

Contents

Part I Biofilm, Microbiology, and Genomics

1 Introduction	3
Hideyuki Kanematsu and Dana M. Barry	
2 Conditioning Films	9
Hideyuki Kanematsu and Dana M. Barry	
3 Movement of Bacteria Towards Material Surfaces	17
Hideyuki Kanematsu and Dana M. Barry	
4 Adhesion of Bacteria	23
Katsutoshi Hori	
5 Microstructures of Biofilm	35
James Chapman	
6 Detachment of Bacteria	45
James Chapman	
7 Genomics Approach	53
Hajime Ikegai	
8 General Biological Biofilm Observation and Evaluation	61
Hideyuki Kanematsu and Dana M. Barry	

Part II Biofilm and Industrial Problems

9 Corrosion and Biofilm	69
Reza Javaherdashti	

10 Cooling Water	79
Dana M. Barry and Hideyuki Kanematsu	
11 Ships and Marine Structures	85
Daisuke Kuroda	
12 Biofilm Formation on Medical Devices and Infection: Preventive Approaches	93
Sitaraman Krishnan	
13 Hygiene Problems and Food Industry	109
Satoshi Fukuzaki	
14 Environmental Problems: Soil and Underground Water Treatment and Bioremediation	117
Hideyuki Kanematsu and Dana M. Barry	
15 Energy Problems—Fuel Cell	125
Nobumitsu Hirai	
16 Bioreactors in Industries and Biofilm	135
Dana M. Barry and Hideyuki Kanematsu	
17 Fish Reef, Seaweed Bed, and Other Construction Applications	141
Hideyuki Kanematsu and Dana M. Barry	
18 Contamination and Clean Surface of Materials	147
Hideyuki Kanematsu and Dana M. Barry	
Part III Solving Industrial Biofilm Problems	
19 Chemical Cleaning	155
Satoshi Fukuzaki	
20 Physical Removal of Biofilm	163
Dana M. Barry and Hideyuki Kanematsu	
21 Antibacterial Effect of Materials and Biofilm	169
Hideyuki Kanematsu and Dana M. Barry	
22 Immersion Tests	175
Daisuke Kuroda	

Contents	xi
23 Artificial Biofilm Formation on the Laboratory Scale	181
Dana M. Barry, Hideyuki Kanematsu and Paul B. McGrath	
24 New Evaluation Techniques for Biofilm in Materials Science	187
Hideyuki Kanematsu and Dana M. Barry	
25 Future Scope	193
Hideyuki Kanematsu and Dana M. Barry	

Biofilm and Materials Science

Kanematsu, H.; M. Barry, D. (Eds.)

2015, XI, 196 p. 87 illus., 59 illus. in color., Hardcover

ISBN: 978-3-319-14564-8
