the Domesticated Lentil	27

2	The Annual Species of the <i>Cicer</i> Genus	29
2.1	Taxonomy of Annual <i>Cicer</i> Species	29
2.1.1	Key to the Annual <i>Cicer</i> Species	30
2.2	Morphology of Annual <i>Cicer</i> Species	30
2.2.1	<i>Cicer arietinum</i> ssp. <i>arietinum</i>	30
2.2.2	<i>Cicer arietinum</i> ssp. <i>reticulatum</i>	31
2.2.3	<i>Cicer bijugum</i>	31
2.2.4	<i>Cicer chorassanicum</i>	31
2.2.5	<i>Cicer cuneatum</i>	31
2.2.6	<i>Cicer echinospermum</i>	31
2.2.7	<i>Cicer judaicum</i>	32
2.2.8	<i>Cicer pinnatifidum</i>	33
2.2.9	<i>Cicer yamashitae</i>	33
2.3	The Search for the Wild Progenitor of Chickpea	34
2.4	Distribution and Ecology of Other Annual Wild Chickpea Species	37
2.4.1	<i>Cicer bijugum</i>	37
2.4.2	<i>Cicer chorassanicum</i>	37
2.4.3	<i>Cicer cuneatum</i>	37
2.4.4	<i>Cicer judaicum</i>	37
2.4.5	<i>Cicer pinnatifidum</i>	39
2.4.6	<i>Cicer yamashitae</i>	40
2.5	Crossability Relationships Among the Annual Chickpea Species	40
2.6	Economic Potential of Wild Genetic Resources of Chickpea	42
2.7	The Mystery of <i>Cicer canariense</i>	44
2.8	Pathosystems of Ascochyta Blight in Chickpea and Its Wild Relatives	45
2.9	Chickpea Domestication	49
2.9.1	Evidence for Introgression from Domesticated to Wild Chickpea	52
3	The <i>Pisum</i> Genus	55
3.1	Morphology and Taxonomy	55
3.1.1	Key to <i>Pisum</i> Species and Subspecies	56
3.2	Distribution and Ecology	57
3.2.1	<i>Pisum fulvum</i>	57
3.2.2	<i>Pisum sativum</i> ssp. <i>elatius</i>	59
3.2.3	<i>Pisum sativum</i> ssp. <i>humile</i>	60
3.3	Crossability and Species Relationship	62
3.4	Species Relationships in <i>Pisum</i> as Inferred from DNA Sequence Comparisons	64

3.5	Utilization of Wild <i>Pisum</i> Germplasm for Pea Improvement	66
3.5.1	<i>Pisum fulvum</i>	66
3.5.2	<i>Pisum sativum</i> ssp. <i>humile</i>	67
3.5.3	<i>Pisum sativum</i> ssp. <i>elatius</i>	67
3.6	Pea Domestication	68
4	Legumes with No Documented Genetic Relatives	71
4.1	Faba Bean	71
4.1.1	Chromosome Numbers and Karyotypes	72
4.1.2	Seed Protein Profiles	73
4.1.3	Crossability Experiments	73
4.1.4	Characterization of the Hypothetical Wild Progenitor of Faba Bean	74
4.2	Fenugreek	75
5	Fodder Crops	77
5.1	<i>Vicia Sativa</i> , Aggregate of Common Vetch	77
5.1.1	Chromosomal Variation and the Nature of Interkaryotypic Hybrids	78
5.1.2	Evolution of <i>Vicia Sativa</i> Aggregate	84
5.1.3	Economic Potential of <i>Vicia Sativa</i> Wild Genetic Resources	85
5.1.4	Polyploidy in the <i>Vicia Sativa</i> Aggregate	86
5.2	<i>Vicia ervilia</i> : Bitter Vetch	87
	Glossary	91
	References	95

The Search for Wild Relatives of Cool Season Legumes

Ladizinsky, G.; Abbo, S.

2015, IX, 103 p. 9 illus., 4 illus. in color., Softcover

ISBN: 978-3-319-14504-4
