<b>1</b>	<b>Dynamical Models of AC Machines</b>	<b>1</b>
1.1	Applications of AC Machines	1
1.2	Electric Vehicles: Traction System	1
1.3	The Concordia/Clark and Park Transformations	6
1.3.1	The Park Transformation Preserving Amplitude	7
1.3.2	The Clarke Transformation	8
1.3.3	The Park Transformation Preserving Power	9
1.3.4	The Concordia Transformation	10
1.3.5	Transformation Matrices	11
1.3.6	Transformation from a Stationary Reference ( $\alpha, \beta, 0$ ) Frame to a Rotating Reference ( $d, q, 0$ ) Frame	11
1.4	Permanent Magnet Synchronous Motor	12
1.4.1	Description	12
1.4.2	Classification of Permanent Magnet Synchronous Motors (PMSM)	12
1.4.3	Modeling Assumptions	14
1.4.4	Nonlinear Model in State-Space Representation	22
1.5	Induction Motor	27
1.5.1	Motor Description and Modeling Assumptions	27
1.5.2	Dynamic Model of the Induction Motor	28
1.5.3	IM Model in the State-Space Representation	31
1.6	Operating Conditions and Benchmark	39
1.6.1	Benchmarks for AC Machines	39
1.6.2	Experimental Setup	40
1.7	Conclusions	44
1.8	Bibliographical Notes	44

<b>2</b>	<b>Observability Property of AC Machines. . . . .</b>	<b>45</b>
2.1	Observability Property of AC Machines. . . . .	45
2.2	Observability . . . . .	47
2.2.1	Observability of Linear Systems . . . . .	47
2.2.2	Observability of Nonlinear Systems. . . . .	47
2.3	Permanent Magnet Synchronous Motor Observability Analysis (PMSM) . . . . .	54
2.3.1	IPMSM Observability Analysis. . . . .	55
2.3.2	SPMSM Observability Analysis . . . . .	60
2.4	Induction Motor Observability Analysis. . . . .	62
2.4.1	Mathematical Model in the $(d, q)$ Rotor Flux Frame . . . . .	62
2.4.2	Introduction to the Sensorless IM Observability . . . . .	63
2.4.3	Induction Motor Observability with Speed Measurement . . . . .	63
2.4.4	Observability of the Induction Motor: Sensorless Case . . . . .	65
2.4.5	Unobservability Line. . . . .	74
2.5	Normal Forms for Observer Design. . . . .	75
2.6	Conclusions . . . . .	77
2.7	Bibliographical Notes . . . . .	78
<b>3</b>	<b>Observer Design for AC Motors . . . . .</b>	<b>79</b>
3.1	Observers for Nonlinear Systems . . . . .	80
3.1.1	Definitions and Preliminary Results. . . . .	81
3.1.2	A High Gain Observer . . . . .	81
3.1.3	Kalman-Like Observers . . . . .	84
3.2	PMSM Adaptive Interconnected Observers. . . . .	95
3.2.1	Adaptive Interconnected Observers for SPMSM . . . . .	95
3.2.2	Adaptive Interconnected Observers for IPMSM . . . . .	101
3.3	High Order Sliding Mode Observers for PMSM . . . . .	106
3.3.1	Sliding Mode Observers . . . . .	106
3.3.2	High Order Sliding Mode Observer for SPMSM . . . . .	107
3.3.3	HOSM Interconnected Observers for IPMSM: Rotor Speed and Stator Resistance Estimation . . . . .	112
3.4	Adaptive Interconnected Observer for the Induction Motor. . . . .	114
3.5	Conclusions . . . . .	116
3.6	Bibliographical Notes . . . . .	116

<b>4</b>	<b>Robust Synchronous Motor Controls Designs (PMSM and IPMSM)</b>	121
4.1	Backstepping Control	121
4.1.1	Backstepping Control of SPMSM	122
4.1.2	Integral Backstepping Control of IPMSM	125
4.2	High-Order Sliding Mode Control	128
4.2.1	High-Order Sliding Mode Control of SPMSM	129
4.2.2	MTPA Current Reference for IPMSM	132
4.2.3	High-Order Sliding Mode Control of IPMSM	133
4.3	Conclusions	137
4.4	Bibliographical Notes	137
<b>5</b>	<b>Robust Induction Motor Controls Design (IM)</b>	143
5.1	Field-Oriented Control	143
5.1.1	Speed and Flux References	144
5.1.2	Flux Controller Design	146
5.1.3	Speed Control Design	147
5.2	Integral Backstepping Control and Field-Oriented Control	149
5.2.1	Speed and Flux Loops	150
5.2.2	Current Loops	151
5.3	High-Order Sliding Mode Control	155
5.3.1	Introduction	155
5.3.2	Application to the Induction Motor Control	155
5.4	Conclusions	161
5.5	Bibliographical Notes	162
<b>6</b>	<b>Sensorless Output Feedback Control for SPMSM and IPMSM</b>	163
6.1	Robust Adaptive Backstepping Sensorless Control	163
6.1.1	SPMSM Case	163
6.1.2	IPMSM Case	173
6.2	Robust Adaptive High Order Sliding Mode Control	185
6.2.1	SPMSM Case	185
6.2.2	IPMSM Case	191
6.3	Conclusions	198
6.4	Bibliographical Notes	198
<b>7</b>	<b>Sensorless Output Feedback Control for Induction Motor</b>	201
7.1	Classical Sensorless Field-Oriented Control	201
7.1.1	Trajectory Tracking for Sensorless Field-Oriented Control	201
7.1.2	Experimental Results	206
7.1.3	Conclusion	208

7.2	Robust Adaptive Observer-Backstepping Sensorless Control. . .	210
7.2.1	Sensorless Observer-Controller Scheme	
	Stability Analysis . . . . .	210
7.2.2	Experimental Results . . . . .	211
7.2.3	Conclusions . . . . .	215
7.3	Robust Adaptive High Order Sliding Mode Control . . . . .	216
7.3.1	Analysis of the Closed-Loop System. . . . .	222
7.3.2	Experimental Results. . . . .	223
7.3.3	Conclusions . . . . .	227
7.4	Conclusions . . . . .	231
7.5	Bibliographical Notes . . . . .	231

Sensorless AC Electric Motor Control

Robust Advanced Design Techniques and Applications

Glumineau, A.; de Leon Morales, J.

2015, XVIII, 244 p. 84 illus., 82 illus. in color., Hardcover

ISBN: 978-3-319-14585-3
