

Contents

1	Introduction.....	1
1.1	Background.....	1
1.2	Metal Matrix Composites.....	2
1.2.1	Processing of MMCs/LMMCs.....	2
1.2.2	Properties, Applications, and Limitations of MMCs/LMMCs.....	3
1.3	Metallic Amorphous Alloys.....	4
	References.....	5
2	Light Metal Matrix Composites	7
2.1	Background	7
2.2	Characteristics of MMCs	8
2.2.1	Importance of Interfacial Bonding.....	11
2.2.2	Role of the Metallic Matrix.....	12
2.3	Processing of LMMCs	13
2.3.1	Liquid-State Processes	13
2.3.2	Solid State Processes.....	21
2.3.3	Semisolid State Processes	25
2.3.4	Other Processes	28
2.4	Strengthening Mechanisms in LMMCs	31
2.4.1	Strength Prediction.....	32
2.4.2	Fracture Mechanisms	33
2.5	Microstructural and Mechanical Properties of LMMCs	34
2.5.1	Al-Composites	34
2.5.2	Mg Composites	40
2.6	Limitations	53
	References.....	53

3 Amorphous Alloys/Bulk Metallic Glasses (BMG).....	59
3.1 Background	59
3.1.1 Formation and Characteristics of Amorphous Alloys/ BMG	60
3.2 Preparation Methods	67
3.2.1 Rapid Solidification Processes	67
3.2.2 Methods for Producing BMG	69
3.2.3 Mechanical Alloying	70
3.3 Structural, Thermal, and Mechanical Properties	72
3.4 Limitations	80
References	82
4 Light Metal Matrix Composites with Amorphous Alloys/Bulk Metallic Glass Reinforcements (BMG)	85
4.1 Introduction	85
4.2 Synthesis, Matrix Reinforcement Selection, and Properties	86
4.2.1 Liquid State Processing: Infiltration Method	86
4.2.2 Solid State Processing: Powder Metallurgy-Based Methods	89
4.2.3 Other Methods/Systems	104
4.3 Conclusions	105
References	105
5 Future Work	107
5.1 Future Research and Applicative Prospects	107
Index	109

Metallic Amorphous Alloy Reinforcements in Light Metal
Matrices

Jayalakshmi, S.; Gupta, M.

2015, VI, 112 p. 75 illus., 33 illus. in color., Softcover

ISBN: 978-3-319-15015-4
