

Contents

1	General Introduction	1
1.1	Self-organization in Colloidal Systems	1
1.2	Ordered Structures of Colloidal Spheres	2
1.3	Ordered Structures of Colloidal Cubes	4
1.4	Colloidal Crystal Preparation	7
1.4.1	Sedimentation	7
1.4.2	Convective Assembly	9
1.5	Characterization of Colloidal Crystals	10
1.5.1	Real Space Techniques	10
1.5.2	Reciprocal Space Techniques	13
1.6	Outline of This Thesis	16
	References	18

Part I Spheres

2	Preparation and Characterization of Colloidal Crystals for Synchrotron and Free Electron Laser X-ray Studies	25
2.1	Introduction	25
2.2	Experimental	26
2.2.1	Colloidal Spheres	26
2.2.2	Colloidal Crystal Preparation	27
2.2.3	Fiber Preparation	27
2.2.4	Characterization of Colloidal Crystals	28
2.3	Results	28
2.3.1	Colloidal Crystal Films Prepared via Vertical Deposition	28
2.3.2	Single Colloidal Crystals Grains on a Fiber Tip	31
2.4	Conclusions and Outlook	34
2.5	X-ray Diffraction Experiments of Colloidal Crystals of Spheres	35

2.5.1	Pump-Probe Experiments with Free Electron Lasers	35
2.5.2	In Situ Structural Evolution upon Heating with X-ray Diffraction	36
	References	38
3	Double Hexagonal Close Packed Structure Revealed in a Single Colloidal Crystal Grain by Bragg Rod Analysis	41
3.1	Introduction	41
3.2	Experimental	42
3.3	Bragg Rod Analysis	43
3.3.1	Theoretical Model	43
3.3.2	Results and Discussion	45
3.4	3D Reconstruction	49
3.5	Conclusions	51
	Appendices	52
	References	53
4	Inducing Defects in Colloidal Crystals with Thermosensitive PNIPAm Particles	55
4.1	Introduction	55
4.2	Experimental	58
4.2.1	PNIPAm Synthesis	58
4.2.2	PNIPAm Characterization	58
4.2.3	Sample Preparation of Mixtures	59
4.2.4	Confocal Laser Scanning Microscopy	59
4.2.5	Data Analysis	60
4.3	Results and Discussion	61
4.3.1	PNIPAm-AP and Silica	61
4.3.2	PNIPAm and PNIPAm-AAc	62
4.4	Conclusion	68
4.5	Outlook	69
	References	69
 Part II Cubes		
5	Preparation and Characterization of Colloidal Cubes	73
5.1	Introduction	73
5.2	Experimental	74
5.2.1	Hematite Cubes Synthesis	74
5.2.2	Silica Coating of Hematite Cubes	75
5.2.3	Hollow Silica Cubes	76
5.2.4	Characterization	77

5.3	Colloidal Cube Properties	77
5.3.1	Size	77
5.3.2	Shape.	78
5.3.3	Sedimentation	80
5.3.4	Interactions	80
5.3.5	Sedimentation Experiments	83
5.4	Conclusions.	85
	Appendix	86
	References	87
6	Self-assembly of Colloidal Cubes via Vertical Deposition	89
6.1	Introduction.	89
6.2	Experimental	90
6.2.1	Colloidal Hollow Silica Cubes.	90
6.2.2	Sample Preparation	91
6.2.3	Vertical Deposition Conditions	91
6.2.4	Characterization.	91
6.3	Results	92
6.3.1	Visual Sample Appearance	92
6.3.2	2D Structure Characterization	93
6.3.3	3D Structure Characterization	93
6.4	Discussion	97
6.4.1	Crystal Structure and Formation	97
6.4.2	Crystal Defects	98
6.4.3	Crystal Infiltration	99
6.5	Conclusions.	99
	Appendix	100
	References	101
7	Experimental Evidence of Optimal Packings in Convective Assembled Crystals of Colloidal Cubes.	103
7.1	Introduction.	103
7.2	Experimental	104
7.2.1	Colloidal Cubes.	104
7.2.2	Sample Preparation	105
7.2.3	Convective Assembly Experiments.	106
7.2.4	Characterization.	107
7.3	Results and Discussion	110
7.3.1	Dynamics of Assembly Process	110
7.3.2	Effect of Assembly Method on Structure of Deposit.	111
7.3.3	Structure Analysis	113
7.3.4	Lattice Identification	114
7.3.5	Lattice Analysis of Multi-layered Structures	117

7.4	Conclusion	118
7.5	Outlook	119
