

Contents

Part I General Introduction

1	Introduction to Asset Management	3
1.1	Purpose of This Book	3
1.2	Evolution of Asset Management	4
1.2.1	Why Do We Need Asset Management?	4
1.3	ISO 55000 Series Asset Management Standards	5
1.4	What is an Asset?	6
1.4.1	Who Needs Asset Management?	7
1.5	Asset Management Role.	7
1.6	An Accountant's View of Assets	8
1.6.1	Fixed Asset	8
1.6.2	Current Asset	9
1.6.3	Expense	9
1.6.4	Liabilities	9
1.6.5	Equity	10
1.7	What is Asset Management?	10
1.7.1	ISO 55000 Definition	10
1.7.2	Extended Definition of Asset Management	10
1.8	Aim of Asset Management.	11
1.8.1	Asset Management System	11
1.9	The Asset Life Cycle	11
1.9.1	Asset Decision Support	13
1.9.2	Regulation	13
1.10	Asset Management Basic Questions	14
1.11	Dangers of Poor Asset Management	14
1.12	Benefits of Good Asset Management	17
1.13	The Asset Death Spiral.	17
1.13.1	Texas City Oil Refinery	18
1.14	Exercises.	18
1.14.1	Self-Assessment Quiz 1.1.	18

1.14.2	Self-Assessment Quiz 1.2.	19
1.14.3	Gas Processing Plant Exercise	19
1.15	Solutions to Exercises	20
1.15.1	Self-Assessment Quiz 1.1.	20
1.15.2	Self-Assessment Quiz 1.2.	20
1.15.3	Gas Processing Plant Exercise	22
1.16	A Top Level Decision.	22
2	Structure and Activities	25
2.1	Business Strategy and Asset Management.	25
2.2	Asset Management in the Organization	27
2.3	Chief Asset Manager Role	27
2.4	Asset Management in the Organization (2)	28
2.5	Asset Management Groups	29
2.5.1	Asset Management Groups Example	30
2.6	Integrated Project Teams	31
2.7	Asset Knowledge	31
2.8	Asset Management Activities.	32
2.8.1	Deployed Assets and Asset Fleets	33
2.8.2	Capital Items	35
2.8.3	In-service Support	35
2.9	Asset Management Policy	36
2.10	Asset Management Plans	36
2.11	Strategic Asset Management Plan (SAMP)	38
2.12	Policy, Strategy, or Plan?	38
2.13	Exercises.	40
2.13.1	Self-Assessment Quiz 2.1.	40
2.13.2	Self-Assessment Quiz 2.2.	40
2.13.3	Holiday Resort Exercise.	40
2.14	Solutions to Exercises	41
2.14.1	Self-Assessment Quiz 2.1 Solution	41
2.14.2	Self-Assessment Quiz 2.2 Solution	41
2.14.3	Holiday Resort Exercise Solution	42
3	Asset Management Personnel	43
3.1	Asset Management—A Matrix Activity.	43
3.1.1	Understanding Needs and Expectations of Stakeholders.	44
3.1.2	Understanding the Organization and Its Context	45
3.2	Competence	45
3.3	Required Areas of Competence	46
3.3.1	Filling the Gaps	46
3.4	Key Activities Where Competence Is Needed	47
3.5	Roles, Responsibilities and Authorities	48

3.6	Engineering and Maintenance Roles	50
3.6.1	Engineering Leaders.	50
3.6.2	Technical Authorities	50
3.6.3	Maintenance Manager	50
3.6.4	Maintenance Superintendent	51
3.6.5	Maintenance Team Leader	51
3.6.6	Maintenance Planner	51
3.6.7	Maintenance Scheduler	51
3.6.8	Document Controller	52
3.7	Personnel Development System	52
3.8	Competency Assessment	52
3.9	Leadership	53
3.9.1	Communication and Response	54
3.10	Exercises.	55
3.10.1	Self-Assessment Quiz 3.1.	55
3.10.2	Pacific Earth Moving Part 1	55
3.10.3	Self-Assessment Quiz 3.1 Solution	56
3.10.4	Pacific Earth Moving Part 1	56
3.11	Asset Management—Who Needs It?	56

Part II Acquisition and Development of Assets

4	From Concept to Project Approval	61
4.1	Project Initiation.	61
4.2	Types of Acquisition or Development	62
4.3	Business Development Planning	63
4.3.1	Major Projects	63
4.3.2	Minor Projects	64
4.3.3	Developmental Flexibility	64
4.3.4	Delegation of Financial Authority	64
4.4	Capability	65
4.5	Capability Requirements Planning.	66
4.5.1	Development Planning Teams	67
4.5.2	Demand Analysis and Forecasting	68
4.5.3	Demand Management.	69
4.5.4	Needs Analysis	69
4.5.5	Un-augmented Capability Analysis	70
4.5.6	Capability Gap	71
4.5.7	Capability Requirements Statement.	72
4.6	Value Engineering	72
4.6.1	Value for Money.	73
4.7	Creating the Development Plan	73
4.8	Prefeasibility Analysis	73
4.9	Feasibility Analysis	74

4.10	Development Plan	74
4.11	Development Plan Detailed Topics	75
4.12	Considerations in Development Planning	76
4.12.1	Stakeholders	76
4.12.2	Stakeholder Example	77
4.12.3	Existing Processes and the Status Quo	78
4.12.4	Lead Time	78
4.12.5	In-Service Date	78
4.12.6	Date of Decision	79
4.12.7	Operational Concept Document	79
4.12.8	Function and Performance Specifications	80
4.12.9	Level of Service	80
4.12.10	Scope of Work	80
4.12.11	Financial Analysis	81
4.12.12	Acquisition Strategy	81
4.13	Project Maturity	82
4.14	Implementation Portfolio	82
4.15	Exercises	83
4.15.1	Self-Assessment Quiz 4.1	83
4.15.2	Self-Assessment Quiz 4.2	84
4.15.3	Capacity Planning—Generators	84
4.15.4	Bottling Plant Exercise	85
4.15.5	Own Project Exercise	85
4.16	Exercise Solutions	85
4.16.1	Self-Assessment Quiz 4.1 Solutions	85
4.16.2	Self-Assessment Quiz 4.2 Solutions	87
4.17	Capacity Planning Exercise Generators—Solution	89
4.18	Bottling Plant Exercise Solution	90
4.19	A Business Imperative	90
5	Financial Methods	93
5.1	Introduction	93
5.2	Discounted Cash Flow	94
5.2.1	Interest Rate	94
5.2.2	Present Value (PV)	95
5.2.3	Discount Factor	95
5.2.4	Net Present Value (NPV)	96
5.2.5	Cash Flow Diagram	96
5.2.6	Excel Function NPV	97
5.2.7	Equivalent Annual Cost (EAC)	98
5.2.8	Relationship Between EAC and NPV	100
5.3	Other Financial Terms	100
5.3.1	Annuity Factor	100
5.3.2	Capital Recovery Factor	101
5.3.3	Equivalent Unit Cost (EUC)	101

5.4	Asset Investment Criteria	101
5.4.1	Net Present Value	102
5.4.2	Payback Period	102
5.4.3	Internal Rate of Return (IRR)	103
5.4.4	Minimum Acceptable Rate of Return (MARR)	104
5.4.5	Profitability Index	104
5.4.6	Return on Investment (ROI)	104
5.4.7	Project Financial Measures—Summary	105
5.5	Exercises	105
5.5.1	Discounted Cash Flow Revision Question	105
5.5.2	Materials Handling System—Net Present Value Exercise	106
5.5.3	Materials Handling System—Payback Period Exercise	106
5.5.4	Communications System Exercise	106
5.6	Financial Analysis of a Turbo-Generator Project—Exercise	107
5.6.1	Materials Handling System—Net Present Value Solution	108
5.6.2	Materials Handling System Payback Period—Solution	109
5.6.3	Communications System Solution	109
5.6.4	Financial Analysis of Turbo-Generator Exercise Solution	111
6	Developing a Business Case	113
6.1	Business Case Introduction	113
6.2	Development Plan	114
6.3	Business Case Outline	115
6.4	Smaller Project Business Case Outline	117
6.5	Impact of Downtime	117
6.5.1	Physical or Service Losses	118
6.5.2	Cost of Failure	119
6.5.3	Indicate Savings and Returns on Investment	119
6.6	The Final Decision to Proceed	120
6.7	Approved Development Plan	120
6.8	Wine Selection Example	120
6.9	Exercises	122
6.9.1	Organizational Structure and Procedures	122
6.9.2	Own Project	122
6.9.3	Pacific Earth Moving Part 2	122
6.10	Experience Required	123
6.11	Exercise Solution	124
6.11.1	Pacific Earth Moving Part 2 Solution	124

7	Implementing Development Plans	125
7.1	Asset Development Portfolios	125
7.1.1	Requirements Portfolio	126
7.1.2	Planning Portfolio	126
7.1.3	Implementation Portfolio	127
7.1.4	In-Service Assets	127
7.1.5	Disposal Portfolio	127
7.2	Project Team and Activities	127
7.2.1	Team Functions	127
7.2.2	Project Management	128
7.2.3	Activities	128
7.3	Project Milestones	129
7.4	Reliability Centered Procurement	129
7.4.1	Equipment Commonality	130
7.4.2	Performance Standards	130
7.4.3	Test and Evaluation Criteria	131
7.4.4	Preferred Suppliers	131
7.5	Evaluation of Suppliers	131
7.6	Equipment Selection and Trials and Acceptance	132
7.7	Through Life Support	133
7.8	Financial and Contract Process	133
7.9	Project Maturity Status	133
7.10	Assigning Responsibilities	133
7.11	Project Management Reports	135
7.11.1	Topics	135
7.11.2	Financial Overview Report	135
7.12	Project Progress Monitoring	135
7.12.1	Delays and Overruns	136
7.12.2	Scope Creep	137
7.12.3	Project Progress Report Examples	137
7.13	Project Portfolio Management	137
7.14	Commissioning and Introduction into Service	139
7.14.1	Operational Readiness	140
7.14.2	Training	141
7.14.3	Introduction into Service	141
7.15	Change Management	142
7.15.1	Change Analysis	142
7.15.2	Change Management Plan	143
7.15.3	Approval of Changes	143
7.16	Exercises	144
7.16.1	Self-Assessment Quiz 6.1	144
7.16.2	Pacific Earth Moving Part 3	144
7.17	Exercise Solutions	144
7.17.1	Self-Assessment Quiz 6.1	144
7.18	Pacific Earth Moving Part 3 Solution	146
7.19	An Acquisition Decision	146

8	Life Cycle Costing	149
8.1	Life Cycle Costing	149
8.1.1	Why Do We Need Life Cycle Costing?	149
8.2	Acquisition Decisions	150
8.3	Life Cycle Asset Management Plan	151
8.3.1	Why Do We Need a Life Cycle Asset Management Plan?	151
8.3.2	Sources of Information	151
8.4	Replacement Decisions	152
8.5	Life Cycle Planning and Costing Elements	152
8.5.1	Acquisition	152
8.5.2	Operations	153
8.5.3	Maintenance	153
8.5.4	Support Services	153
8.5.5	Disposal	154
8.5.6	Buildings—Design and Construction	154
8.5.7	Buildings—Operation, Maintenance, and Disposal	154
8.6	Life Cycle Costing Example	155
8.7	Input to Plans and Budgets	157
8.7.1	Acquisition	157
8.7.2	Support Facilities and Logistics Planning	157
8.7.3	In-Service Asset Management Planning and Budgeting	157
8.8	Exercises	158
8.8.1	Self Assessment Quiz	158
8.8.2	Solution to Self Assessment Quiz	158

Part III Managing In-service Assets

9	Know Your Assets	161
9.1	Awareness of Key Assets	161
9.1.1	Examples	162
9.2	Acquisition of Asset Knowledge	164
9.3	Block Diagrams	164
9.3.1	Information Required Per Block	164
9.3.2	Drawings	165
9.4	Criticality	165
9.4.1	Example—Chemical Plant	165
9.4.2	Example—Mining Site	166
9.5	Expert Teams	167
9.6	Bottlenecks	167
9.7	Backlogs	168
9.8	Asset Condition	168

9.9	Plant Criticality Exercise	169
9.10	Plant Criticality Exercise Solution	170
9.11	Look Back in Embarrassment	170
10	Asset Continuity Planning	173
10.1	Asset Continuity	173
10.1.1	Factors in Continuity Planning	174
10.2	Asset Data	174
10.3	Planning Terminology	174
10.4	Planning Schedules	176
10.5	Planning Schedules Example	176
10.5.1	Expiry Schedule	177
10.5.2	Acquisition and Cost Schedule	177
10.5.3	Application of the Acquisition and Cost Schedule	177
10.6	Planning Example with Varying Needs	178
10.6.1	Preplan Gap Analysis	178
10.6.2	Creating the Purchase Plan	180
10.7	Capability Continuity Planning	182
10.8	Columnar Format	182
10.9	Exercises	183
10.9.1	Continuity Planning	183
10.9.2	Vehicle Fleet Capacity Exercise	183
10.10	Exercise Solutions	184
10.10.1	Continuity Planning Solution	184
10.10.2	Vehicle Fleet Capacity Exercise	184
11	Management of In-Service Assets	187
11.1	In-Service Assets	187
11.2	In-Service Support Aims	187
11.3	In-Service Support Activities	188
11.4	Organization for In-Service Support	190
11.5	Engineering and Technical Services	191
11.6	Asset Management Plans	191
11.6.1	ISO 55000 Definition and Requirements	191
11.6.2	Life Cycle Asset Management Plan	192
11.6.3	Planning-Period Asset Management Plan	192
11.6.4	Planning Overview	192
11.6.5	Asset Management Plan Inputs	194
11.6.6	Planning Considerations	194
11.6.7	Consolidated Asset Management Plan	195
11.6.8	Plan Summary	195
11.7	Time Period (e.g., 5 Year) Asset Management Plan	196
11.7.1	Introduction	196
11.7.2	Relationship to the SAMP	197
11.7.3	Role of the 5 Year Asset Management Plan	197

11.7.4	Development of the 5 Year Plan	198
11.7.5	Outline Contents of a 5 Year Asset Management Plan	198
11.8	Configuration Management	200
11.8.1	Configuration Management Example.	200
11.8.2	Configuration Description	200
11.8.3	Configuration Management Process.	201
11.8.4	Configuration Change Control	201
11.9	Exercises.	201
11.9.1	Self-Assessment Quiz 9.1.	201
11.9.2	Configuration Management Exercise	202
11.10	Exercise Solutions	202
11.10.1	Self-Assessment Quiz 9.1 Solution	202
11.10.2	Configuration Management Solutions	203
11.11	Roll Over	204
12	Capital Planning and Budget	207
12.1	Capital Planning Considerations	207
12.1.1	Cyclic Aspect	208
12.2	What is a Budget?.	208
12.3	Types of Budget	208
12.4	Budget Structure.	209
12.5	Devolution of Authority	209
12.6	Organizational Planning Process	210
12.7	Asset Planning Process.	210
12.7.1	Planning Periods.	211
12.7.2	Source and Application of Funds	211
12.8	Capital Requirement Plans for Asset Types	212
12.9	Capital Budgeting Cycle	213
12.10	Capital Rationing	213
12.10.1	Capital Rationing Example—Postal Vans	214
12.10.2	Replacement Prioritization.	215
12.10.3	Condition/Criticality Plot	215
12.10.4	Financial Return	216
12.10.5	Risk.	216
12.11	The Capital Budget.	217
12.12	Managing the Capital Project Portfolio	217
12.12.1	Capital Budget for Current Year.	218
12.13	Contingency Allowances	219
12.14	Exercises.	219
12.14.1	Self-Assessment Exercise 12.1.	219
12.14.2	Long River Ferry Company Exercise.	219
12.15	Are Your Assets Liabilities?	220
12.16	Exercise Solutions	221
12.16.1	Self-Assessment Exercise 12.1 Solution	221
12.16.2	Long River Ferry Company Exercise Solution	222

13	Asset Management Information Systems	223
13.1	Information System Role and Applications	223
13.2	Base Data and the Need for Coding	225
13.2.1	Fixed Plant and Functional Locations	225
13.2.2	Location Code Structure	227
13.2.3	Mobile Plant Coding	228
13.2.4	Activity and Trade Codes	228
13.3	Resourcing and Managing the System	229
13.3.1	Data Administration	229
13.3.2	Information Technology Support	229
13.3.3	Users	230
13.4	Reports and Their Uses	230
13.5	Document Control	231
13.6	Implementing Changes	231
13.7	Exercises	232
13.7.1	Asset Data Setup Exercise	232
13.7.2	Pacific Earth Moving Part 4 AM Info. System	233
13.8	Exercise Solutions	234
13.8.1	Asset Data Setup Exercise	234
13.8.2	Pacific Earth Moving Part 4 AM Info. System Solution	234

Part IV General Management Considerations

14	Cost–Benefit Analysis	239
14.1	Cost–Benefit Analysis	239
14.1.1	Nonfinancial Benefits	239
14.2	Cost–Benefit Analysis Outline	240
14.2.1	A Basic Example	240
14.3	Needs and Wants	241
14.4	User Pays Principle	242
14.5	Activity-Based Cost–Benefit Analysis	243
14.6	Lost Opportunity Cost	243
14.7	Measures of Benefit	244
14.8	Cost–Benefit Analysis Steps	244
14.8.1	Activity-Based Cost–Benefit Summary Sheet	244
14.9	Regional Health Clinics Exercise	246
14.10	Regional Health Clinics Exercise Solution	246
14.11	Cost–Benefit Spider Diagram	248
15	Risk Analysis and Risk Management	249
15.1	Aim	250
15.2	References	250
15.3	Risk Analysis	251

15.4	Definitions	251
15.5	Management of Risk	251
15.5.1	Risk Management Documents	252
15.6	Take 5	253
15.7	Legislative Approach	253
15.8	Types of Risk	255
15.8.1	Sovereign Risk	255
15.8.2	Solution Risk	255
15.8.3	Technical Development Risk	255
15.8.4	Performance Risk	256
15.8.5	Commercial or Financial Risk	256
15.8.6	Administrative Risk	256
15.8.7	Safety and Environmental	256
15.8.8	Supplier Risk	256
15.8.9	Resources	256
15.9	Hazard Analysis	257
15.10	Consequences	257
15.11	Risk Analysis and Risk Rating	257
15.11.1	Risk Matrix	258
15.11.2	Consequence Ratings	259
15.12	Risk Register	259
15.13	Mitigating Risk	259
15.14	Contingency Planning	260
15.14.1	Contingency Allowance	260
15.14.2	Contingency Plan	261
15.14.3	Retirement of Risk	261
15.15	Quantitative Risk Analysis	261
15.16	Other Methods	262
15.17	Project Risk Examples	263
15.18	Water Supply System Example	263
15.18.1	Hazard Analysis	265
15.18.2	Risk Treatment	265
15.18.3	Monitoring and Audit	269
15.19	Exercises	269
15.19.1	Self-Assessment Exercise 15.1	269
15.19.2	Self-Assessment Exercise 15.1 Solution	270
16	Outsourcing	271
16.1	Introduction	271
16.2	What to Outsource	272
16.2.1	Noncore Activities	272
16.2.2	Minor Player	272
16.2.3	Peak Load Resources	272
16.3	The Owner/Operator Model	273

16.4	What NOT to Outsource.	273
16.4.1	Core Activities	273
16.4.2	High Customer Impact	273
16.4.3	Problem Areas	273
16.4.4	Examples	273
16.5	Benefits of Outsourcing	274
16.5.1	Concentration on Core Business	274
16.5.2	Redress Workforce Imbalances	274
16.5.3	Reduce Fixed Costs	274
16.5.4	Review Maintenance Practices and Resources.	275
16.6	Costs of Outsourcing	275
16.6.1	Formalization	275
16.6.2	Intangible Effects	275
16.6.3	Other Potential Negatives.	276
16.7	Types of Contract	277
16.8	Contract Features	278
16.9	Limiting Risks in Outsourcing	278
16.9.1	Audit.	279
16.10	Outsourcing Result.	279
16.10.1	Example	280
16.11	Contractor Viewpoint	280
16.12	Build Own Operate Transfer (BOOT)	280
16.13	Public Private Partnerships (PPP).	281
16.14	Exercises.	282
16.14.1	Self-Assessment Exercise.	282
16.14.2	Self-Assessment Exercise Solution	282

Part V Technical Areas

17	Logistic Support	285
17.1	Introduction	285
17.2	Logistic Support Analysis (LSA).	286
17.2.1	Logistic Support Basic Data.	287
17.2.2	Logistic Support Detailed Factors	287
17.3	Level of Repair Analysis (LORA)	288
17.3.1	Levels of Repair	289
17.4	Integrated Logistic Support (ILS)	291
17.5	Logistic Support Plan.	292
17.6	Through Life Support.	293
17.7	Configuration Management Plan	293
17.8	Through Life Support Contract	294
17.9	Logistic Support Example	294
17.10	Supplier or Contractor Viewpoint.	295
17.11	Cunning at the Castle	297

17.12	Exercises	298
17.12.1	Self-Assessment Questions	298
17.12.2	Logistic Support Analysis—Tooth Brush.	298
17.12.3	Racing Cycle Team.	299
17.12.4	Level of Repair Analysis Exercise	299
17.13	Exercise Solutions	299
17.13.1	Self-Assessment Questions Solutions	299
17.13.2	Logistic Support Analysis—Tooth Brush Solution . . .	301
17.13.3	Cycle Team Logistic Support Exercise Solution	301
17.13.4	Level of Repair Analysis Exercise	301
18	Asset Basic Care	303
18.1	Introduction	303
18.2	Total Productive Maintenance or Asset Basic Care	304
18.2.1	Workplace Tidiness and Organization	304
18.2.2	Maintain Standards.	305
18.2.3	Training	306
18.2.4	Machine Knowledge.	306
18.3	Basic Maintenance	306
18.3.1	Assign Housekeeping and Basic Maintenance Tasks. . .	307
18.3.2	Routine Maintenance by Technicians.	308
18.3.3	Accredit Workers	308
18.4	Performance Recording	308
18.5	Continuous Improvement.	309
18.5.1	Deming Wheel	309
18.5.2	Fish Bone Diagram (Ishikawa).	310
18.6	Improvement Coordinator	311
18.7	Asset Basic Care/TPM—Management Support.	312
18.7.1	Asset Basic Care/TPM Summary.	312
18.7.2	Asset Basic Care/TPM Benefits.	312
18.8	A Shock from Japan.	313
18.9	Self-Assessment Exercise.	314
18.10	Self-Assessment Exercise Solutions	314
19	Maintenance Organization and Budget	317
19.1	Maintenance Aim	317
19.2	Maintenance Organization	317
19.2.1	Maintenance Layout.	318
19.3	Types of Maintenance Activity.	319
19.3.1	Additional Related Tasks	320
19.4	Maintenance Work Management	320
19.4.1	Inspection and Scoping	321
19.4.2	Planning and Costing	322
19.4.3	Scheduling	322
19.4.4	Maintenance Control	322

Part VI Financial Analysis

23	Profit, Depreciation, and Tax	429
23.1	Introduction	429
23.2	Capital Transactions	429
23.3	Depreciation	430
23.3.1	Acquisition Cost	430
23.3.2	Book Value (or Written Down Value, WDV)	430
23.3.3	Effective Life	430
23.3.4	Straight Line Depreciation	431
23.3.5	Residual Value	431
23.3.6	Declining Balance Depreciation	432
23.4	Profit and Loss Account	433
23.5	Profit Calculations	433
23.6	Cash Flow Statement	434
23.6.1	Depreciation Tax Credit	435
23.6.2	Maintenance Tax Credits	436

23.6.3	Tax Credit Summary	436
23.6.4	Tax on Resale	436
23.7	Pre-tax and After-Tax Cash Flow Diagrams.	437
23.7.1	Pre-tax Cash Flow Diagram	437
23.7.2	After-Tax Cash Flow Diagram	438
23.8	Conclusion	438
23.9	Exercises.	439
23.9.1	Self-Assessment Exercise 23	439
23.9.2	Profit Calculation Exercise.	439
23.10	Self-Assessment Exercise 23 Solution	439
23.10.1	Profit Calculation Exercise—Solution	440
24	Asset Decision Examples.	441
24.1	Repair/Replace Decision for Ore Loading Vehicles.	441
24.1.1	Situation	441
24.1.2	Required Decision	442
24.1.3	Factors Involved in the Replace or Overhaul Decision	442
24.2	Replace Option.	443
24.2.1	New Ore Loader Costs	443
24.3	New Loader Life Cycle NPV and EAC	444
24.4	Overhaul Option.	444
24.4.1	Old Ore Loader Costs.	444
24.5	Cost Summary	445
24.6	Ore Loader Cost Analysis with Tax	446
24.6.1	“Replace” Option with Tax	446
24.6.2	“Overhaul” Option with Tax.	447
24.6.3	Loader Initial Policy Decision	447
24.7	Availability and Reliability.	448
24.7.1	Replace/Overhaul Ore Loader Conclusion.	449
24.8	Exercises.	449
24.8.1	Standby Generator Exercise	449
24.8.2	Solar or Diesel Power Exercise	449
24.9	Exercise Solutions	450
24.9.1	Standby Generator Exercise Solution.	450
24.9.2	Solar or Diesel Power Exercise Solution	452
25	Economic Life	455
25.1	Economic Life Concept	455
25.2	Economic Life Example.	455
25.2.1	Hand Calculation	456
25.2.2	Spreadsheet Calculation	457
25.2.3	Economic Life with Discounting	458
25.2.4	Economic Life with Discounting and Tax	460

25.3	Exercises	460
25.3.1	Self-Assessment Exercise	460
25.3.2	Self-Assessment Exercise Solution	461
26	Equipment Replacement Decisions	463
26.1	Replacement Planning	463
26.2	Reasons for Equipment Replacement	464
26.3	Technical Assessment	466
26.4	Data Analysis	466
26.5	Cost Analysis for Replacement	466
26.5.1	Like-with-Like Replacement	466
26.5.2	Equivalent Annual Cost of the Challenger	467
26.5.3	Steadily Increasing Cost Case	467
26.5.4	Savings	468
26.5.5	Unevenly Changing Cost Case	469
26.6	Spend-Limits	469
26.6.1	Spend-Limit Example	470
26.7	Risk with Ageing Equipment	470
26.7.1	Risk-Cost	471
26.8	Linear Assets	471
26.8.1	Cost Structure	472
26.8.2	High Consequence Assets	472
26.8.3	Low Consequence, Long Life Asset Replacement	473
26.9	What Length of Asset Should Be Replaced?	473
26.9.1	Cost Structure of Replacement	473
26.9.2	Contiguous Replacement	475
26.9.3	Linear Assets Conclusion	475
26.10	Component Replacement	475
26.10.1	Condition-Based Replacement	476
26.10.2	Failure Replacement and Run-to-Failure	476
26.10.3	Age-Based or Service-Based Replacement	476
26.11	Exercises	477
26.11.1	Vehicle Replacement Exercise	477
26.11.2	Transformer Replacement Exercise	477
26.11.3	Spend-Limit Exercise	478
26.12	Solutions to Exercises	479
26.12.1	Vehicle Replacement Exercise Solution	479
26.12.2	Transformer Replacement Exercise	479
26.12.3	Spend-Limit Exercise	480
27	Further Financial Topics	481
27.1	Debt and Equity Financing	481
27.2	Comparison and Selection of Projects	482
27.2.1	Project Comparability	482
27.2.2	Planning Horizon	482

27.2.3	With and Without Analysis	482
27.3	Inflation	483
27.3.1	Adjusting Historical Costs	483
27.3.2	Real Rate of Interest	484
27.3.3	Adjusting Future Costs	484
27.4	Asset Valuation	484
27.4.1	Current Replacement Cost	485
27.4.2	Deprival Value	486
27.4.3	Asset Value Index	486
27.5	Sinking Fund	487
27.6	Leasing	487
27.7	Loan Repayment	488
27.8	Fixed Costs, Variable Costs, and Break-Even Analysis	489
27.9	Regulation	490
27.9.1	Methods	490
27.9.2	Need for Adequate Returns	491
27.9.3	Stranded Assets	491
27.10	Concluding Discussion	491
27.11	Exercises	492
27.11.1	Self-Assessment Quiz	492
27.11.2	An Asset Investment Case Study	492
27.12	Exercise Solutions	493
27.12.1	Self-Assessment Quiz Solution	493
27.12.2	Asset Investment Case Study Solution	494
28	Performance, Audit, and Review	497
28.1	Key Performance Indicators	497
28.1.1	Railway System Indicators	498
28.1.2	Water Supply System Indicators	498
28.1.3	Electricity Transmission or Distribution	499
28.1.4	Trucks	499
28.2	Overall Equipment Effectiveness	500
28.3	Maintenance-Related Performance Indicators	500
28.4	Audit of the Asset Management System	501
28.5	Management Review	501

Part VII ISO 55000 Standard

29	ISO 55000 Series Standards	505
29.1	Introduction	505
29.1.1	ISO 55000 Fundamentals	506
